Elementary Educations Peace Corps (U.S.), 1975 *AF Press Clips* , 1971 **Conflict and Harmony in Education in Tropical Africa** Godfrey N. Brown, Mervyn Hiskett, 2021-12-19 Originally published in 1975 this book was something of a pioneering study It examines the three main traditions of African educational development indigenous Islamic and Western and the resulting harmonies and conflicts that arise from these traditions Its contributors are all specialists writing about their own particular area of interest covering many countries of tropical Africa They include a number of well known African scholars as well as some comparatively new names in the field of African Studies at the time A feature of the book is the attention that it gives to the education of women an aspect of nation building that had often been rather neglected This study is an inter disciplinary work calling into contribution History Sociology Anthropology Law Linguistics and Medicine as well as Education It seeks to show how complex the educational situation is in Africa and how this complexity needs to be appreciated as a background to educational planning Nobody who has read this volume will be inclined to dismiss educational reform in Africa as a relatively simple matter a point of view too frequently implied by those who have not studied the subject in depth Off with the old on with the new cannot be so easily implemented as critics within and without the continent sometimes seem to think More constructively however this volume provides many useful insights into ways in which social tension may be reduced and harmony promoted in and through education Although it is likely to be of most immediate value to those who are concerned with African education and its administration especially in teacher education the book constitutes a significant contribution to understanding problems of development Resources in Education , 1985

Long, 1995-09-26 Focusing on the role of the individual in the periphery of the Empire this volume illuminates John Galbraith's thesis that events on the periphery of the British

Empire led the man on the spot to expand the area of British control The man on the spot was a factor in imperial expansion as much as or sometimes more than imperial or company policy which often opposed control of further territory because of the expense The Empire continued to expand in spite of official policy because of individuals and events on the periphery Along these lines this contributed volume provides studies of the periphery of Empire whether in Africa Canada Malaya China or India The volume opens with three chapters dealing with aspects of the overarching subject of imperialism and imperial expansion The opening section is then followed by sections on Africa Canada India and Southeast and East Asia In the concluding bibliographical essay the man on the spot thesis is placed in context within the historiography of British Empire Studies
