The Nature Of Sex The Sex Contract:

The Sexual Contract Carole Pateman, 2018-06-05 Carole Pateman is one of the foremost political theorists writing in English today In this outstanding new work she presents a major reinterpretation of modern political theory She shows how standard discussions of social contract theory tell only half the story The sexual contract which establishes modern patriarchy and the political right of men over women is never mentioned In a wide ranging and scholarly discussion Pateman examines the significance of the political fictions of the original contract and the slave contract She also offers a sweeping challenge to conventional understandings of both left and right of actual contracts in everyday life the marriage contract the employment contract the prostitution contract and the new surrogacy contract By bringing a feminist perspective to bear on the contradictions and paradoxes surrounding women and contract and the relation between the sexes she is able to shed new light on the fundamental problems of freedom and subordination The *Sexual Contract* will become a classic text in the politics of gender and will be of major interest to students of social and political theory and philosophy women s studies sociology and jurisprudence

[Back Over the Sexual Contract](#) Lorenzo Rustighi, 2021-12-27 Is patriarchy an illness of democratic societies or a structural problem To answer this dilemma *Back Over the Sexual Contract A Hegelian Critique of Patriarchy* examines the dilemma of patriarchy in modern European political theory by reopening the question of the sexual contract Through a study of the thought of Thomas Hobbes John Locke Jean Jacques Rousseau and Immanuel Kant Lorenzo Rustighi argues that the conceptual roots of male patriarchal entitlement should be sought in the logic of authorized power that underpins the modern understanding of both the state and the family Challenging the mainstream distinction between the private and the public Rustighi provocatively suggests that patriarchy is not something that undermines democracy as an alien threat but is rather inscribed in the intrinsically anti democratic effects of the concept of democracy construed by the modern rationale of the social contract He puts forward a Hegelian argument to propose an unconventional constitutional approach to feminist political theory that helps us rethink democracy beyond its inherent impasses

Origin Stories in Political Thought Joanne Harriet Wright, 2004-01-01 Origin stories are a recurring motif in the history of political thought Presented as narratives that describe the beginnings of politics and power these stories are among the most provocative and politically contentious means by which Western society organizes and represents its experience Indeed as scripts of citizenship origin stories seek to manufacture consent to a preconceived and hierarchical political vision Joanne H Wright s *Origin Stories in Political Thought* examines Plato s *Timaeus* Hobbes s story of the state of nature and the social contract and early Second Wave feminist stories about the beginnings of patriarchal social relations Using a historically sensitive feminist methodology Wright documents and deconstructs the tradition of telling origin stories in the larger history of political thought Although individual tales have been assessed in current scholarship the motif of the origin story itself has until now escaped systematic analysis With meticulous research and convincing conclusions *Origin Stories in Political Thought* makes a

the concept of masculinity **The Fair Sex** Pauline E. Schloesser, 2005-10-01 Choice Outstanding Academic Title 2002 Once the egalitarian passions of the American Revolution had dimmed the new nation settled into a conservative period that saw the legal and social subordination of women and non white men Among the Founders who brought the fledgling government into being were those who sought to establish order through the reconstruction of racial and gender hierarchies In this effort they enlisted the fair sex Mercy Otis Warren Abigail Smith Adams and Judith Sargent Murray each of whom was acutely aware of their tenuous position in the founding era of the republic Carefully negotiating the gender and racial hierarchies of the nation they at varying times asserted their rights and demurred to male governance In their public and private actions they represented the paradigm of racial patriarchy at its most complex and its most conflicted Private Selves, Public Identities Susan J. Hekman, 2010-11-01 In an age when we are all multiculturalists now as Nathan Glazer has said the politics of identity has come to pose new challenges to our liberal polity and the presuppositions on which it is founded Just what identity means and what its role in the public sphere is are questions that are being hotly debated In this book Susan Hekman aims to bring greater theoretical clarity to the debate by exposing some basic misconceptions about the constitution of the self that defines personal identity about the way liberalism conceals the importance of identity under the veil of the abstract citizen and about the difference and interrelationship between personal and public identity Hekman s use of object relations theory allows her to argue against the postmodernist resort to a fictive subject for a core self that is socially constructed in the early years of childhood but nevertheless provides a secure base for the adult subject Such a self is social particular embedded and connected a stark contrast to the neutral and disembodied subject posited in liberal theory This way of construing the self also opens up the possibility for distinguishing how personal identity functions in relation to public identity Against those advocates of identity politics who seek reform through the institutionalization of group participation Hekman espouses a vision of the politics of difference that eschews assigning individuals to fixed groups and emphasizes instead the fluidity of choice arising from the complex interaction between the individual s private identity and the multiple opportunities for associating with different groups and the public identities they define Inspired by Foucault s argument that power is everywhere Hekman maps out a dual strategy of both political and social cultural resistance for this new politics of identity which recognizes that with significant advances already won in the political legal arena attitudinal change in civil society presents the greatest challenge for achieving more progress today in the struggle against racism sexism and other forms of oppression *Gender, Sex and Subordination in England, 1500-1800* Anthony Fletcher, 1995-01-01 Fletcher s account draws from a vast range of sources literary medical religious and historical to investigate the mechanisms through which men and women interpreted and understood their social worlds He explores the early modern view of the body of sexual desire and appetites and of gender difference He looks at the nature of marital relationships and shows how subordination was implemented and consolidated through church school home and community And he exposes patriarchy s

tragic consequences smothered opportunity crushed sexuality and a pall across many women s lives Comparative Contract Law Pier Giuseppe Monateri,2017-04-28 This comprehensive Handbook offers a thoughtful survey of contract theories issues and cases in order to reassess the field s present vision of contract law It engages a critical search for the fault lines which cross traditions of thought and globalized landscapes Comparative Contract Law is built around four main groups of insights including the genealogies of contractual theoretical thinking the contentious relationship between private governance and normative regulations the competing styles used to stage contract law and the concurring opinions expressed within the domain of other disciplines such as literature and political theory The chapters in the book tease out the tensions between a global context and local frameworks as well as the movable thresholds between canonical expressions and heterodox constructions
