The Gig 16 February 2004:

Poetry and the Thought of Song in Nineteenth-Century Britain Elizabeth K. Helsinger, 2015-09-09 In arguing for the crucial importance of song for poets in the long nineteenth century Elizabeth Helsinger focuses on both the effects of song on lyric forms and the mythopoetics through which poets explored the affinities of poetry with song Looking in particular at individual poets and poems Helsinger puts extensive close readings into productive conversation with nineteenth century German philosophic and British scientific aesthetics While she considers poets long described as musical Alfred Lord Tennyson Gerard Manly Hopkins Emily Bront and Algernon Charles Swinburne Helsinger also examines the more surprising importance of song for those poets who rethought poetry through the medium of visual art Dante Gabriel Rossetti William Morris and Christina Rossetti In imitating song s forms and sound textures through lyric s rhythm rhyme and repetition these poets were pursuing song s thought in a double sense They not only asked readers to think of particular kinds of song as musical sound in social performance ballads national airs political songs plainchant but also invited readers to think like song to listen to the sounds of a poem as it moves minds in a different way from philosophy or science By attending to the formal practices of these poets the music to which the poets were listening and the stories and myths out of which each forged a poetics that aspired to the condition of music Helsinger suggests new ways to think about the nature and form of the lyric in the nineteenth century American Poets in the 21st Century Claudia Rankine, Lisa Sewell, 2007-07-09 The ideal

introduction to the current generation of American poets **Quo Vadis?** Carlo Guarnieri, James L. Newell, 2005 2004 was a year that threw into sharp relief the principal features of the present political conjuncture that is one in which the Italian political transition shows few signs of coming to a conclusion 2004 was therefore a year of limited change one in which reforms were announced but not fully achieved and where the few that were achieved were noteworthy for the compromises that were necessary in order to make them possible at all It was too a year in which there emerged a stalemate between the center right and center left coalitions which pending the regional elections of 2005 and the general election of 2006 took almost equal shares of the vote at the elections for the European Parliament This volume examines these elections paying special attention to Forza Italia the prime minister s party and the workings of the governing alliance and gives a well rounded overview over the year s most important developments regarding the government s approach to the European constitution the new judicial system and the pensions legislation the only major reform actually completed during 2004

Practical Wildlife Care Les Stocker, 2013-05-06 Wildlife care and rehabilitation is often on a one to one basis and involves a lot of time care and skill However for many years care of injured wildlife was regarded as a low priority and euthanasia was the recommended option A lot has changed over the past twenty years and now caring for wildlife casualties is part of everyday life in many veterinary practices Following on from the major success of the first edition this second edition provides even more useful information on wildlife care and rehabilitation As well as covering a whole range of species with

sections on birds mammals reptiles and amphibians this edition now includes information on many alien species appearing in the British countryside such as wallabies wild boar and exotic reptiles In this edition Essential guidance on handling first aid feeding and releasing and many other disciplines not featured in veterinary or nursing training Full of helpful tips from an expert in wildlife rehabilitation who has unparalleled practical experience Expanded chapters on the care of all species particularly casualty badgers otters and hedgehogs and more comprehensive guidance on rearing orphaned mammals and birds Lots more colour pictures to aid in management and care techniques and the latest information on zoonotic diseases from around the world

The Lyric Touch John Wilkinson, John Lawton Wilkinson, 2007 The Lyric Touch brings together essays by John Wilkinson on twentieth century British and American poetry several now recognised as classic but hitherto hard to obtain Throughout this book writing previously seen as startlingly modern is reconnected with the English Romantic tradition Formidable poetry is made to become irresistible

The Best of the Best William H. Tranter, Desmond P. Taylor, Rodger E. Ziemer, Nicholas F. Maxemchuk, Jon W. Mark, IEEE Communications Society, 2007-01-09 The Best of the Best Fifty Years of Communications and Networking Research consists of a group of 50 papers selected as the best published by ComSoc in its various journals in the Society's 50 year history The editors of the collection have written an essay to introduce the papers and discuss the historical significance of the collection and how they were selected for the collection The book divides the papers into two major categories Communications and Networking and groups them by decade within these major subdivisions

From Shipbreaking to Sustainable Ship Recycling Tony George Puthucherril, 2010-03-08 Ship recycling conserves resources employs an unskilled workforce and removes outdated tonnage Operating mainly on the Indian subcontinent this primitive industry often results in loss of human life and pollution of the marine environment Despite moral indignation the international community has struggled to manage this industry and only recently completed the IMO International Convention for the Safe and Environmentally Sound Recycling of Ships Using the Indian experience on shipbreaking as a case study this book assesses the strengths and weaknesses of the Convention The author argues that the Convention may not succeed because it fails to strike a balance between environmental protection human rights and commercial realities The book offers recommendations for a holistic and integrated approach to a

sustainable ship recycling industry *The International Law on Ballast Water* Maria Helena Fonseca de Souza Rolim, 2008-06-19 The introduction of invasive marine species into new environments whether by ships ballast water attached to ships hulls or via other means has been identified as one of the four main threats to the world's oceans along with land based sources of marine pollution over exploitation of living marine resources and the physical alteration or destruction of marine habitat Increased trade and the consequent greater volumes of maritime traffic over the last few decades have served to fuel the problem The effects in many areas of the world have been serious and significant Quantitative data show that the rate of bio invasions is continuing to increase in some cases exponentially and new areas are being found to be invaded all the time As volumes of seaborne trade continue overall to increase the problem may not yet have reached its peak In response IMO first adopted Guidelines for Preventing the Introduction of Unwanted Organisms and Pathogens from Ships Ballast Water and Sediment Discharges in 1991 while the United Nations Conference on Environment and Development UNCED held in Rio de Janeiro in 1992 recognized the issue as a major international concern The IMO Guidelines have since been kept constantly under review and updated Subsequently in February 2004 the International Convention for the Control and Management of Ships Ballast Water and Sediments was adopted In providing a broad overview of the legal aspects related to marine pollution caused by ballast water and tank sediments this book offers a pragmatic analysis of the current international legal system and includes principles of international customary law and also references to a comprehensive environmental treaty law framework which relates the Ballast Water Convention to other treaties such as the United Nations Convention on the Law of the Sea UNCLOS MARPOL and the Convention on Biological Diversity With such a wide ranging approach this book will certainly provide a source of valuable information for all those with a requirement to pursue the subject in depth From the Foreword by Efthimios E Mitropoulos *Thelonious Monk* Robin D. G. Kelley, 2010-11-02 The first full biography of Thelonious Monk written by a brilliant historian with full access to the family's archives and with dozens of interviews **Knowledge and experiences for the development of sustainable silvopastoral systems in heathlands in Asturias.** Raquel Benavides Calvo, **Excavating Nations** J. Laurence Hare, 2015-01-01 Excavating Nations traces the history of archaeology and museums in the contested German Danish borderlands from the emergence of antiquarianism in the early nineteenth century to German Danish reconciliation after the Second World War J Laurence Hare reveals how the border regions of Schleswig Holstein and Snderjylland were critical both to the emergence of professional prehistoric archaeology and to conceptions of German and Scandinavian origins At the center of this process Hare argues was a cohort of amateur antiquarians and archaeologists who collaborated across the border to investigate the ancient past but were also complicit in its appropriation for nationalist ends Excavating Nations follows the development of this cross border network over four generations through the unification of Germany and two world wars Using correspondence and site reports from museum university and state archives across Germany and Denmark Hare shows how these scholars negotiated their
