The Neutron Bomb Controversy A Study In Alliance Politics:

The Neutron Bomb Controversy Sherri L. Wasserman, 1983 This book examines what the neutron bomb controversy reveals about American approaches to the modernization of theater nuclear weapons and to nuclear decision making within NATO

The German Problem Transformed Thomas Banchoff, 2010-05-06 Does the new more powerful Germany pose a threat to its neighbors Does the new German Problem resemble the old The German Problem Transformed addresses these questions fifty years after the founding of the Federal Republic and ten years after the fall of the Berlin Wall Many observers have underscored the reemergence of Germany as Europe's central power After four decades of division they contend Germany is once again fully sovereign without the strictures of bipolarity its leaders are free to define and pursue national interests in East and West From this perspective the reunified Germany faces challenges not unlike those of its unified predecessor a century earlier The German Problem Transformed rejects this formulation Thomas Banchoff acknowledges post reunification challenges but argues that postwar changes not prewar analogies best illuminate them The book explains the transformation of German foreign policy through a structured analysis of four critical postwar junctures the cold war of the 1950s the détente of the 1960s and 1970s the new cold war of the early 1980s and the post cold war 1990s Each chapter examines the interaction of four factors international structure and institutions foreign policy ideas and domestic politics in driving the direction of German foreign policy at a key turning point This book will be of interest to scholars and students of German history German politics and European international relations as well as policymakers and the interested public Thomas Banchoff is Assistant Professor of Government Georgetown University

Rethinking the Nuclear Weapons Dilemma in Europe P. Terrence Hopmann, Dr. Frank Barnaby, 1988-06-18

Euromissiles Susan Colbourn, 2022-11-15 In *Euromissiles* Susan Colbourn tells the story of the height of nuclear crisis and the remarkable waning of the fear that gripped the globe In the Cold War conflict that pitted nuclear superpowers against one another Europe was the principal battleground Washington and Moscow had troops on the ground and missiles in the fields of their respective allies the NATO nations and the states of the Warsaw Pact *Euromissiles* intermediate range nuclear weapons to be used exclusively in the regional theater of war highlighted how the peoples of Europe were dangerously placed between hammer and anvil That made European leaders uncomfortable and pushed fearful masses into the streets demanding peace in their time At the center of the story is NATO Colbourn highlights the weakness of the alliance seen by many as the most effective bulwark against Soviet aggression Divided among themselves and uncertain about the depth of US support the member states were riven by the missile issue This strategic crisis was as much as any summit meeting between US president Ronald Reagan and Soviet general secretary Mikhail Gorbachev the hinge on which the Cold War turned *Euromissiles* is a history of diplomacy and alliances social movements and strategy nuclear weapons and nagging fears and politics To tell that history Colbourn takes a long view of the strategic crisis from the emerging dilemmas of allied defense in the early 1950s through the

aftermath of the INF Treaty thirty five years later The result is a dramatic and sweeping tale that changes the way we think about the Cold War and its culmination *Tactical Nuclear Weapons and NATO* Thomas M. Nichols, Douglas T.

Stuart, Jeffrey D. McCausland, Army War College (U.S.). Strategic Studies Institute, 2012 is understudied both inside and outside of government Tactical weapons although less awesome than their strategic siblings carry significant security and political risks and they have not received the attention that is commensurate to their importance Second it is clear that whatever the future of these arms the status quo is unacceptable It is past the time for NATO to make more resolute decisions find a coherent strategy and formulate more definite plans about its nuclear status Consequently decisions about the role of nuclear weapons within the Alliance and the associated supporting analysis are fundamental to the future identity of NATO At the Lisbon Summit in Portugal in November 2010 the Alliance agreed to conduct the Deterrence and Defense Posture Review DDPR This effort is designed to answer these difficult questions prior to the upcoming NATO Summit in May 2012

