The Mystery Of Grotto:

The Mystery of Grotto Kate Jackson, 2004-06 What drives a man to destruction his birthdays fading into the night Where does a man go when the hands on the clock appear to have stopped What can a man do when the people he holds dearest do not know his name What happens when a man has no direction no consciousness no fear What if time and space collided If you want to know the answers to these thrilling and chilling questions then take the journey with Jon as he travels through Grotto the place where many mysteries unfold and the truth will be told *The World's Most Mysterious Places* Lionel Fanthorpe, Patricia Fanthorpe, 1999-05 A fascinating compilation of stories about lost lands weird locations and strange sites

The World's Most Mysterious Castles Patricia Fanthorpe, 2005-10-16 Castles are among the most mysterious buildings on earth Their grimly silent stones are signposts to a past filled with high adventure grim tragedies and glorious victories Ghosts hauntings and other paranormal phenomena are frequently reported from castles Do strange paranormal powers lurk among their ancient ruins *The World's Most Mysterious Castles* takes you on a journey through hidden chambers and subterranean tunnels of castles all over the world Their walls served the sinister needs of spies traitors and assassins Do the spirits of attackers and defenders who died in long forgotten sieges still linger where they fell Screams of unbearable pain and despair were muffled within their deepest darkest torture dungeons Do they echo there still

The biology of hypogean fishes Aldemaro Romero, 2013-06-29 Hypogean cave artesian fishes have fascinated researchers even before they were described in the scientific literature in 1842 Since then a number of scientists have used them to justify their own evolutionary ideas from

neo Lamarckism to neo Darwinism from neutral evolution to selectionist approaches Research in recent years has shown that these fishes are much more complex in their adaptations to the subterranean environment than previously believed there are those with features expected from living in total darkness complete blindness and depigmentation and poor in nutrients extremely low metabolic rates others differ very little if any from their epigeal surface ancestors in their morphology and physiology but not so in their behavior Some of them even live in nutrient rich environments Actually one of the most overlooked facets of these animals is that there are more species of hypogean fishes without troglomorphisms blindness depigmentation than with troglomorphic ones The study of these apparently unadapted fishes is providing new insights into our understanding of the evolution of phenotypic characters founding effect behavioral and physiological adaptations The 86 species of troglomorphic fishes described so far belong to 18 different families many of which would hardly fit the notion that they were preadapted to conquer the underground environment Further many troglomorphic species show very little genotypic differentiation when compared with their putative ancestors indicating that massive phenotype changes can be achieved via little genetic reorganization a reorganization that mostly affects regulatory genes These and many other topics are discussed in this volume containing 29 papers written by 41 authors from 9 countries Hopefully this volume will convince many other researchers that hypogean fishes represent a unique opportunity to study a concept in evolutionary biology that is only superficially understood convergent evolution

[The Mysterious Paths Of Versailles](#) Mark Lamont,2017-11-30 On August 10 1901 two English ladies decided to visit the Palace of Versailles for what was anticipated to be an ordinary day of sightseeing However on that fateful day a series of mysterious encounters occurred When the ladies visited Queen Marie Antoinette s Petit Trianon both were later convinced they had stepped back in time to the eighteenth century One of the ladies even believed she had witnessed the queen herself Were the ladies encounters a case of mistaken identity and confusion or did they unknowingly step back in time to walk along paths from a bygone era at Versailles
