Pirog, 2008-11-04 This volume provides a single collection some of the best articles on social experimentation and program evaluation that have appeared in the Journal of Policy Analysis and Management JPAM Provides exposure to a variety of well executed social experiments and evaluations for evidence based public policy Examines the theory and conduct of evaluations and social experiments as they relate to their practical implementation in evidence based policy making Provides exposure to the fundamental issues surrounding the conduct of evaluations as well as to the relative merits of social experiments and the ethics and use of evaluations *Social Experiments* Larry L. Orr, 1999 Intended to provide a basic understanding not only of how to design and implement social experiments but also of how to interpret their results once they are completed author Larry L Orr s *Social Experiments* is written in a friendly how to manner Through the use of illustrative examples how to exhibits and cases and boldface key words Orr provides readers with a grounding in the experimental method including the rational and ethical issues of random assignment designs that best address alternative policy questions maximizing the precision of the estimates implementing the experiment in the field data collection estimating and interpreting program impacts costs and benefits dealing with potential biases and the use and misuse of experimental results in the policy process This book will be useful not only to those who plan to conduct experiments but also to the much larger group who will at one time or another want to understand the results of experimental evaluations **Social Experiments and Social Program Evaluation** Washington Operations Research Council, 1974 **Evaluation and Experiment** Carl A. Bennett, Arthur A. Lumsdaine, 2013-09-24 *Evaluation and Experiment Some Critical Issues in Assessing Social Programs* is a collection of papers presented at the 1973 symposium held at The Battelle Seattle Research Center This book contains eight chapters that consider some selected aspects of the problems in evaluating the outcomes of socially important programs such as those dealing with education health and economic policy The first chapter provides an overview of the issues around the Social Program Evaluation The next chapters deal with the successes and failures brought by social innovations the quasi experimental evaluation in compensatory education to estimate the true effects of such education programs and the usefulness and validity of econometric and related

nonexperimental approaches for assessing the effects of social programs. These topics are followed by surveys of a number of additional program evaluation studies particularly in the field of family planning or fertility control mostly carried out as experiments or quasi experiments in Asian and Latin American countries. Other chapters describe the decision processes that involve explicit assessment of the worth or merit of outcomes and employ multivalued utility analysis and outline the ways in which evaluative data are useful in providing feedback to program or institutional operations and decisions. The final chapter discusses resolutions for some of the disagreements expressed by others concerning the role of field experiments constraints in their utilization and other factors that enter into a comprehensive conception of program evaluation.

Learning More from Social Experiments Howard S. Bloom, 2005-06-10. Policy analysis has grown increasingly reliant on the random assignment experiment a research method whereby participants are sorted by chance into either a program group that is subject to a government policy or program or a control group that is not. Because the groups are randomly selected they do not differ from one another systematically. Therefore any differences between the groups at the end of the study can be attributed solely to the influence of the program or policy. But there are many questions that randomized experiments have not been able to address. What component of a social policy made it successful? Did a given program fail because it was designed poorly or because it suffered from low participation rates? In *Learning More from Social Experiments* editor Howard Bloom and a team of innovative social researchers profile advancements in the scientific underpinnings of social policy research that can improve randomized experimental studies. Using evaluations of actual social programs as examples *Learning More from Social Experiments* makes the case that many of the limitations of random assignment studies can be overcome by combining data from these studies with statistical methods from other research designs. Carolyn Hill James Riccio and Bloom profile a new statistical model that allows researchers to pool data from multiple randomized experiments in order to determine what characteristics of a program made it successful. Lisa Gennetian Pamela Morris Johannes Bos and Bloom discuss how a statistical estimation procedure can be used with experimental data to single out the effects of a program's intermediate outcomes e.g. how closely patients in a drug study adhere to the prescribed dosage on its ultimate outcomes the health effects of the drug. Sometimes a social policy has its true effect on communities and not individuals such as in neighborhood watch programs or public health initiatives. In these cases researchers must randomly assign treatment to groups or clusters of individuals but this technique raises different issues than do experiments that randomly assign individuals. Bloom evaluates the properties of cluster randomization its relevance to different kinds of social programs and the complications that arise from its use. He pays particular attention to the way in which the movement of individuals into and out of clusters over time complicates the design execution and interpretation of a study. *Learning More from Social Experiments* represents a substantial leap forward in the analysis of social policies. By supplementing theory with applied research examples this important new book makes the case for enhancing the scope and relevance of social research by

combining randomized experiments with non experimental statistical methods and it serves as a useful guide for researchers who wish to do so **Public Program Evaluation** Laura Langbein, 2016-07-08 First Published in 2007 Routledge is an imprint of Taylor Francis an Informa company **Evaluating Welfare and Training Programs** Charles F. Manski, Irwin Garfinkel, 1992 Almost everyone would like to see the enactment of sound practical measures to help disadvantaged people get off welfare and find jobs at decent wages and over the past quarter century federal and state governments have struggled to develop just such programs How do we know whether they are having the hoped for effect How do we know whether these vast outlays of money are helping the people they are designed to reach All welfare and training programs have been subject to professional evaluations including social experiments and demonstrations designed to test new ideas This book reviews what we have discovered from past assessments and suggests how welfare and training programs should be planned for the 1990s The authors of this volume each a recognized expert in the evaluation of social programs do more than summarize what we have learned so far They clarify why the issue of the proper conduct and interpretation of evaluations has itself been a subject of continuing controversy In part the problem is organizational requiring the integrated efforts of social scientists public officials and the professionals who execute evaluations In addition there is a dispute about scientific method should evaluators try to understand the complex social processes that make programs succeed or fail or should they focus on inputs and outputs treating the programs themselves as black boxes whose machinery remains hidden Evaluating Welfare and Training Programs will be important for policy researchers and evaluation professionals social scientists concerned with evaluation methods public officials working in social policy and students of public policy economics and social work