Makers of Modern Strategy from Machiavelli to the Nuclear Age Peter Paret, Gordon A. Craig, Felix Gilbert, 2010-10-01 Authoritative and convincing New York Times Book Review The classic reference on the theory and practice of war The essays in this volume analyze war its strategic characteristics and its political and social functions over the past five centuries The diversity of its themes and the broad perspectives applied to them make the book a work of general history as much as a history of the theory and practice of war from the Renaissance to the present *Makers of Modern Strategy from Machiavelli to the Nuclear Age* takes the first part of its title from an earlier collection of essays that became a classic of historical scholarship Three essays are repinted from the earlier book while four others have been extensively revised The rest twenty two essays are new The subjects addressed range from major theorists and political and military leaders to impersonal forces Machiavelli Clausewitz and Marx and Engels are discussed as are Napoleon Churchill and Mao Other essays trace the interaction of theory and experience over generations the evolution of American strategy for instance or the emergence of revolutionary war in the modern world Still others analyze the strategy of particular conflicts the First and Second World Wars or the relationship between technology policy and war in the nuclear age Whatever its theme each essay places the specifics of military thought and action in their political social and economic environment Together the contributors have produced a book that reinterprets and illuminates war one of the most powerful forces in history and one that cannot be controlled in the future without an understanding of its past

Deterrence Austin G. Long, 2008 This book examines six decades of RAND Corporation research on deterrence for lessons relevant to the current and future strategic environments

Tactical Nuclear Weapons and NATO, 2012 NATO has been a nuclear alliance since its inception Nuclear weapons have served the dual purpose of being part of NATO military planning as well as being central to the Alliance's deterrence strategy For over 4 decades NATO allies sought to find conventional and nuclear forces doctrines and agreed strategies that linked the defense of Europe to that of the United States Still in light of the evolving security situation

the Alliance must now consider the role and future of tactical or non strategic nuclear weapons NSNWs Two clear conclusions emerge from this analysis First in the more than 2 decades since the end of the Cold War the problem itself that is the question of what to do with weapons designed in a previous century for the possibility of a World War III against a military alliance that no longer exists is understudied both inside and outside of government Tactical weapons although less awesome than their strategic siblings carry significant security and political risks and they have not received the attention that is commensurate to their importance Second it is clear that whatever the future of these arms the status quo is unacceptable It is past the time for NATO to make more resolute decisions find a coherent strategy and formulate more definite plans about its nuclear status Consequently decisions about the role of nuclear weapons within the Alliance and the associated supporting analysis are fundamental to the future identity of NATO At the Lisbon Summit in Portugal in November 2010 the Alliance agreed to conduct the Deterrence and Defense Posture Review DDPR This effort is designed to answer these difficult questions prior to the upcoming NATO Summit in May 2012 The United States and its closest allies must define future threats and in doing so clarify NATO s identity purpose and corresponding force requirements So far NATO remains a nuclear alliance but it is increasingly hard to define what that means Publisher s website [Coming of Age](#) Helga Haftendorn,2006 Covering German foreign policy since the end of World War II this book explores Germany s recovery from wartime defeat and destruction Through a chronological series of case studies it offers a document based account of 60 years of German policymaking [The Cold War](#) Spencer C. Tucker,2020-10-27 This sweeping reference work covers every aspect of the Cold War from its ignition in the ashes of World War II through the Berlin Wall and the Cuban Missile Crisis to the collapse of the Soviet Union in 1991 The Cold War superpower face off between the Soviet Union and the United States dominated international affairs in the second half of the 20th century and still reverberates around the world today This comprehensive and insightful multivolume set provides authoritative entries on all aspects of this world changing event including wars new military technologies diplomatic initiatives espionage activities important individuals and organizations economic developments societal and cultural events and more This expansive coverage provides readers with the necessary context to understand the many facets of this complex conflict The work begins with a preface and introduction and then offers illuminating introductory essays on the origins and course of the Cold War which are followed by some 1 500 entries on key individuals wars battles weapons systems diplomacy politics economics and art and culture Each entry has cross references and a list of books for further reading The text includes more than 100 key primary source documents a detailed chronology a glossary and a selective bibliography Numerous illustrations and maps are inset throughout to provide additional context to the material [The new Europe : challenges for U.S. policy](#) ,1991 [Winning and Losing the Nuclear Peace](#) Michael Krepon,2021-10-19 The definitive guide to the history of nuclear arms control by a wise eavesdropper and masterful storyteller Michael Krepon The greatest unacknowledged diplomatic achievement of the Cold War was the absence

