Social Science Information And Public Policy Makin:

Social Science Information and Public Policy Making , Robert Rich reports the results of the Continuous National Survey CNS an administrative experiment with a two year lifespan designed to facilitate the use of research data by public officials in federal agencies

Social Science Information and Public Policy Making Robert F. Rich, 2018-04-24 A survey of federal officials reveals the belief that government should make the fullest possible use of social science information and yet most of the information developed by social scientists winds up in specialized libraries or data banks where it remains unused Why don t public officials make greater use of the information social scientists develop What can social scientists do to ensure that their findings are used To answer these and related questions Robert Rich reports the results of a unique experiment designed to facilitate the use of research data by public officials in federal agencies Rich interviewed both researchers and users of research data over the two year life of a Continous National Survey CNS experiment to discover the extent to which the CNS mechanism was successful and to record the levels and types of use that officials made of the data provided Rich reveals that factors such as the timeliness cost and relevance of data do not guarantee that information will be used He examines patterns in the actual use of survey data by agency officials and explores key organizational factors such as the compatibility of information with various bureaucratic interests He discusses the preoccupation of public officials with bureaucratic issues regarding the ownership and control of information identifies the incentives that prompt bureaucrats to pass along new information and the government officials difficulties in developing policies and programs for meeting national needs Rich notes that studies of knowledge inquiry systems found in the research literature of many social science disciplines have been dominated by a rationalistic bias This bias is expressed in terms of the belief that the act of acquiring information will automatically lead to its use in turn automatically leading to improved policy or decisions He contends that empirical studies of how information is actually used do not support the assumptions of rational choice theory The new chapter also discusses types of information knowledge and use prospects for the development of learning organizations in government and the politics of expertise This book will be of interest to social scientists and public policy makers Robert F Rich is professor of law and political science at the University of Illinois at Urbana Champaign He is also professor in the Institute of Government and Public Affairs and was the director of that Institute from 1986 1997 He is the founding editor of Knowledge Creation Diffusion Utilization now Science Communication

Social Sciences and Modern States Peter Wagner,1991-03-28 Modern social sciences have over the past forty years been committed to the improvement of public policy More recently however doubts have arisen about the possibility and desirability of a policy oriented social science In this book leading specialists in the field analyze both the development and failings of policy oriented social science In contrast to other writings on the subject this volume presents a distinctively historical and comparative approach By looking at earlier periods the contributors demonstrate how policy orientation has been central to the emergence and evolution of the social sciences as a form of professional activity Case studies of rarely examined societies such as Poland Brazil and Japan further demonstrate the various ways in which intellectual developments have been shaped by the societal contexts in which they have emerged and how they have taken part in the shaping of these societies

Smart,2010-04-28 Published annually since 1985 the Handbook series provides a compendium of thorough and integrative literature reviews on a diverse array of topics of interest to the higher education scholarly and policy communities Each chapter provides a comprehensive review of research findings on a selected topic critiques the research literature in terms of its conceptual and methodological rigor and sets forth an agenda for future

research intended to advance knowledge on the chosen topic The Handbook focuses on twelve general areas that encompass the salient dimensions of scholarly and policy inquiries undertaken in the international higher education community The series is fortunate to have attracted annual contributions from distinguished scholars throughout the world Advances in Applied Social Psychology R. F. Kidd, M. J. Saks, 2014-05-22 First published in 1980 The purpose of this volume is to widen stimulate and inform the growing debate surrounding the application of social psychological knowledge It includes the history of applied social psychology and follow the changing nature of definitions of both applied and basic issues

Rethinking the Process of Operational Research & Systems Analysis R. Tomlinson, I. Kiss, 2013-10-22 Invited contributions from distinguished practitioners and methodologists of operational research and applied systems analysis which represent a true state of the art and which provide perhaps for the first time a coherent interlocking set of ideas which may be considered the foundations of the subject as a science in its own right *Social Science and Policy-Making* David Lee Featherman, Maris Arvids Vinovskis, 2009-12-21 How the social sciences in America were developed as a means of social reform **New Directions in Educational Evaluation** Ernest R. House, 2013-10-28 First published in 2004 Measuring the outcomes of educational practices is a modern phenomenon Valuing their worth is as old as philosophy itself It is the singular value of this collection of papers set in context and introduced by Ernest House that it holds in dynamic equilibrium both the measurement and the valuing sides of educational evaluation This book will appeal to the student who will find the theoretical analysis of educational evaluation in its several meanings suggested practices and also the specialist will also find much not least a critical and challenging appreciation of educational evaluation theory and practice as it faces the problems of the final decades of the twentieth century *Personnel Literature*, 1983 Health Technology Assessment and Health Policy-making in Europe Marcial Velasco Garrido, 2008 New technologies with the potential to improve the health of populations are continuously being introduced But not every technological development results in clear health gains Health technology assessment provides evidence based information on the coverage and usage of health technologies enabling them to be evaluated properly and applied to health care efficaciously promoting the most effective ones while also taking into account organizational societal and ethical issues This book reviews the relationship between health technology assessment and policy making and examines how to increase the contribution such research makes to policy and decision making processes By communicating the value and potential of health technology assessment to a wider audience both within and beyond decision making and health care management it aims ultimately to contribute to improve the health status of the population through the delivery of optimum health services **Public Policy Making Reexamined** Yehezkel Dror, 2017-09-29 Public Policymaking Reexamined is now recognized as a fundamental treatise for public policy studies Although it caused much controversy when it was first published for its systematic approach to policy studies the book is acknowledged as a modern classic of continuing importance for the teaching and research of public policy planning and

