The Global Crisis In Foreign Aid:

The Global Crisis in Foreign Aid Richard Grant, Jan Nijman, 1998-06 The internal destabilization of many poor countries that accompanied the end of the Cold War and the general failure of structural adjustment programs have changed the nature and allotment of foreign aid around the world Major donors of foreign aid such as the United States Japan and the European Union have been shifting their geographical priorities in allocating aid as well as their project emphasis since the end of the Cold War In addition multilateral aid agencies the World Bank the United Nations and the International Monetary Fund are attempting to redress past failures of aid and revamp policies and priorities Moreover aid recipients in Africa the Middle East Asia Eastern Europe the former Soviet republics and Central America are establishing priorities of their own and evaluating the success and failure of past aid programs This volume stands out in the literature on foreign aid because it includes contributions from eight policy representatives from a range of important donor and recipient countries the United States Japan the Netherlands Bolivia Egypt Bangladesh El Salvador and Poland Timely in its assessment of the crisis and the transition in the foreign aid regime the book provides a view from inside the policy process and imparts a researcher's perspective on the changing priorities for donors and recipients The wide ranging essay most previously unpublished aim to shed light on the changing political economic and regional geographies of aid at the end of the twentieth century *Foreign Aid in the Middle East* Beáta Paragi, 2019-02-28 What do we mean by gifts in International Relations Can foreign aid be conceptualized as a gift Most foreign aid transactions are unilateral and financially unreciprocated yet donors expect to benefit from them Previous research dealing with foreign aid has analyzed the main donor motives and interests in providing financial support This book offers an in depth analysis of the invisible political or social exchange taking place between recipient countries and donors when a grant agreement is signed Focusing on Egypt Jordan Palestine and Israel the main beneficiaries of Western foreign aid the book uses gift theories and theories of social exchange to show how international social bonds are shaped by foreign aid and in what ways recipient countries are obliged to return the gift they receive Foreign aid is a means of buying stability or democracy in the region but Beata Paragi is interested here to understand the actual feasibility of Western assistance Looking at the context of the Arab Spring the book examines how aid impacts on a recipient country's domestic political events such as war the quest for self determination the struggle against occupation and the fight for dignity An original contribution to Middle East Studies and International Relations the research presents an alternative interpretation of foreign aid and show how external funds interact with local developments and realities

Foreign Aid and Development Finn Tarp, 2000-08-17 Aid has worked in the past but can be made to work better in the future This book offers important new research and will appeal to those working in economics politics and development studies as well as to governmental and aid professionals *The Future of Foreign Aid* A. Sumner, R. Mallett, 2012-12-18 Sumner and Mallett review the literature on aid in light of shifts in the aid system and the increasing concentration of the

world's poor in middle income countries As a consequence they propose a series of practical policy relevant options for future development cooperation with the aim of provoking discussion and informing policy *Foreign Aid and Emerging Powers* Iain Watson, 2014-07-11 Current debates on emerging powers as foreign aid donors often fail to examine the myriad geopolitical, geoeconomic and geocultural tensions that influence policies of Official Development Assistance (ODA). This book advocates a regional geopolitical approach to explaining donor-donor relationships and provides a multidisciplinary critical assessment of the contemporary debates on emerging powers and foreign aid, bringing together economic and geopolitical approaches in the light of the 2015 completion of the Millennium Development Goals (MDGs). Moving away from established debates, assessing the advantages and disadvantages of foreign aid, this book challenges the current geopolitical assumptions of the emerging powers concerning issues such as south-south solidarity, shared development experience and multipolarity. It analyses how donor governments sell aid to recipients through enabling different cultural assumptions and soft power narratives of national identity and provides empirical evidence on agendas such as aid effectiveness, aid for trade, public-private partnerships and green growth aid. The book examines the role of and relationships between the leading traditional and emerging power Asian donors specifically and explores the different and contested perspectives and patterns of ODA policy through an alternative account of emerging power foreign aid to leading African and Asian recipients. This book provides a valuable resource for postgraduate students and practitioners across disciplines such as development economics and geopolitics of development, uniquely approaching the debate from the perspective of emerging powers and donors.

