The Human Use Of Human Beings Cybernetics And Society:

The Human Use Of Human Beings Norbert Wiener, 1988-03-22 Only a few books stand as landmarks in social and scientific upheaval Norbert Wiener's classic is one in that small company Founder of the science of cybernetics the study of the relationship between computers and the human nervous system Wiener was widely misunderstood as one who advocated the automation of human life As this book reveals his vision was much more complex and interesting He hoped that machines would release people from relentless and repetitive drudgery in order to achieve more creative pursuits At the same time he realized the danger of dehumanizing and displacement His book examines the implications of cybernetics for education law language science technology as he anticipates the enormous impact in effect a third industrial revolution that the computer has had on our lives *The Human Use of Human Beings, Cybernetics and Society. Norbert Wiener,...* Norbert Wiener, 1950

The Human Use of Human Beings Norbert Wiener, 1960 **The Human Use of Human Beings** Norbert Wiener, 1956 *The Human Use of Human Beings* Norbert Wiener, 1950 **Human Use of Human Beings** Norbert Wiener, 1986-03-01 *The Human Use of Human Beings*, 1954 **Norbert Wiener: A Mathematician Among Engineers** Jose Maria Almira, 2022-12-16 Norbert Wiener 1894 1964 is well known by the general public as the founder of Cybernetics by mathematicians as one of the first north American mathematicians who win international prestige as the person who formalized Brownian motion solved the Zaremba problem and was the author of two seminal papers devoted to Generalized Harmonic Analysis and Tauberian Theorems and by engineers as the person who proposed much of the Fourier analysis used by them and contributed to the foundation of the statistical theory of communication which includes the use of wave filter theory information theory and prediction theory in control and communications as well as the automation of all types of electronic devices Wiener's research which was frequently motivated by physics engineering or biology was a clever mixture of Fourier analysis and probability theory His contributions to electronics through his work on filtering that is the separation of noise from a message and the theory of prediction made him very valuable to electronics engineering In addition Wiener addressed many other topics including the formalization of the Brownian motion ergodic theory wave filter theory and information theory Taking all these ingredients together he ventured to create a new scientific paradigm cybernetics This book contains a detailed explanation of Wiener's life his many colleagues and the historical context in which he lived as well as Wiener's work It also contains a large appendix about Wiener Shannon and the rise of a Digital World The main focus of the book is on Wiener's work related to electrical and electronic engineering and the way he used his mathematics to create the main concepts and techniques of the statistical theory of communication In particular the author presents Wiener surrounded by the engineers that worked at MIT with whom he maintained strong contact It was in this atmosphere that information theory arose and Wiener was a main influence on the people who developed that theory

Governing the Future Henning Glaser, Pindar Wong, 2025-02-28 We are living in times of deep and disruptive change

Perhaps the most powerful vector of this change can be described by three related catchphrases digitalization artificial intelligence and dataism Drawing on considerable expertise from a wide range of scholars and practitioners this interdisciplinary collection addresses the challenges impacts opportunities and regulation of this civilizational transformation from a variety of angles including technology philosophy cultural studies international law sociology and economics This book will be of special interest to scholars students analysts policy planners and decision makers in think tanks international organizations and state agencies studying and dealing with the development and governance of disruptive technologies

In Defence of the Human Being Thomas Fuchs, 2021-09-23 With the progress of artificial intelligence the digitalization of the lifeworld and the reduction of the mind to neuronal processes the human being increasingly appears to be just a product of data and algorithms That is we conceive ourselves in the image of our machines and conversely we elevate our machines and our brains to new subjects At the same time demands for an enhancement of human nature culminate in transhumanist visions of taking human evolution to a new stage Against this self reification of the human being this book defends a humanism of embodiment our corporeality vitality embodied freedom are the foundations of a self determined existence which uses these new technologies only as a means instead of letting them rule us *In Defence of the Human Being* offers an array of interventions directed against a reductionist naturalism or transhumanism in various areas of science and society As alternative it offers an embodied and enactive account of the human person we are neither pure minds nor brains but primarily embodied living beings in relation with others Fuchs applied this concept to issues such as artificial intelligence transhumanism and enhancement virtual reality neuroscience embodied freedom psychiatry and finally to the accelerating dynamics of current society which lead to an increasing disembodiment of our everyday conduct of life Cutting across neuroscience philosophy and psychiatry this important new book applies cutting edge concepts of embodiment and enactivism to the current scientific technological and cultural tendencies that will crucially influence our society's development in the 21st century