of mushroom clouds Deterrence alone was too dangerous to succeed it needed arms control to prevent nuclear warfare So U S and Soviet leaders ventured into the unknown to devise guardrails for nuclear arms control and to treat the Bomb differently than other weapons Against the odds they succeeded Nuclear weapons have not been used in warfare for three quarters of a century This book is the first in depth history of how the nuclear peace was won by complementing deterrence with reassurance and then jeopardized by discarding arms control after the Cold War ended Winning and Losing the Nuclear Peace tells a remarkable story of high wire acts of diplomacy close calls dogged persistence and extraordinary success Michael Krepon brings to life the pitched battles between arms controllers and advocates of nuclear deterrence the ironic twists and unexpected outcomes from Truman to Trump What began with a ban on atmospheric testing and a nonproliferation treaty reached its apogee with treaties that mandated deep cuts and corralled loose nukes after the Soviet Union imploded After the Cold War ended much of this diplomatic accomplishment was cast aside in favor of freedom of action The nuclear peace is now imperiled by no less than four nuclear armed rivalries Arms control needs to be revived and reimagined for Russia and China to prevent nuclear warfare New guardrails have to be erected Winning and Losing the Nuclear Peace is an engaging account of how the practice of arms control was built from scratch how it was torn down and how it can be rebuilt

Threat Multiplier Sherri Goodman, 2024-08-27 *Threat Multiplier* takes us onto the battlefield and inside the Pentagon to show how the US military is confronting the biggest security risk in global history climate change More than thirty years ago when Sherri Goodman became the Pentagon's first Chief Environmental Officer no one would have imagined this role for our armed forces Indeed for much of the twentieth century the Department of Defense DOD was better known for containing the Soviet nuclear threat than protecting the environment And yet today the military has moved from an environmental laggard to a clean energy and climate leader recognizing that a warming world exacerbates every threat from hurricanes and forest fires to competition for increasingly scarce food and water to terrorism and power plays by Russia and China The Pentagon now considers climate in war games disaster relief planning international diplomacy and even the design of its own bases What was the key to this dramatic change in military thinking What keeps today's generals and admirals up at night How can we safeguard our national defense and our planet No one is better poised to answer these questions than Sherri Goodman who was at the vanguard of environmental leadership among our armed forces and civilian representatives In *Threat Multiplier* she tells the inside story of the military's fight for global security a tale that is as hopeful as it is harrowing

The Nuclear Confrontation in Europe Jeffrey H. Boutwell, Paul Doty, Gregory F. Treverton, 2020-11-19 Originally published in 1985 this book explores the nuclear confrontation between East and West in Europe where we stand how we got there and what the future may hold Its concluding chapter outlines the prospects for nuclear arms control in Europe and it frames the debate over NATO strategy and the role of nuclear weapons in the years ahead Can NATO reduce its reliance on nuclear weapons Can it cope with the issues at all The chapters on NATO theatre nuclear forces and doctrine

provide a rich background to current policy issues The public debate over NATO's 1979 decision to deploy new American cruise and Pershing nuclear missiles in Europe was hardly unprecedented in NATO's history similar controversy surrounded NATO deliberations in the late 1950s and early 1960s That debate however subsided in the mid 1960s the nuclear question in Europe was relegated to the wilderness though efforts largely unavailing continued within official circles to define more clearly the role of nuclear weapons in NATO's defense Against this backdrop the nuclear debate emerged again in the 1970s This title unravels the military and political considerations at play in that debate and maps the European politics surrounding it Today it can be read in its historical context **Unraveling the Gray Area Problem** Luke Griffith,2023-12-15 In

Unraveling the Gray Area Problem Luke Griffith examines the US role in why the Intermediate Range Nuclear Forces INF Treaty took almost a decade to negotiate and then failed in just thirty years The INF Treaty enhanced Western security by prohibiting US and Russian ground based missiles with maximum ranges of 500 to 5 500 kilometers Significantly it eliminated hundreds of Soviet SS 20 missiles which could annihilate targets throughout Eurasia in minutes Through close scrutiny of US theater nuclear policy from 1977 to 1987 Griffith describes the Carter administration's masterminding of the dual track decision of December 1979 the North Atlantic Treaty Organization NATO initiative that led to the INF Treaty The Reagan administration in turn overcame bureaucratic infighting Soviet intransigence and political obstacles at home and abroad to achieve a satisfactory outcome in the INF negotiations Disagreements between the US and Russia undermined the INF Treaty and led to its dissolution in 2019 Meanwhile the US is developing a new generation of ground based INF type missiles that will have an operational value on the battlefield Griffith urges policymakers to consider the utility of INF type missiles in new arms control negotiations Understanding the scope and consistency of US arms control policy across the Carter and Reagan administrations offers important lessons for policymakers in the twenty first century **North Atlantic**
