## **Smoking A Behavioral Analysis Pergamon General Psychology Series:**

**Smoking** Bernard Mausner, Ellen S. Platt, 2013-10-22 Smoking A Behavioral Analysis is written by two experimental social psychologists. It focuses on the psychological aspect of smoking and the effects that role playing has on it. Comprised of two parts, the first part deals with the reasons that people begin and continue smoking, the environmental and intra-individual support for smoking, the relationship of these supports and the values and expectations concerning the effects of smoking. The second part details an experiment that uses role playing to induce a change in smoking. It includes the background, design, procedure, and the implications of the experiment in the research and control of smoking. The book is a valuable reference for psychologists, medical doctors, experts, and lay people interested in smoking, smoking cessation, and the relationship of behavior to this habit.

Organized into 12 chapters, this book begins with an overview of the development and patterning of human behavior. This text then examines various research conducted in schools concerning behavioral approaches to educational problems. **Ecological Assessment of Child Problem Behavior: A Clinical Package for Home, School, and Institutional Settings** Robert G. Wahler, Alvin E. House, Edward E. Stambaugh, 2013-10-22 Ecological Assessment of Child Problem Behavior: A Clinical Package for Home, School, and Institutional Settings discusses sampling methods to assess the problem child's behavioral interactions in the environment of the real world. The book focuses on the following facets of ecological assessment: 1. format of interview for the stage during the observational sampling procedures; 2. use of an observational procedure by adult members of the child's natural community; and 3. the employment of a standardized category coding system. In general, the book deals with devising a standardized category code that will be used in direct observations of a clinical nature. The book shows that investigators of various theoretical merits attempt to construct category systems to systematize coding behavior such as those of Heyns and Lippitt (1954), of Baker and Wright (1955), or of McGrew (1972). The authors enumerate the category codes to describe different aspects of children's social environments and their common behaviors that result from these settings.
