The Last Machine Early Cinema And The Birth Of The Modern World:

The Last Machine Ian Christie,1994 The Cambridge History of Twentieth-Century English Literature Laura Marcus,Peter Nicholls,2004 Publisher Description Last Machine Ian Christie,1995 A review of the era of silent film

From Steam to Screen Rebecca Harrison,2018-03-22 In late nineteenth and early twentieth century Britain there was widespread fascination with the technological transformations wrought by modernity Films newspapers and literature told astonishing stories about technology such as locomotives breaking speed records and moving images seemingly springing into life onscreen And whether in films about train travel or in newspaper articles about movie theatres on trains stories about the convergence of the railway and cinema were especially prominent Together the two technologies radically transformed how people interacted with the world around them and became crucial to how British media reflected the nation s modernity and changing role within the empire Rebecca Harrison draws on archival sources and an extensive corpus of films to trace the intertwined histories of the train and the screen for the first time In doing so she presents a new and illuminating material and cultural history of the period and demonstrates the myriad ways railways and cinema coalesced to transform the population s everyday life With examples taken from more than 240 newsreels and 40 feature length films *From Steam to Screen* is essential reading for students and researchers working on film studies and British history at the turn of the century and beyond Gothic Modernisms A. Smith,J. Wallace,2001-05-04 This is the first full length exploration of the relationship between Gothic fiction and Modernism in fiction and film The Gothic s fascination with images of the fragmented self is echoed in the Modernist concern with the psyche and the paranoia of the everyday The contributors explore how the Gothic influences a range of writers including James Joyce D H Lawrence Virginia Woolf May Sinclair Elizabeth Bowen and Djuna Barnes *Robert Paul and the Origins of British Cinema* Ian Christie,2019-12-09 The early years of film were dominated by competition between inventors in America and France especially Thomas Edison and the Lumi re brothers But while these have generally been considered the foremost pioneers of film they were not the only crucial figures in its inception Telling the story of the white hot years of filmmaking in the 1890s *Robert Paul and the Origins of British Cinema* seeks to restore Robert Paul Britain s most important early innovator in film to his rightful place From improving upon Edison s Kinetoscope to cocreating the first movie camera in Britain to building England s first film studio and launching the country s motion picture industry Paul played a key part in the history of cinema worldwide It s not only Paul s story however that historian Ian Christie tells here *Robert Paul and the Origins of British Cinema* also details the race among inventors to develop lucrative technologies and the jumbled culture of patent snatching showmanship and music halls that prevailed in the last decade of the nineteenth century Both an in depth biography and a magnificent look at early cinema and fin de si cle Britain *Robert Paul and the Origins of British Cinema* is a first rate cultural history of a fascinating era of global invention and the revelation of one of its undervalued contributors *Mapping Lives* Peter France,William St

Clair,2004-09-23 Why biography Lives of writers thinkers and artists while unfailingly popular with readers raise all kinds of theoretical problems This volume explores the different faces and functions of the genre in a range of European settings from antiquity to the present **Cities and Cinema** Barbara Mennel,2008-03-19 Films about cities abound They provide fantasies for those who recognize their city and those for whom the city is a faraway dream or nightmare How does cinema rework city planners hopes and city dwellers fears of modern urbanism Can an analysis of city films answer some of the questions posed in urban studies What kinds of vision for the future and images of the past do city films offer What are the changes that city films have undergone Cities and Cinema puts urban theory and cinema studies in dialogue The book s first section analyzes three important genres of city films that follow in historical sequence each associated with a particular city moving from the city film of the Weimar Republic to the film noir associated with Los Angeles and the image of Paris in the cinema of the French New Wave The second section discusses socio historical themes of urban studies beginning with the relationship of film industries and individual cities continuing with the portrayal of war torn and divided cities and ending with the cinematic expression of utopia and dystopia in urban science fiction The last section negotiates the question of identity and place in a global world moving from the portrayal of ghettos and barrios to the city as a setting for gay and lesbian desire to end with the representation of the global city in transnational cinematic practices The book suggests that modernity links urbanism and cinema It accounts for the significant changes that city film has undergone through processes of globalization during which the city has developed from an icon in national cinema to a privileged site for transnational cinematic practices It is a key text for students and researchers of film studies urban studies and cultural studies Dickens and the Dream of Cinema Grahame Smith,2003-11-08 Taking his cue from Walter Benjamin s concept of each epoch dreaming the epoch that is to follow Grahame Smith argues that Dickens novels can be regarded as proto filmic in the detail of their language as well as their larger formal structures This possibility arises from Dickens creative engagement with the city as metropolis as it emerges in the London of the 1830s plus his immersion in the visual entertainments of his day such as the panorama as well as technological advances such as the railway which anticipates cinema in some of its major features The book offers a new way of reading Dickens through the perspective of a form which he knew nothing of while simultaneously suggesting an account of his part in the manifold forces that led to the appearance of film towards the end of the 19th century **French-language Road Cinema** Michael Gott,2016-05-31 Focusing on a corpus of films from France Belgium and Switzerland French language Road Cinema contends that nowhere is the impulse to remap the spaces and identities of New Europe more evident than in French language cinema
