Regenerative Dialogues for Sustainable Futures Fabio

Scarano, 2024-03-13 This book is about sustainability in its broadest sense. It argues that the ongoing science policy dialogue on sustainable development as framed by the United Nations Sustainable Development Goals is insufficient to drive the planet to desired sustainable futures. This conversation followed by transformative action must be inclusive of other forms of interpretation of reality, arts, spirituality, and ancestral knowledge, and non-modern cosmovisions. This is more a book about dialogues than about the common dualism problem solution, and such dialogues are approached as an essential trigger of regeneration. The book takes the reader from a historical perspective of the human nature relationship through to a discussion on sustainable futures as utopias. The optimism conveyed by the book is justified by a plethora of global examples of such regenerative dialogues.

A Dialogue Between East and West Ricardo

Diez-Hochleitner, Daisaku Ikeda, 2008-03-30 How far do cultures affect the future of the planet Can the debate on the environment and global warming be influenced by the cultures of East and West understanding each other better In this consistently provocative dialogue two of the most influential thinkers of recent times propose that only a human revolution a shift in the hearts and minds of individuals can stimulate a revolution in humanity's relationship with the planet Such a planetary revolution first requires a transformation of moral and political leadership and an orientation towards the future rather than a preoccupation with the short termist policies of the present Responding to humanity's ills from the Buddhist perspective and with all the accumulated wisdom of the eastern philosophical tradition Daisaku Ikeda calls for politicians to take as their mainstay a respect for the dignity of life and an eloquence to inspire in people a sense of community and courage Correspondingly renowned western economist and scholar of education Ricardo Diez Hochleitner stresses the importance of proper educational planning and development in addressing the challenges posed by poverty inequality and climate change While acknowledging the scale of the task that lies ahead both men offer an inspiring and hopeful vision for the future

This volume offers analysis of the narratological structure of the Theogony with the purpose of elucidating a major unifying theme in this poem the relationship between the divine and mortal realms The techniques of narratology are herein employed to support the

argument that Hesiod portrays the cosmos as sharply divided between gods and men The Theogony should therefore be read as a didactic poem explaining primarily the position of man vis vis the gods The first half of this book discusses relevant scholarship and introduces the theme of relationship of gods to men in the Theogony The second half of the book discusses how Hesiod employs Character Text Attributive Discourse Embedded Focalization Anachrony and Commentary to achieve his didactic purposes
