

The book cover features a red background with a series of overlapping, semi-transparent globes. A classical statue's head and arm are visible in the lower-left corner, partially obscured by the globes. The title 'The Global Age' is written in a large, white, serif font, with 'The' in a smaller, italicized font. The author's name 'Martin Albrow' is at the bottom in a smaller white font.

The Global Age State And Society Beyond Modernity

Martin Albrow

The Global Age State And Society Beyond Modernity:

The Global Age Martin Albrow, 1997 Taking issue with those who see recent social transformations as an extension of modernity the author contends that social theory must confront an epochal change from the modern era to a new era of globality in which human beings can conceive of forces at work on a global scale and in which they espouse values that take the globe as their reference point The book begins by assessing the problems of writing about modernity showing how narratives of an endlessly self-perpetuating modern age were intrinsic to the modern project the attempt by Enlightenment philosophers to transform the everyday world in accord with science and logic under the auspices of the nation state Now we are beginning to realize that the nation state and the modern project cannot renew themselves endlessly through expansion Instead the author contends the age has culminated in its own dissolution and globality has supplanted modernity as the basis for action and social organization In theorizing the global age he considers the worldwide environmental consequences of aggregate human activities the reconception of human security in the age of nuclear weapons technological advances in communication systems the rise of a global economy and the growing reflexivity of global consciousness as people and groups begin to refer to the globe as the frame for their beliefs The book concludes by examining the consequences of the Global Age thesis for politics identifying a new popular construction of the state that the author terms performative citizenship In the modern age the nation state was the central power and citizens were beneficiaries of that power with rights and duties In the global age citizens respond to the lack of central power by creating or performing the state themselves The global managerial class uses the skills learned in the bureaucracy of the nation state to bring pressure on national governments in the interests of global economic environmental or human rights issues The Global Age Martin Albrow, 1996 Many authors who discuss the idea of globalization see it as continuing pre-established paths of development of modern societies Post-modernist writers by contrast have lost sight of the importance of historical narrative altogether Martin Albrow argues that neither group is able to recognize the new era which stares us in the face A history of the present needs an explicit epochal theory to understand the transition to the Global Age When globality displaces modernity there is a general decentering of state government economy culture and community Albrow calls for a recasting of the theory of such institutions and the relations between them He finds an open potential for society to recover its abiding significance in the face of the declining nation state At the same time a new kind of citizenship is emerging This important book will provoke both radicals and conservatives Its scholarship ranges widely across the social sciences and humanities It is bound to promote wide cross-disciplinary debate The Global Age Martin Albrow, 1996 The Global Age Martin Albrow, 2013-06-28 Many authors who discuss the idea of globalization see it as continuing pre-established paths of development of modern societies Post-modernist writers by contrast have lost sight of the importance of historical narrative altogether Martin Albrow argues that neither group is able to recognize the new era which stares us in the face A history of

the present needs an explicit epochal theory to understand the transition to the Global Age When globality displaces modernity there is a general decentering of state government economy culture and community Albrow calls for a recasting of the theory of such institutions and the relations between them He finds an open potential for society to recover its abiding significance in the face of the declining nation state At the same time a new kind of citizenship is emerging This important book will provoke both radicals and conservatives Its scholarship ranges widely across the social sciences and humanities It is bound to promote wide cross disciplinary debate

Challenges of Globalization and Prospects for an Inter-civilizational World Order Ino Rossi, 2020-11-24 This is a must read volume on globalization in which some of the foremost scholars in the field discuss the latest issues Truly providing a global perspective it includes authorship and discussions from the Global North and South and covers the major facets of globalization cultural economic ecological and political It discusses the historical developments in governance preceding globalization the diverse theoretical and methodological approaches to globalization and analyzes underdevelopment anti globalization movements global poverty global inequality and the debates on international trade versus protectionism Finally the volume looks to the future and provides prospects for inter civilizational understanding rapprochement and global cooperation This will be of great interest to academics and students of sociology social anthropology political science and international relations economics social policy social history as well as to policy makers