policy analysis and public administration The paperback includes a new introduction updating and supplementing many of the author's original ideas Professor Dror combines the approaches of policy analysis behavioral science and systems analysis in his examination of the reality of public policymaking and his suggestions for its reform Actual policymaking is carefully evaluated with the help of explicit criteria and standards based on an optimal model approach resulting in detailed proposals for improvement He applies a scientific orientation to the study of social facts and theory *The Ivory Tower of Babel* David Demers, 2011 Mainstream social science has come under fierce criticism in recent decades for failing to have more impact on public policy Critics say the social sciences are incapable of generating knowledge that can solve social problems Others contend that partisan politics and university administrations are the problem Politicians are more concerned about special interests than scientific research and administrators care more about scholarly publications than solving social problems Are the social sciences failing to live up to their promises Have they outlived their usefulness Have they become an Ivory Tower of Babel Like the Babylonians who built the infamous Tower of Babel social scientists for the past two centuries have been building a tower of sorts only this time it's composed of knowledge rather than bricks The primary goal of these scholars anthropologists communication scholars economists political scientists sociologists and social psychologists has been to solve problems of social integration The Babylonian tower was designed in part to unite people to one geographical area Similarly social scientists see their tower of knowledge as a means for solving social problems such as poverty crime drug abuse inequality unemployment abuse of power that alienate people and groups from modern society The Babylonians failed because of divine intervention according to the Bible The social scientists aren't finished building their tower But according to critics the results so far look less like a tower of knowledge for solving social problems than an Ivory Tower of Babel one in which social scientists routinely dispute each other's theories and data and even uncontested or well supported findings rarely influence public policy Disputes over the nature of truth and knowledge are so commonplace in the social sciences that many scholars believe a social science which uses methods from the natural sciences is incapable of generating knowledge that can solve social problems This book examines the history and philosophy of the social sciences and theoretical and empirical research on the impact of social science Suggestions are offered at the end for enhancing the impact of the social sciences A number of scientific articles and books have been written about the impact or lack thereof of the social sciences on public policy but none has been written specifically to appeal to both academics and a broader market composed of the general public and students in both undergraduate and graduate level courses The author takes the reader on a journey inside one of the best kept secrets in higher education that much if not most of the research conducted in the social sciences has very little impact on public policy or on solving social problems Are taxpayers getting their money's worth

Policing in Hong Kong Kam C. Wong, 2015-10-12 This comprehensive book examines the state of research on policing in Hong Kong It surveys the history and development of the field of police studies in Hong Kong and examines the various

methods problems and prospects in the field *Social Science Research and Government* Martin Bulmer,1987-02-26 This collection of twenty original essays considers the relationship between social science research and government during the last 30 years in Britain and the United States especially the economic and social policies of Reagan and Thatcher governments These essays will be useful to social science staff graduate students and to policy makers working inside government *The Politics of Expertise in China* Xufeng Zhu,2018-10-26 Since the reform and opening up policy was implemented in China consultations have been increasingly carried out during the policy making process This often involves experts many of whom are based in think tanks or similar institutions The degree of access to the policy making process varies and consequently some experts influence the policy making process significantly and others not This book explores how experts in China engage with the policy making process and the circumstances which affect how far they are able to influence policy making **The Nationalization of the Social Sciences** Samuel Z. Klausner,Victor M. Lidz,2016-11-11 This book is a volume in the Penn Press Anniversary Collection To mark its 125th anniversary in 2015 the University of Pennsylvania Press rereleased more than 1 100 titles from Penn Press s distinguished backlist from 1899 1999 that had fallen out of print Spanning an entire century the Anniversary Collection offers peer reviewed scholarship in a wide range of subject areas *Social Science Research and Decision-making* Carol H. Weiss,Michael J. Bucuvalas,1980 **Learning and Motivation in the Classroom** Scott G. Paris,Gary M. Olson,Harold W. Stevenson,2017-09-13 Throughout the twentieth century there had been substantial links between scientific psychology and education Binet Dewey Thorndike and other early pioneers were strongly interested in both realms Taking advantage of a period of enthusiasm this title originally published in 1983 looks at the amalgamation of the recent advances at the time in theory and research in education and psychology with a particular focus on cognition motivation and social policy This volume presents and discusses the implications of this work on learning and motivation for educational policy
