Social Measurement And Social Indicators Issues Of Policy And Theory:

Social Measurement and Social Indicators Michael Carley, 1981 **Handbook of Social Indicators and Quality of Life Research** Kenneth C. Land, Alex C. Michalos, M. Joseph Sirgy, 2011-11-25 The aim of the Handbook of Social Indicators and Quality of Life Research is to create an overview of the field of Quality of Life QOL studies in the early years of the 21st century that can be updated and improved upon as the field evolves and the century unfolds Social indicators are statistical time series used to monitor the social system helping to identify changes and to guide intervention to alter the course of social change Examples include unemployment rates crime rates estimates of life expectancy health status indices school enrollment rates average achievement scores election voting rates and measures of subjective well being such as satisfaction with life as a whole and with specific domains or aspects of life This book provides a review of the historical development of the field including the history of QOL in medicine and mental health as well as the research related to quality of work life QWL programs It discusses several of QOL main concepts happiness positive psychology and subjective wellbeing Relations between spirituality and religiousness and QOL are examined as are the effects of educational attainment on QOL and marketing and the associations with economic growth The book goes on to investigate methodological approaches and issues that should be considered in measuring and analysing quality of life from a quantitative perspective The final chapters are dedicated to research on elements of QOL in a broad range of countries and populations **Public Productivity Handbook** Marc Holzer, Seok-Hwan Lee, 2019-02-13 Anyone hoping to improve teamwork performance and budgeting training and evaluation programs in their organization should look no further Completely revised Public Productivity Handbook Second Edition defines the role of leadership dimensions of employee commitment and multiple employee organization based relationships for effective internal and external connections It s coverage of new and systematic management approaches and well defined measurement systems provides guidance on correct utilization of human resources that ensure improvements in productivity and performance The authors discuss such topics as citizen driven government and performance public sector values and productivity privatization and productivity barriers in the public sector **Statistical Sources for Social Research on Western Europe 1945-1995** Franz Rothenbacher, 2013-11-11 The intention of this book is to give a picture of the complex material that has been published in the field of social and economic statistics in Western Europe Although there are many guides bibliographies and reference books on special topics of this broad theme a general overview has been missing With this book I hope to fill this gap The frame of reference is a scientific one enabling and facilitating comparative social research on Western Europe In some respect this book enlarges and updates the bibliography written by Peter Flora Quantitative Historical Sociology published in Current Sociology in 1975 In principle this guide is an annotated bibliography of the most important printed material in the field of official statistics The legitimacy of such an approach lies in the fact that even today printed statistics are the most important form of dissemination of statistical results

although microcomputers, CD-ROMs and the Internet have changed this situation. In any case, a special section on statistical databases is included for every country describing the main databases of the statistical offices. Furthermore, the Internet address of each international or national statistical institute is provided in the introductory paragraph. This enables the reader to get fast access to online databases and supplementary online information on statistics via the Internet.

21st Century Sociology: A Reference Handbook Clifton D. Bryant, Dennis L. Peck, 2007 Publisher Description *Quality of Life and the Millennium Challenge* Valerie Møller, Denis Huschka, 2008-11-30 The new millennium is widely considered to be the age of globalisation, democratisation and human rights. We live in a knowledge society and in a time of risk and uncertainty. World society is rapidly urbanising and ageing and exhausting its natural resources. It is the interplay of such key trends of the era that calls for a fresh approach to measuring quality of life. This collection of papers presents an innovative approach to evaluating living standards and wellbeing under the new circumstances facing individuals and societies in the twenty-first century. Contributions cover a wide range of issues that impact positively and negatively on wellbeing in our age. While stability, trust, equal access to resources and the social integration of disadvantaged members of society enhance wellbeing, poverty, social exclusion, congestion in cities, HIV/AIDS and global warming pose threats to both modern and traditional lifestyles. Methodological refinements of conventional measurement tools are presented that take into consideration the rich diversity of lifestyles and values among different populations and regions of the world. This book will be essential reading for social scientists and ordinary citizens who are concerned about the future of human wellbeing on our planet.

Effective Assessment and the Improvement of Education Roger Murphy, Patricia Broadfoot, 2017-09-29 Originally published in 1995, this volume brings together twenty classic contributions from the work of Desmond Nuttall as an educational researcher, thinker and policy adviser. A full commentary by two of his former colleagues who knew him well accompanies the text. They have set out to explain and explore the essence of his contribution to others. Much in the book is as relevant today as when the articles were written; put together, they form a formidable collection. The book was published in the year after Desmond's death. It is hoped it will remain a fitting tribute to him. It will remind his friends of his classic ideas and bring together in one volume contributions that students of education may have missed.

populations including special attention given to older adults Measuring the Impact of the Nonprofit Sector Patrice Flynn, Virginia A. Hodgkinson, 2013-11-11 One of the major tasks facing researchers practitioners and funders is the development of empirical tools to measure the inherent worth of nonprofit organizations as well as the sector as a whole Renowned scholars present chapters on the state of the art of performance measurement in the nonprofit sector and seek to establish a framework for a long term research agenda to identify quantify and self assess those qualities that make the nonprofit sector unique **Handbook of Environmental Engineering Assessment** Ravi Jain, 2012-05-09 Under Contemporary Challenges are environmental issues that have received considerable public support and concern they include climate change acid rain deforestation endangered species biodiversity ecorisk cultural resources and sustainability For most of these issues there are scientific agreements and disagreements there are many uncertainties thus views differ widely These topics are discussed in considerable detail Notwithstanding uncertainties and differing views on such topics all of this information is put in a policy context such that progress towards addressing these contemporary challenges can be made while consensus on the nature and extent of the problem and resultant solutions are being developed The book provides considerable information about many timeless issues These issues range from resources needed for sustaining the quality of life on the planet air resources to natural resources Poverty and Development in China Caizhen Lu, 2013-03-01 China has made huge economic strides in recent decades but poverty is still a major issue on the agenda for rural China Poverty and Development in China analyses how poverty is recognized and measured and how people in poverty are identified literally asking who is poor in China Lu Caizhen s research compares four approaches to poverty assessment China s official poverty identification method the participatory approach to poverty assessment the monetary approach and use of multidimensional poverty indicators Each of these is applied to the same population of households to identify the poor in rural Wuding County Yunnan Province The analysis shows that there is in fact very little overlap of households identified as poor by the various means and that choice of approach does matter in the outcome of who is identified as poor This has implications at the theoretical methodological and policy levels Lu discusses these in detail concluding that at present there is a need to shift away from poverty reduction strategies that narrowly emphasize income generation activities as these are often short term efforts Instead the focus should move towards a broader combination of short term and long term strategies to break poverty s inter linked structural causes **Journal of Economic Literature** ,1982 **Evaluation Management in South Africa and Africa** Fanie Cloete, Babette Rabie, Christo De Coning, 2014-12-01 This blind peer reviewed book systematically records analyses and assesses for the first time in a single volume the implications of the global development and management of professional evaluation for the African continent The book deals with the most strategic contemporary evaluation themes Each of these themes contains discussions of theoretical issues illustrated with one or more short case studies while selected longer case studies and other relevant documentation are also taken up in annexures at the end of the book The book

therefore comprises a guide to best M E practices for purposes of systematic policy programme and project evaluations It is suitable for both professional M E institutionalisation and capacity building projects as well as for evaluation information dissemination and education at different levels in the public private and voluntary sectors in society especially in a developmental context