Sociologists in a Global Age Mathieu Deflem, 2016-04-01 Sixteen leading international sociologists are brought together in this volume to share their experiences of becoming practitioners in the field Selected for their comparative and transnational interests and experiences the contributors include Martin Albrow Karin Knorr Cetina Diane E Davis Pierpaolo Donati Leon Grunberg Horst J Helle Eiko Ikegami Tiankui Jing Hyun Chin Lim Ewa Morawska Richard M nch Saskia Sassen Joachim J Savelsberg Piotr Sztompka Edward A Tiryakian and Ruut Veenhoven Each contributor provides an auto biographical review of their journey into the discipline with special attention paid to the intellectual and social political contexts in which their work matured Each chapter concludes with a commentary on the anticipated future direction of that particular sociological area These original and reflective contributions provide fascinating and rare insights into the careers of sociologists living in a global age

Social Theory and Regional Studies in the Global Age Saïd Amir Arjomand, 2014-05-19 In this pioneering volume leading international scholars argue for the development of a new approach to social theory that draws on regional studies for the conduct of comparative analysis in the global age Social Theory and Regional Studies in the Global Age moves beyond facile generalizations based on the historical experience of modernization in the West by highlighting differences rather than similarities and contrasts rather than commonalities and by examining civilizational processes and culturally specific developmental patterns distinctive of different world regions Essays combine comparative and historical sociology with civilizational analysis and the study of multiple and alternative modernities Different patterns of modernization are compared within the framework of global local compressed communication and

interaction that results from globalization The introductory chapter puts the present effort in the context of the seminal work of three generations of comparative sociologists and what follows is a penetrating analysis of modernization and globality opening the way for rectifying the erasure of the historical experience of a very sizeable portion of humankind from the foundation of social theory The Dimensions of Global Citizenship Darren J. O'Byrne,2004-11-23 The Dimensions of Global Citizenship takes issue with the assumption that ideas about global citizenship are merely Utopian ideals The author argues that far from being a modern phenomenon world citizenship has existed throughout history as a radical alternative to the inadequacies of the nation state system Only in the post war era has this ideal become politically meaningful This social transformation is illustrated by references to the activities of global social movements as well as those of individual citizens

International Encyclopedia of Civil Society Helmut K. Anheier,Stefan Toepler,2009-11-24 Recently the topic of civil society has generated a wave of interest and a wealth of new information Until now no publication has attempted to organize and consolidate this knowledge The International Encyclopedia of Civil Society fills this gap establishing a common set of understandings and terminology and an analytical starting point for future research Global in scope and authoritative in content the Encyclopedia offers succinct summaries of core concepts and theories definitions of terms biographical entries on important figures and organizational profiles In addition it serves as a reliable and up to date guide to additional sources of information In sum the Encyclopedia provides an overview of the contours of civil society social capital philanthropy and nonprofits across cultures and historical periods For researchers in nonprofit and civil society studies political science economics management and social enterprise this is the most systematic appraisal of a rapidly growing field *Managing Global Risks in the Urban Age* Yee-Kuang Heng,2016-03-03 The first full length exposition of what it terms a global city global risks nexus this volume crosses disciplinary boundaries to draw upon research from Security Studies Geography Sociology and Urban Studies Innovative in its approach integrating theories about Global Cities with those positing a Global Risk Society Yee Kuang Heng positions this research in the midst of two concurrent global trends that will gain more significance in coming years The world is experiencing the consequences of not only rapid globalisation but also urbanization In 2008 the UN declared that more than half the world s population was now urban At the same time highly connected global cities like New York London Tokyo and Singapore also face rapidly spreading global risks such as pandemics and financial crises Unique in developing a typology of global risks that threaten a global city like Singapore beyond its Asian focus the book also draws out thematic and policy lessons pertinent to other global cities Global cities do not simply materialize They are dependent on a range of stakeholders at various levels that produce and re produce its command and control capabilities in the face of global risks Singapore s experiences managing global risks in the financial aviation and maritime domains are common concerns shared by many countries and cities that have or aspire to develop similar critical infrastructure
