The Genetic Frontier Ethics Law And Policy:

The Genetic Frontier Mark S. Frankel, Albert H. Teich, 1994 Food Biotechnology in Ethical Perspective Paul B. Thompson, 2007-05-05 Agrifood biotechnology the genetic transformation of plants and animals through recombinant means has created controversy in the food system for more than twenty years This thoroughly revised and amended edition of Paul B Thompson s path breaking study of ethical and philosophical issues raised by this technology up to date The original 1997 edition was the first book length treatment by a philosopher to focus on food and agricultural biotechnology covering ethical issues associated with risk assessment labelling animal transformation patents and the impact of biotechnology on traditional farming communities in both the developed and developing world The new edition reflects lessons from the hotly contested debates over those issues in the intervening decade and includes wholly new discussions on ethical issues associated with livestock cloning the Precautionary Principle and the transatlantic debate between United States and European perspectives on biotechnology Thompson s unique and insightful approach to addressing the risks and questions of public acceptability associated with novel technology stands as a model for anyone interested in technological innovation and social change The book should be of interest to scholars and citizens interested in the Internet or nanotechnology while it remains an essential resource for understanding the twists and turns of debate over the role of molecular genetics in the transformation of the global food system **Troy Duster** John F. Galliher, 2015-12-03 This book is a biography of University of California Berkeley sociology professor Troy Duster Troy Duster received an MA and PhD in sociology from Northwestern University in Evanston IL Duster is a black man who was born in South Chicago His maternal grandmother is the famous Ida B Wells He initially had a research interest in the sociology of law and later in human genetics He worked with approximately 100 graduate students at Berkeley all minority students Each of his research interests had a special slant given that Troy Duster is an African American Troy Duster has always been firmly committed to the idea that race is a sociological not a biological concept

Ethical Issues in Biotechnology Richard Sherlock, John D. Morrey, 2002-10-16 Ethical Issues in Biotechnology is the first textbook of its kind written collaboratively by a philosopher and a biologist to provide undergraduate students with a comprehensive accessible introduction to the ethical and scientific fundamentals of biotechnology Engaging the ethics and the science side by side the text addresses pressing questions in agricultural food and animal biotechnology human genetics gene therapy human cloning and stem cell research A general introduction to both the moral philosophy and fundamentals of genetics is enhanced throughout the text with section specific introductions addressing the particular philosophical and scientific challenges posed by the topic under consideration Diagrams and drawings study cases liberal use of practical examples and suggestions for further reading make the text an ideal resource for a broad range of students interested in issues and questions lying at the intersection of philosophy and genetics **Pilgrims in Medicine: Conscience, Legalism and Human Rights** Thomas Faunce, 2005-02-01 This arrestingly novel work develops a normative synthesis of medical

humanities virtue ethics medical ethics health law and human rights It presents an ambitious complex and coherent argument for the reconceptualisation of the doctor patient relationship and its regulation utilising approaches often thought of as being separate if not opposed virtue based ethics and universal human rights The case is argued gracefully with moderation but also with respect for opposing positions The book s analysis of the foundational professional virtue of therapeutic loyalty is an original departure from the traditional discourse of patient autonomy and the ethical and legal duties of the medical practitioner The central argument is not merely presented as bookends in the introduction and conclusion It is cogently represented in each chapter and section and measured against the material considered A remarkable feature is the use of aptly selected canonical literature to inform the argument These references run from Hesse s *The Glass Bead Game* in the abstract to Joyce s *Ulysses* in the conclusion They include excerpts from and discussion about Bergman Borges Boswell Tolstoy de Beauvoir Chekhov Dostoevsky Samuel Johnson Aristotle Orwell Osler Chaucer Schweitzer Shakespeare Thorwalds Kafka and William Carlos Williams Such references are used not merely as an artistic and decorative leitmotif but become a critical narrative element and another complex and rich layer to this work The breadth and quality of the references are testimony to the author s clear understanding of the modern law and literature movement This work provides the basis of a medical school course As many medical educators as possible should also be encouraged to read this work for the insights it will give them into using their own personal life narratives and those of their patients to inform their decision making process This thesis will also be of value to the judiciary whose members are often called upon to make normatively difficult judgments about medical care and medical rules The human rights material leads to a hopeful view of an international movement toward a universal synthesis between medical ethics and human rights in all doctor patient relationships

Health Data in the Information Age Institute of Medicine, Committee on Regional Health Data Networks, 1994-01-01 Regional health care databases are being established around the country with the goal of providing timely and useful information to policymakers physicians and patients But their emergence is raising important and sometimes controversial questions about the collection quality and appropriate use of health care data Based on experience with databases now in operation and in development *Health Data in the Information Age* provides a clear set of guidelines and principles for exploiting the potential benefits of aggregated health data without jeopardizing confidentiality A panel of experts identifies characteristics of emerging health database organizations HDOs The committee explores how HDOs can maintain the quality of their data what policies and practices they should adopt how they can prepare for linkages with computer based patient records and how diverse groups from researchers to health care administrators might use aggregated data *Health Data in the Information Age* offers frank analysis and guidelines that will be invaluable to anyone interested in the operation of health care databases

The Moral Challenge of Alzheimer Disease Stephen G. Post, 2002-11-04 Society today writes Stephen Post is hypercognitive it places inordinate emphasis on people s powers of

rational thinking and memory Thus Alzheimer disease and other dementias which over an extended period incrementally rob patients of exactly those functions raise many dilemmas How are we to view and value persons deprived of what some consider the most important human capacities In the second edition of *The Moral Challenge of Alzheimer Disease* Post updates his highly praised account of the major ethical issues relating to dementia care With chapters organized to follow the progression from mild to severe and then terminal stages of dementia Post discusses topics including the experience of dementia family caregiving genetic testing for Alzheimer disease quality of life and assisted suicide and euthanasia New to this edition are sections dealing with end of life issues especially artificial nutrition and hydration the emerging cognitive enhancing drugs distributive justice spirituality and hospice as well as a critique of rationalistic definitions of personhood The last chapter is a new summary of practical solutions useful to family members and professionals
