Slavery A Problem In American Institutio:

Slavery Stanley M. Elkins, 2013-08-16 This third edition of Stanley M. Elkins's classic study offers two new chapters by the author. The first, *Slavery and Ideology*, considers the discussion and criticism occasioned by this controversial work. Elkins amplifies his original purpose in writing the book and takes into consideration the substantial body of critical commentary. He also attempts a prediction on the course of future research and discussion. **Slavery: a Problem in American Institutional and Intellectual Life. 2nd Ed** Stanley Maurice ELKINS, 1968

The Problem of Slavery in Western Culture David Brion Davis, 1988-10-20 Winner of several national awards including the 1967 Pulitzer Prize, this classic study by David Brion Davis has given new direction to the historical and sociological research of society's attitude towards slavery. Davis depicts the various ways different societies have responded to the intrinsic contradictions of slavery from antiquity to the early 1770s in order to establish the uniqueness of the abolitionists' response. While slavery has always caused considerable social and psychological tension, Western culture has associated it with certain religious and philosophical doctrines that gave it the highest sanction. The contradiction of slavery grew more profound when it became closely linked with American colonization, which had as its basic foundation the desire and opportunity to create a more perfect society. Davis provides a comparative analysis of slave systems in the Old World, a discussion of the early attitudes towards American slavery, and a detailed exploration of the early protests against Negro bondage as well as the religious, literary, and philosophical developments that contributed to both sides in the controversies of the late eighteenth century. This exemplary introduction to the history of slavery in Western culture presents the traditions in thought and value that gave rise to the attitudes of both abolitionists and defenders of slavery in the late eighteenth century as well as the nineteenth century.

The Oxford Handbook of the African American Slave Narrative John Ernest, 2014-02-28 Given the rise of new interdisciplinary and methodological approaches to African American and Black Atlantic studies, *The Oxford Handbook of the African American Slave Narrative* will offer a fresh, wide-ranging assessment of this major American literary genre. The volume will begin with articles that consider the fundamental concerns of gender, sexuality, community, and the Christian ethos of suffering and redemption that are central to any understanding of slave narratives. The chapters that follow will interrogate the various agendas behind the production of both pre and post Emancipation narratives and take up the various interpretive problems they pose. Strategic omissions and veiled gestures were often necessary in these life accounts as they revealed disturbing, too painful truths far beyond what white audiences were prepared to hear. While touching upon the familiar canonical autobiographies of Frederick Douglass and Harriet Jacobs, the Handbook will pay more attention to the under-studied narratives of Josiah Henson, Sojourner Truth, William Grimes, Henry Box Brown, and other often overlooked accounts. In addition to the literary autobiographies of bondage, the volume will anatomize the powerful WPA recordings of interviews with former slaves during the late 1930s. With essays on the genre's imaginative afterlife, its final essays will chart the emergence and development of

neoslave narratives most notably in Styron's *The Confessions of Nat Turner* Toni Morrison's *Beloved* and Octavia Butler's provocative science fiction novel *Kindred* In short the Handbook will provide a long overdue assessment of the state of the genre and the vital scholarship that continues to grow around it work that is offering some of the most provocative analysis emerging out of the literary studies discipline as a whole [Making Race in the Courtroom](#) Kenneth R. Aslakson, 2014-09-26 No American city's history better illustrates both the possibilities for alternative racial models and the role of the law in shaping racial identity than New Orleans Louisiana which prior to the Civil War was home to America's most privileged community of people of African descent In the eyes of the law New Orleans's free people of color did not belong to the same race as enslaved Africans and African Americans While slaves were negroes free people of color were gens de couleur libre creoles of color or simply creoles New Orleans's creoles of color remained legally and culturally distinct from negroes throughout most of the nineteenth century until state mandated segregation lumped together descendants of slaves with descendants of free people of color Much of the recent scholarship on New Orleans examines what race relations in the antebellum period looked as well as why antebellum Louisiana's gens de couleur enjoyed rights and privileges denied to free blacks throughout most of the United States This book however is less concerned with the what and why questions than with how people of color acting within institutions of power shaped those institutions in ways beyond their control As its title suggests *Making Race in the Courtroom* argues that race is best understood not as a category but as a process It seeks to demonstrate the role of free people of African descent interacting within the courts in this process

Human Rights Darren O'Byrne,2014-06-06 Human Rights An Introduction is an important text that provides a comprehensive overview of human rights and related issues from a social science perspective First this book does more than discuss theory it uses case studies and personal testimonies in the debate Human rights as an area of academic interest cannot be easily divorced from human rights struggles and the reality of contemporary conditions Second the book is aimed at what is an emerging and growing cross disciplinary field of study Human rights issues are increasingly coming to the fore in a number of academic debates Whereas the study of human rights has traditionally been included in departments of law international relations and philosophy a number of courses are now being set up in departments of sociology and anthropology Consequently there is an increasing need to bring these disparate approaches together

