The Gaia Connection:

Gaia Connections Alan S. Miller, 2003 Gaia Connections addresses several arenas of concern as humankind faces an escalating ecological and moral crisis in this new millennium Beginning with an overview of the history of philosophy and the importance of traditional thinking on modern day ethical reflection the book then looks at the development of theories of justice the problems of equity in global human relations the inability of existing economic systems to resolve our human and environmental dilemmas the unnatural connections now obtaining between genuine human need and the technological drift of science the new genetics and reproductive technologies and the nature of modern war The study concludes with some historical perspectives on American environmental history and the urgent need for change in our ecoethical social and value systems The principal focal areas of the original edition are continued the actual state of the global environment today the imperative for the development of sustainable economic and resource systems the movement within much of science toward an almost universal biological determinism and the need for a reaffirmation of an ethical value system which places the needs of people before the needs of property and profits The revised edition not only updates these data and the concerns of the original book but also visits a number of new issues the movement for environmental justice the connections between global poverty and the now almost universal allegiance to a new world market and free trade system the progress and the dilemmas of molecular biology and genetic engineering and the growing disarray within the global systems of political economy

Space Feminisms Marie-Pier Boucher,Claire Webb,Annick Bureaud,Nahum,2024-01-25 Employing a global approach to feminist theory this book examines how scientific popular scholarly and artistic imaginations of space have since the 1950s reflected and embedded Earthly hopes anxieties and futures Rather than simply a platform for imagining the future it cultivates radical and alternative modes of inquiry around space through seeing space as a material reality that reflexively encodes humans self perceptions of their planet and beyond Bringing together essayistic reflections artworks and interviews with space scientists engineers and astronauts past and present in one volume Space Feminisms inspects the transformation of terrestrially held notions of gender race class and ableism as they migrate to the extraterrestrial whilst drawing new connections between feminist thought and extraterrestrial power structures Space Feminisms makes a radical enquiry into how earthly power structures are already expanding into our skies facilitating a collaborative and interdisciplinary platform for scholars artists and designers to imagine radical constructions of human futures beyond Earth At the intersection of scientific cultural social and artistic speculations the book gathers leading scholars scientists artists and designers to develop innovative tactics and disruptive participations to create generative alternative and radical futures of and in space

The Hidden Connections Fritjof Capra,2004-01-06 Fritjof Capra bestselling author of *The Tao of Physics* and *The Web of Life* here explores another frontier in the human significance of scientific ideas applying complexity theory to large scale social interaction In the 1980s complexity theory emerged as a

powerful alternative to classic linear thought A forerunner of that revolution Fritjof Capra now continues to expand the scope of that theory by establishing a framework in which we can understand and solve some of the most important issues of our time Capra posits that in order to sustain life the principles underlying our social institutions must be consistent with the broader organization of nature Discussing pertinent contemporary issues ranging from the controversial practices of the World Trade Organization WTO to the Human Genome Project he concludes with an authoritative often provocative plan for designing ecologically sustainable communities and technologies as alternatives to the current economic globalization
