*Liquid Pleasures* Professor John Burnett, John Burnett, 2012-10-02 Drinking has always meant much more than satisfying the thirst. Drinking can be a necessity a comfort an indulgence or a social activity. *Liquid Pleasures* is an engrossing study of the social history of drinks in Britain from the late seventeenth century to the present. From the first cup of tea at breakfast to mid morning coffee to an evening beer and a night cap John Burnett discusses individual drinks and drinking patterns which have varied not least with personal taste but also with age gender region and class. He shows how different ages have viewed the same drink as either demon poison or medicine. John Burnett traces the history of what has been drunk in Britain from the hot beverage revolution of the late seventeenth century connecting drinks and related substances such as sugar to empire right up to the cold drinks revolution of the late twentieth century examining the factors which have determined these major changes in our dietary habits.
