Brennan, 1961 Based on a special issue fall 1960 of *Daedalus Bibliography* p 457 470 National Security and Arms Control in the Age of Biotechnology Daniel M. Gerstein, 2013-05-23 This book accessibly and expertly details the history and implications of the BWC the Biological and Toxin Weapons Convention a controversial arms control agreement drafted in the 1970 s meant to supplement the Geneva protocol for warfare from decades earlier That treaty banned the use of biological weapons in modern warfare but failed to ban their development transport or trafficking holes the BWC aimed to fill but are still contested to this day Daniel M Gerstein a Deputy Under Secretary in the Department of Homeland Security and Adjunct Professor at American University traces the origins of the treaty and its many complications past and present while prescribing a way for the world s leaders to move forward with regards to what Gerstein sees will be and already is the most important arms control treaty of the 21st Century This will only become more pronounced as exponential advances in biotechnology continue to occur The strength and enforcement of the treaty are at a crossroads and it is important for both professionals and students of the political military and international affairs to know exactly what a failure to honor improve and uphold the BWC would mean for international security *National Security Bureaucracy for Arms Control, Counterproliferation, and Nonproliferation* United States. Samuels, 2005-12-21 Since the tragic events of September 11 2001 the topic of national security has never been of broader concern to all Americans Rarely have we felt as threatened as we do in our current security environment With over 750 entries the Encyclopedia of United States National Security is the first single concise reference source to provide accurate and informative answers to the many challenging questions of how why when and where national security has evolved In addition to presenting historical facts and analyses
