Kohli, Nicholas C. Burbules, 2011-12-29 Feminist theory has come a long way from its nascent beginnings no longer can it be classified as liberal socialist or radical It has shaped and evolved to take on multiple meanings and forms each distinct in its own perspective and theory In Feminisms and Educational Research the authors explore the various forms of feminisms tracing their history and their relation to gendered knowledge and identity Unlike other books on feminism the authors do not attempt to push that a particular theory is more correct than another but rather they give a complete overview of each of the forms of feminism The authors then couple the philosophical and theoretical ideas of western feminisms with the aims and conduct of educational research exploring how they interact and influence each other Focusing on more recent feminists both in education and related disciplines the book highlights illustrative examples from research to form a basis of understanding how the different feminisms have changed education Educational Studies in Europe Frieda Heyting, Jan Koppen, Dieter Lenzen, Felicitas Thiel, 1997-10-01 Reflecting the growing integration of the European Union this volume presents one of the results of an increasing cooperation between the education departments of Berlin Amsterdam and London universities The aim is to achieve a better understanding of the cultural and socio political differences of the educational sciences and more generally the educational consequences and possibilities of both globalizing and pluralist developments in European countries The areas covered include theoretical discussions of educational developments in contemporary society education organization and policy intercultural and integration pedagogics education for young children as well as higher education **Learning English and Chinese as Foreign Languages** Wen-Chuan Lin, 2019-09-19 Learning English and Chinese is becoming increasingly important to the prospects of young people This book compares English as a Foreign Language teaching in Taiwan with Chinese as a Foreign Language education in England in order to highlight how classroom activities are embedded within multiple settings including ethnic or other social group cultures family and community resources and school visions or goals The book illustrates how in Taiwan different ethnic groups recognise access and value English language learning to varying extents Its findings illuminate why some ethnic groups are highly motivated to learn English and are able to gain privileged economic

positions in the job market In England access to Chinese is marked by social class and the book argues that this could augment an educational apartheid that already exists in language teaching in secondary schools thereby exacerbating existing inequality

Practitioner Research In The Primary School Rosemary Webb, 2013-10-28

First Published in 1990 Central to the vision of teachers researching their own practice was the belief that the improvement of teaching and learning in schools could best be achieved through the development of the critical and creative powers of individual teachers The research studies in this book which reflect and extend that vision serve as accounts of the learning experiences of a group of practitioner researchers The book has two closely interrelated purposes The first is to provide information and ideas on the areas of the formal and hidden curriculum into which the practitioners enquired The second purpose is to provide methodological ideas and assistance for those already engaged in practitioner research and to motivate others to seek an opportunity to undertake some form of research based enquiry The two purposes are closely interrelated because of the value the contributors ascribe to taking a research stance to teaching

Sociology and School Knowledge Geoff Whitty, 2017-04-28

The rise of a radical new sociology of education during the early 1970s focused attention on the nature of school knowledge Although this new approach was set to revolutionize the subject within a few years many people considered these developments an eccentric interlude with little relevance to curriculum theory or practice First published in 1985 this book offers a more positive view of the new sociology of education and its contribution to our understanding of the curriculum In doing so it argues that some of the radical promise of the new sociology of education could be realised but only

if sociologists teachers and political movements of the left work more closely together
