Poker Tournament Strategies Sylvester Suzuki, 1998 Poker tournaments are very different from conventional poker games for many reasons The most important ones are The chips change value because most tournaments are percentage payback Rebuys are available early on And many players over adjust their playing strategy because they are aware that after the rebuy period you cannot purchase more chips Consequently you should make many strategy changes Sometimes you should be trying to accumulate chips sometimes you should be on the attack and sometimes you should just survive Even though Sylvester Suzuki is a pseudonym he is a real person who understands the underlying theories that govern tournament play This text should prove helpful to anyone who is new to this form of poker

Inside the Poker Mind John Feeney (Ph. D.), 2000 Poker is a game of many skills and to become an expert poker player you need to master them all They include selecting hands playing position projecting the proper image and reading hands However many players who have mastered most of these skills still do poorly at best they are small winners at lower limits When they step up in limit and challenge the better players they almost always fail You see having the skills is one thing putting them all together is another As the text will show winning poker requires a lot of thinking as well as a thorough and systematic approach to the game and that is what this book is about