International Assistance and State-University Relations, **The Development of Aid** Gerard Van Bilzen, 2015-01-12 Aid to developing countries started well before World War II but was undertaken as an ad hoc activity or was delivered by private organizations. This changed after the War. In his Inaugural Address in 1949, the American President Harry Truman announced a bold new programme for making the benefits of our scientific advances and industrial progress available for the improvement and growth of underdeveloped nations: the so-called Point IV Plan. At that time it was thought that this support would be needed only for a limited number of years, comparable to the Marshall Plan assistance to Europe. But reality proved to be different: providing aid was a very long-term affair. Since the Fifties, the aid provided has changed at different occasions. In the beginning, aid concentrated on constructing infrastructure such as roads, railways, dams and harbours in order to promote industrial development. In the Sixties, aid to agriculture was added, and in the Seventies, aid to social sectors. Basic Needs was also provided. The Eighties brought worldwide debt problems. Major donors applied structural adjustment policies, some called this the lost decade or *cada perdida*. The Nineties saw the arrival of the first environmental considerations and asked for attention for the role of women and good governance. The form of aid changed from projects to programmes and budget support. Describing the different aid forms of the last 65 years and analysing why aid changed from time to time are the subjects of this book. Professionals and students in the area of international cooperation will benefit from studying this.

history as at this moment old concepts are reappearing or applied by new donors like China Is the pendulum really swinging back as Louis Emmerij at one point suggested *Japan's Foreign Aid* David Arase,2012-10-12 Filling a gap in the existing literature this book analyzes the distinctive features of Japan s development aid especially technical co operation in comparison with other donors aid Incorporating a wealth of research it discusses whether Japan is behind other leading donor countries in rethinking its aid policy and whether it lacks transparency sensitivity to recipient needs and a coherent and coordinated policy that targets poverty The volume assesses the nature and effectiveness of the administration of Japan s aid and explores the degree of involvement of private sector and non governmental organizations NGOs Including contributions from experts with direct experience with Japanese ODA the book provides a wide range of recipient and donor viewpoints and presents important policy recommendations The Millennium Development Goals: Challenges, Prospects and Opportunities Nana #N/A,2017-07-05 As the 15 year Millennium Development Goals approach their conclusion we can now measure their larger successes and failures in more than snapshot fashion and we can begin to consider how best to shape the international development agenda for the coming decades based on what we have learned But the performance and outlook for the MDGs can neither be reduced to the sum of its eight goals nor be divorced from international dynamics the hard interests of states and other actors and the global dynamics that impact on both For that reason this volume balances contextual analysis the role of formative and constraining forces the importance of normative considerations and illuminating case studies to deliver a study of the MDGs which has depth and nuance as well as breadth Poised between judging the recent performance and the future promise of the MDGs this book is substantial provocative and timely This book was published as a special issue of Third World Quarterly **The Oxford Companion to Politics of the World** Joel Krieger,2001-08-02 The world has seen dramatic changes since the publication of the first edition of The Oxford Companion to Politics of the World in 1993 In the post Cold War world globalization now offers wealth and opportunities on a broader scale as well as greater international harmony but threatens to reinforce the advantage gap between wealthy and poor regions and intensify environmental degradation Conflict and squalor expressed in brutal brushfire wars epidemics and chronic underdevelopment vie with equally dramatic accounts of growth and democracy associated with a liberal political order and the global diffusion of trade investment and communications Drawing on the breadth of the first edition this updated edition reflects the changing world with a reassessment of many of the core themes of the Companion and new articles on the people concepts and events that have shaped the world since 1993 The second edition includes biographies of Kofi Annan Tony Blair Bill Clinton and Gerhard Schr der articles on events such as the Rwandan Genocide and the war in Kosovo and coverage of international trade developments such as NAFTA and the World Trade Organization Eighty seven of the 672 articles in the Second Edition are completely new most others are thoroughly revised This edition also features a substantial new set of articles a dozen essays on critical issues written by influential figures Recognizing the importance of
