This book reflects the many developments which have occurred in the field over the past decade emphasizing empirical research. More countries and ethnic groups are now involved in the self help movement and this volume increases knowledge of how different cultures react to and participate in self help mutual aid and how self help groups can be adapted to fit different racial or ethnic populations. Self Help and Mutual Aid Groups explores the definition of self help, the centrality of culture as a major factor explaining variability in self help, the development of appropriate methodological tools and the role and involvement of professionals. It brings together different traditions of research for the study of cross and intercultural and inter and intraorganizational aspects of self help groups. Contributors who represent various disciplines including psychology, sociology, social work and nursing discuss a paradigm for research in self help, the development of self help groups in Japan, Hong Kong and the former East Germany, the participation of blacks in Alcoholics Anonymous, the participation of Mexican Americans in groups for parents of the mentally ill, relationships between self help groups and health professionals, predictors of burnout in self help group leaders, characteristics of effective groups, ways individuals change their world view through self help participation. Self Help and Mutual Aid Groups is an informative and helpful resource for self help researchers and teachers, students and professionals who want to be more effective in their work with self help groups across cultural and national lines. Social Work With Groups Stanley Wenocur, 2014-01-14. Social Work With Groups describes continuity and change in group work. It revisits the theoretical ideas of group work and group work topics of the past decade focusing on the continuity of group work theory and practice. At the same time it emphasizes the need for change to more effectively work with and deal with people in new groups in need: people with AIDS, gangs, persons in grief and minorities as well as groups always in need but now with new and additional needs: families, children, adolescents. This book deals with how to meet the needs of existing and emerging populations. It shows a good combination of theory and practice of group work in a variety of settings and using traditional techniques with new groups. Chapters in this book revisit the theoretical ideas of group work such as stages of development and the question of self determination in groups. The sections of theory are the basis for the more practical emphasis of what today's group worker is doing and how they are doing it. Social Work With Groups is very practice oriented. As such anybody who uses groups to help people will find much to read and reflect upon. With its across the board appeal, persons new to group work will delight in the practical information and experienced group workers will find the revisiting of the issues a helpful and refreshing approach. Clinical social workers and faculty with an interest in theory and theoretical approaches to

group work will appreciate the theory addressed in the book Social change oriented practitioners searching for new methods of empowerment among the people will find helpful suggestions in this book for social political and grassroots activism
