The Invisible Hand and the Common Good Bernard Hodgson, 2004-08-11 The basic moral significance of neo classical economics and the competitive market system it represents is founded on the classical liberal tradition in which the simple system of natural liberty is

claimed to give expression to the harmony of each with all Though such a common good would not be the outcome of the intentions of individual agents or state planning nevertheless the impersonal forces of a capitalist market would so allocate resources as to lead the self interested participants in such an economy as if by an invisible hand to a coherent social order of mutual advantage The papers in this volume critically examine central aspects of the preceding social ethos underlying contemporary political economy and our increasingly globalized market culture The inquiry is undertaken from a variety of disciplinary perspectives at the intersection of philosophy economics political science sociology psychology and computer science

The Role of the Court of Justice in EU Labour Law Silvia Rainone, 2023-05-17 In an unresolved ongoing debate the Court of Justice of the European Union CJEU is often included among the institutional actors responsible for the declining condition of labour law in Europe Has its case law been more protective of employers interests than of workers rights This innovative book greatly enhances the discussion by bringing to light the judicial lawmaking logic other than those pertaining to the balancing of social and business values that drive the CJEU s reasoning in its interpretation of the labour law provisions enshrined in the European Union EU law with particular attention to the directive on transfer of undertakings Addressing fundamental issues such as uneven bargaining power labour as a commodity coexistence of workers rights and the market economy in the context of judicial lawmaking the author clearly defines the tensions at work What normative models underlie the approaches of EU institutional policymakers with respect to labour law Does the CJEU have its own vision of the socioeconomic model to which the Union should adhere How does the CJEU s interpretative approach stand in relation to the transformation processes that regulators impose on labour law Is the CJEU particularly attentive to the preferences expressed by national governments especially those from the most politically influential states or rather reflect the political pressure of the European Commission What is the role of trans judicial dynamics in shaping the CJEU s reasoning in labour law cases The study is extraordinarily thorough drawing on a wide range of policy documents scholarly and doctrinal research and the entire body of the CJEU s case law on transfer of undertakings The legal arguments that the CJEU has developed over the years are mapped and classified according to their affinity with the labour law functions that underlie them With its comprehensive assessment of the normative implications of EU policymaking in the labour and social domains its thorough exploration of the CJEU s judicial lawmaking dynamics and its extensive empirical legal analysis of the CJEU s case law on transfer of undertakings the book has no peers in revealing the forces that guide the CJEU s decisions in the realm of labour law Of particular value to scholars and researchers interested in EU social policies and constitutional law the book will also prove of immeasurable value to labour law practitioners aiming to use the case law of the CJEU as well as to in house counsel industrial relation specialists and trade unionists

Method and Morals in Constitutional Economics Geoffrey Brennan, Hartmut Kliemt, Robert D. Tollison, 2013-03-09 This Festschrift was presented in electronic form to Buchanan on the occasion of his eightieth birthday on October 3 1999 after dinner in Fairfax Virginia As one might have expected the response to our call for papers was so luminous In looking over the many contributions we felt that a published Festschrift was also possible and fitting for the eightieth birthday of so prodigious and influential a scholar as Professor Buchanan To that end we have assembled the following volume In selecting the papers to be included here we have basically tried to choose those papers which in some way bear on Buchanan's contributions Perfectly good papers about issues not related to Buchanan's research agenda or not referring directly to Buchanan's work were not included Space constraints did not allow universal coverage so choices had to be made It should be stated clearly that these were our choices based on the criterion that the contribution be relevant to Buchanan's work Buchanan had nothing whatsoever to do with the selection of papers for this volume Once choices had been made we arranged the papers by subject matter ranging from various aspects of Buchanan's work in economics political science philosophy and related areas to some more personal recollections of Jim as a professor friend and colleague Including the latter material was also our decision and this probably represents a choice with which Jim would not have agreed We think however that the reader will find these pieces interesting and informative

Competition Law and Economic Inequality Jan Broulík, Katalin Cseres, 2022-12-15 The gap between the rich and poor is widening across the globe This book explores whether this major societal challenge of our time can be addressed by the means of competition law The primary goal of today's competition law is to ensure that market power does not lead to an inefficient production of goods and services Nevertheless even such efficiency oriented curbing of market power may arguably contribute to the reduction of differences in how much people own and earn Furthermore many competition law regimes do take into account distributive considerations too The chapters investigate the relationship between competition law and economic inequality from philosophical historical and economic perspectives Their inquiries concern the conceptual foundations of competition law and doctrinal frameworks of individual jurisdictions as well as specific problems and markets As such the book provides a novel and comprehensive overview of whether and how competition law can contribute to more equality in both developed and developing countries The book is a must read for researchers public officials judges and practitioners within the competition law community It will also appeal to anyone more broadly interested in issues of inequality and economic policy

Religious Communities and Civil Society in Europe Rupert Graf Strachwitz, 2019-08-19 The seemingly vitalizing impact of religiosity on civil society is a research topic that has been extensively looked into not only in the USA but increasingly also in a European context What is missing is an evaluation of the role of institutionalized religious communities and of circumstances that facilitate or impede their status as civil society organisations This anthology in two volumes aims at closing this gap by providing case studies

regarding political legal and historical aspects in various European countries Vol I provides an introduction and looks at cases in Greece Italy the Netherlands Sweden and Bosnia and Herzegovina as well as chapters on legal issues and data and comprehensive bibliography
