becomes a boundary crosser in time and space Qianqian Cheng points to Eiseley's method of uniting science and the humanities to reflect on human evolution and the past and future role of science with a visionary and poetic imagination Seizing the connectedness of living beings Eiseley and now Cheng makes us aware of the presence of nature even in daily urban life Qianqian Cheng unveils Eiseley's merits showing the poet as a necessary voice in the urgent mission to make individuals realize their responsibility to respond ethically to the living world **What is the mystery of genius, still unsolved?**

Юрий Низовцев, 2019-02-26 Could a genius of thoughts and feelings emerge from primates The answer is obvious This means that there are certain potencies in a person allowing to solve the problem of genius On the other hand geniuses among individuals is impossible to project and grow up at all diligence in any way and they themselves somehow manifest but is extremely rare What peculiar properties promote manifestation of genius and in what it is expressed

Genealogies of Genius Joyce E. Chaplin, Darrin M. McMahon, 2015-12-08 The essays in this volume seek to examine the uses to which concepts of genius have been put in different cultures and times Collectively they are designed to make two new statements First seen in historical and comparative perspective genius is not a natural fact and universal human constant that has been only recently identified by modern science but instead a categorical mode of assessing human ability and merit Second as a concept with specific definitions and resonances genius has performed specific cultural work within each of the societies in which it had a historical presence **Albrecht Dürer and the Embodiment of Genius**

Jeffrey Chipps Smith, 2020-10-09 During the nineteenth century Albrecht Dürer's art piety and personal character were held up as models to inspire contemporary artists and it was hoped to return Germany to international artistic eminence In this book Jeffrey Chipps Smith explores Dürer's complex posthumous reception during the great century of museum building in Europe with a particular focus on the artist's role as a creative and moral exemplar for German artists and museum visitors In an era when museums were emerging as symbols of civic regional and national identity dozens of new national princely and civic museums began to feature portraits of Dürer in their elaborate decorative programs embellishing the facades grand staircases galleries and ceremonial spaces Most of these arose in Germany and Austria though examples can be seen as far away as St Petersburg Stockholm London and New York City Probing the cultural political and educational aspirations and rivalries of these museums and their patrons Smith traces how Dürer was painted sculpted and prominently placed to accommodate the era's diverse needs and aspirations He investigates what these portraits can tell us about the rise of a distinct canon of famous Renaissance and Baroque artists addressing the question of why Dürer was so often paired with Raphael who was considered to embody the greatness of Italian art and why with the rise of German nationalism Hans Holbein the Younger often replaced Raphael as Dürer's partner Accessibly written and comprehensive in scope this book sheds new light on museum building in the nineteenth century and the rise of art history as a discipline It will appeal to specialists in nineteenth century and early modern art the history of museums and collecting and art historiography **A**
