Indigenous Agricultural Revolution Paul Richards,2023-07-26 Originally published in 1985 this book argues forcefully and practically for new relationship between

science and the small farmer It advocates scientific research seeking out changes which are already taking place within the smallholder farming sector and building on local initiatives Drawing on his experience of West Africa the author demonstrates that many of the most successful innovations in food crop production during the 20th century have indigenous roots and that there should therefore be less emphasis on teaching farmers how to farm and more emphasis on how to foster and support local adaptation and inventiveness This book will be of interest to students of agriculture environmental studies and rural development as well as those working with relief and development agencies *Irrigation Technology Transfer in Support of Food Security* Food and Agriculture Organization of the United Nations,1997-01-01 Smallholder Irrigation Technology Melvyn Kay,2001-01-01 This report is a view of irrigation technologies for smallholders in the context of improving rural livelihoods especially in regard to the prospects for sub Saharan Africa The role of traditional technologies is evaluated and modern water distribution technologies such as sprinkler and trickle irrigation are reviewed A broad classification has been made based on climate and the traditional agricultural background of the local people which links technology options to specific places to agricultural regions and to countries *Agricultural Sustainability* Saroja Raman,2024-11-01 Take a balanced look at ways to ensure food security and to work to erase hunger around the world Agriculture is the most aggressively managed ecosystem *Agricultural Sustainability Principles Processes and Prospects* provides a comprehensive examination of all facets of agricultural sustainability beginning with the history of the evolution of the concept to the present Challenges to sustainability are clearly presented along with practical strategies to counter prospective problems This vital resource considers options for the future as well as reviewing past approaches for their value in today s world When one considers that the alternative to agricultural sustainability is the collapse of the world s food systems it is understood that compromise is impossible *Agricultural Sustainability* takes a holistic approach to the issues that are involved in making agriculture ecologically sound economically viable and socially responsible around the world The book is divided into three parts Part One clarifies the concept of agricultural sustainability bringing a rational and balanced view of the core elements Part Two discusses ways to promote sustainability in the world including practical scientific and technological processes for improving yields while ensuring food security for future generations Part Three peers into future decades reviewing the vision documents of international agencies their perceptions and expectations for the years ahead and present dysfunctional aspects in the current food system The book is extensively referenced and includes figures and charts to clearly explain data The book examines the historic evolution of the concept of agricultural sustainability the combined effects of a multiplicity of agricultural systems concepts for validating the sustainability of a production system the role of natural capital in production the role of science and technology in sustainable use managing land water biodiversity and energy quantitative approaches to measuring agricultural sustainability the current status of agricultureand predictions for its growth in the coming decades case studies of agricultural growth from India and China problemsand possibilitiesof

creating a hunger free world by the end of this century Agricultural Sustainability is crucial enlightening reading for field workers in NGOs and agricultural extensions personnel in local national and international developmental organizations and educators and students of sustainable agricultural production food security rural development environmental science and the conservation of natural resources

Wasting the Rain (Routledge Revivals) William M. Adams Adams,2014-05-01 First published in 1992 this title offers an experienced and constructive evaluation of the ways in which water resources have been developed in Africa Adams argues that the best hope of productive development lies in working and engaging with local people and using local knowledge of the environment effectively Modern large scale developments that have largely been ineffective are examined and emphasis is placed on the importance of using the skills and concerns of those affected such as small farmers to develop ingenious water projects an approach that can be applied worldwide This is an interesting and relevant title which will be of particular value to those with an interest in the developments in water resource conservation over the past two decades

Towards Sustainable Food Production in Africa Morris Fanadzo, Nothando Dunjana, Hupenyu Allan Mupambwa, Ernest Dube, 2023-07-10 This edited book is focused on Sustainable Development Goal 2 It offers a comprehensive and topical collection of practices technologies and innovations in the field of sustainable food production and security under a changing climate It is a one stop handbook for farmers researchers extensionists policy makers and other stakeholders seeking to identify and disseminate best fit technologies for local and regional landscapes It offers an understanding of the challenges risks and uncertainties as well as opportunities to foster productive and sustainable food production Smallholder farming and agriculture in general is facing a serious threat from climate change that has resulted in erratic and unpredictable rainfall and increased temperatures among other abiotic stresses These climate change induced pressures have reduced productivity mainly among the smallholder farmers who are critical in driving the attainment of sustainable development goals like SDG 2 12 and 13 The objective of the book is to document effective and practicable practices and technologies that can be adopted by smallholder African farmers as mitigation measures against the effects of climate change This book is of interest to researchers agricultural scientists climate change scientists capacity builders and policymakers

Changing Rural Systems In Oman Roderic W Dutton, 2013-01-11 First Published in 1999 Oman in the decades prior to the 1960s was largely isolated from the rest of the world and its changing economies and societies With a limited education little international links small health systems and government under the then Sultan Said bin Taimur Rural communities in northern Oman had very little contact with the Sultan s government which was based in the southern province of Dhofar In a world in which people in most countries including the Gulf States gained at least some benefit from modern education and health services Omani villagers and pastoralists had recourse only to Koranic schools and traditional healers On the other hand however they retained full responsibility for the management of their rural resources on which they depended for their livelihoods and for life itself and had evolved effective communal systems for their development and

conservation These were exemplified by regulations governing the protection of trees and by the work of the committees which controlled the traditional falaj water supply network People worked interdependently responding to the contributions made by other members of the rural communities in a system of mutual self reliance They also lived in harmony with their environment in a manner which time had proven to be truly sustainable This volume looks at the changes that occurred after Sultan Qaboos came to power in 1970