The Mantra of Efficiency Jennifer Karns Alexander,2008-03-03 Winner 2010 Edelstein Prize Society for the History of Technology Efficiency associated with individual discipline superior management and increased profits or productivity often counts as one of the highest virtues in Western culture But what does it mean exactly to be efficient How did this concept evolve from a means for evaluating simple machines to the mantra of progress and a prerequisite for success In this provocative and ambitious study Jennifer Karns Alexander explores the growing power of efficiency in the post industrial West Examining the ways the concept has appeared in modern history from a benign measure of the thermal economy of a machine to its widespread application to personal behaviors like chewing habits spending choices and shop floor movements to its controversial use as a measure of the business success of American slavery she argues that beneath efficiency s seemingly endless variety lies a common theme the pursuit of mastery through techniques of surveillance discipline and control Six historical case studies two from Britain one

each from France and Germany and two from the United States illustrate the concept's fascinating development and provide context for the meanings of and uses for efficiency today and in the future **The Rights of Nature** Roderick Frazier Nash, 1989-01-17 Charting the history of contemporary philosophical and religious beliefs regarding nature Roderick Nash focuses primarily on changing attitudes toward nature in the United States His work is the first comprehensive history of the concept that nature has rights and that American liberalism has in effect been extended to the nonhuman world A splendid book Roderick Nash has written another classic This exploration of a new dimension in environmental ethics is both illuminating and overdue Stewart Udall His account makes history come alive Sierra So smoothly written that one almost does not notice the breadth of scholarship that went into this original and important work of environmental history Philip Shabecoff New York Times Book Review Clarifying and challenging this is an essential text for deep ecologists and ecophilosophers Stephanie Mills Utne Reader **Solving Education's Problems Effectively** Gerard Giordano, 2009-03-16 Rich in practical information about the history of American education Solving Education's Problems Effectively encourages readers to analyze prioritize and synthesize historical information by applying it to current situations Using more than thirty case studies Giordano suggests solutions to issues that plague educators across the nation from textbook quality to gender race and religion biases The case studies are accompanied by activities to prompt educators to higher levels of thinking about the problems they face **Handbook Global History of Work** Karin Hofmeester, Marcel van der Linden, 2017-11-20 Coffee from East Africa wine from California chocolate from the Ivory Coast all those every day products are based on labour often produced under appalling conditions but always involving the combination of various work processes we are often not aware of What is the day to day reality for workers in various parts of the world and how was it in the past How do they work today and how did they work in the past These and many other questions comprise the field of the global history of work a young discipline that is introduced with this handbook In 8 thematic chapters this book discusses these aspects of work in a global and long term perspective paying attention to several kinds of work Convict labour slave and wage labour labour migration and workers of the textile industry but also workers organisation strikes and motivations for work are part of this first handbook of global labour history written by the most renowned scholars of the profession ***Confessional Crises and Cultural Politics in Twentieth-Century America*** Dave Tell, 2012-09-25 Confessional Crises and Cultural Politics in Twentieth Century America revolutionizes how we think about confession and its ubiquitous place in American culture It argues that the sheer act of labeling a text a confession has become one of the most powerful and most overlooked forms of intervening in American cultural politics In the twentieth century alone the genre of confession has profoundly shaped and been shaped by six of America's most intractable cultural issues sexuality class race violence religion and democracy **Making Imperial Mentalities** J. Mangan, 2012-05-04 This book discusses the way in which those born into the British empire were persuaded to accept it often with enthusiasm The study compares the perceptions of people at home in the dominions and in the

colonies Across the diversity of imperial territories it explores themes such as the diverse nature of political socialisation the various agents and agencies of persuasion reaction to the experience of dominance by dominant and dominated the paradoxical impact of the missionary and the subversive role of some women It also considers the significant issues of colonial adaptation resistance and rejection and the post imperial consequences of imperialism *The Debate Over Slavery* David F. Ericson, 2000-12 Frederick Douglass and George Fitzhugh disagreed on virtually every major issue of the day On slavery women's rights and the preservation of the Union their opinions were diametrically opposed Where Douglass thundered against the evils of slavery Fitzhugh counted its many alleged blessings in ways that would make modern readers cringe What then could the leading abolitionist of the day and the most prominent southern proslavery intellectual possibly have in common According to David F Ericson the answer is as surprising as it is simple liberalism In *The Debate Over Slavery* David F Ericson makes the controversial argument that despite their many ostensible differences most Northern abolitionists and Southern defenders of slavery shared many common commitments to liberal principles to the nation to the nation's special mission in history and to secular progress He analyzes side by side pro and antislavery thinkers such as Lydia Marie Child Frederick Douglass Wendell Phillips Thomas R Dew and James Fitzhugh to demonstrate the links between their very different ideas and to show how operating from liberal principles they came to such radically different conclusions His raises disturbing questions about liberalism that historians philosophers and political scientists cannot afford to ignore

Slave Law in the American South Mark V. Tushnet, 2003 Tying together legal historical social political and literary strands to show how the law itself was implicated in the persistence of slavery this work sheds new light on slavery and Southern history as it probes the conscience of a troubled jurist incapable of fully transcending his times **Slave Culture** Spencer R.
