Medvic, Matthew M. Schousen, Berwood A. Yost, 2022-12-09 Uses the 2020 elections in Pennsylvania as a case study to gauge American election nationalization and to explore little understood aspects of the phenomenon **The Transformation of American Politics** David M. Ricci, Professor David M Ricci, 1993-01-01 Washington think tanks such as the Brookings Institution the American Enterprise Institute and the Heritage Foundation have become so large and influential in recent years that they now constitute virtually a new branch of the political system In this engrossing and lively book David M Ricci brilliantly explores the parallel and convergent social economic and political trends within America that have transformed government in Washington and led to the development and prestige of these public policy research centers Ricci argues that since the late 1960s Americans have lost sight of the familiar guidelines that used to help them assess issues and have become more hospitable to think tank research and advice He examines the flood of policy relevant information that has resulted from the growth of expertise and the advent of big government the confusion over national goals that comes from the decline of the Protestant ethic and the empowerment of minorities the growing influence of television and its focus on instant testimony from experts political changes such as the decline of parties the move to an open Congress and the growth of an independent presidency the pervasive power of modern marketing and much more According to Ricci policy ideas generated by think tank research and commentary are helpful in providing greater objectivity and political insight not only because of their general reliability but also because in their ideological variety think tanks generate a substantial range of policy proposals giving voice to a healthy factional pluralism and facilitating a constant testing of ideas In today s dissonant politics Ricci concludes think tanks contribute some order and occasionally wisdom in the ongoing battle in Washington over political ideas **The Increasingly United States** Daniel J. Hopkins, 2018-05-30 In a campaign for state or local office these days you re as likely today to hear accusations that an opponent advanced Obamacare or supported Donald Trump as you are to hear about issues affecting the state or local community This is because American political behavior has become substantially more nationalized American voters are far more engaged with and knowledgeable about what s happening in Washington DC than in similar messages whether they are in the South the Northeast or the Midwest Gone are the days when all politics was local With **The Increasingly United States** Daniel J Hopkins explores this trend and its implications for the American political system The change is significant in part because it works against a key

rationale of America's federalist system which was built on the assumption that citizens would be more strongly attached to their states and localities. It also has profound implications for how voters are represented. If voters are well informed about state politics, for example, the governor has an incentive to deliver what voters or at least a pivotal segment of them want. But if voters are likely to back the same party in gubernatorial as in presidential elections, irrespective of the governor's actions in office, governors may instead come to see their ambitions as tethered more closely to their status in the national party.

The Nationalization of American Political Parties, 1880-1896 Daniel Klinghard, 2010-04-19 This book investigates the creation of the first truly nationalized party organizations in the United States in the late nineteenth century, an innovation that reversed the parties' traditional privileging of state and local interests in nominating campaigns and the conduct of national campaigns. Between 1880 and 1896, party elites crafted a defense of these national organizations that charted the theoretical parameters of American party development into the twentieth century. With empowered national committees and a new understanding of the parties' role in the political system, national party leaders dominated American politics in new ways, renewed the parties' legitimacy in an increasingly pluralistic and nationalized political environment, and thus maintained their relevance throughout the twentieth century. The new organizations particularly served the interests of presidents and presidential candidates, and the little-studied presidencies of the late nineteenth century demonstrate the first stirrings of modern presidential party leadership.
