Companion to the Philosophy of Technology Jan Kyrre Berg Olsen, Stig Andur Pedersen, Vincent F. Hendricks, 2012-10-01 Drawing on essays from leading international and multi disciplinary scholars *A Companion to the Philosophy of Technology* is the first comprehensive and authoritative reference source to cover the key issues of technology s impact on society and our lives Presents the first complete authoritative reference work in the field Organized thematically for use both as a full introduction to the field or an encyclopedic reference Draws on original essays from leading interdisciplinary scholars Features the most up to date and cutting edge research in the interdisciplinary fields of philosophy technology and their broader intellectual environments *The Making of Home* Judith Flanders, 2014-10-01 The idea that home is a special place

a separate place a place where we can be our true selves is so obvious to us today that we barely pause to think about it But as Judith Flanders shows in this revealing book home is a relatively new concept When in 1900 Dorothy assured the citizens of Oz that There is no place like home she was expressing a view that was a culmination of 300 years of economic physical and emotional change In *The Making of Home* Flanders traces the evolution of the house across northern Europe and America from the 16th to the early 20th century and paints a striking picture of how the homes we know today differ from homes through history The transformation of houses into homes she argues was not a private matter but an essential ingredient in the rise of capitalism and the birth of the Industrial Revolution Without home the modern world as we know it would not exist and as Flanders charts the development of ordinary household objects from cutlery chairs and curtains to fitted kitchens plumbing and windows she also peels back the myths that surround some of our most basic assumptions including our entire notion of what it is that makes a family As full of fascinating detail as her previous bestsellers *The Making of Home* is also a book teeming with original and provocative ideas *The Technology of Orgasm* Rachel P.

Maines, Rachel Maines, 2001-06-15 The author explores hysteria in Western medicine throughout the ages and examines the characterization of female sexuality as a disease requiring treatment Medical authorities she writes were able to defend and justify the clinical production of orgasm in women as necessary to maintain the dominant view of sexuality which defined sex as penetration to male orgasm a practice that consistently fails to produce orgasm in a majority of the female population This male centered definition of satisfying and healthy coitus shaped not only the development of concepts of female sexual pathology but also the instrumentation designed to cope with them
