in the field of children youth and family services completes this collection Public Service and Good Governance for the Twenty-First Century James L. Perry, 2020-05-01 Expert analysis of American governance challenges and recommendations for reform Two big ideas serve as the catalyst for the essays collected in this book The first is the state of governance in the United States which Americans variously perceive as broken frustrating and unresponsive Editor James Perry observes in his Introduction that this perception is rooted in three simultaneous developments government's failure to perform basic tasks that once were taken for granted an accelerating pace of change that quickly makes past standards of performance antiquated and a dearth of intellectual capital that generate the capacity to bridge the gulf between expectations and performance The second idea harkens back to the Progressive era when Americans revealed themselves to be committed to better administration of their government at all levels federal state and local These two ideas the diminishing capacity for effective governance and Americans expectations for reform are veering in opposite directions Contributors to Public Service and Good Governance for the Twenty First Century explore these central ideas by addressing such questions as what is the state of government today Can future disruptions of governance and public service be anticipated What forms of government will emerge from the past and what institutions and structures will be needed to meet future challenges And lastly and perhaps most importantly what knowledge skills and abilities will need to be fostered for tomorrow's civil servants to lead and execute effectively Public Service and Good Governance for the Twenty First Century offers recommendations for bending the trajectories of governance capacity and reform expectations toward convergence including reversing the trend of administrative disinvestment developing talent for public leadership through higher education creating a federal civil service to meet future needs and rebuilding bipartisanship so that the sweeping changes needed to restore good government become possible Contributors Sheila Bair William W Bradley John J DiIulio Jr Angela Evans Francis Fukuyama Donald F Kettl Ramayya Krishnan Paul C Light Shelley Metzenbaum Norman J Ornstein James L Perry Norma M Riccucci Paul R Verkuil Paul A Volcker **Towards a New Development Paradigm in Twenty-first Century China** Éric Florence, Pierre Defraigne, 2013 This book argues that the current state of China requires an important paradigm shift in the way the party state manages the country's development and goes on to assess the fitness of the party state for implementing such a paradigm shift and the likelihood of the party state bringing this about It brings together an examination of the very latest situation in a range of key areas where current developments have the potential to undermine substantially the status quo areas such as the recent economic crisis and the resulting economic slowdown increasing labour unrest mounting calls for social justice worsening urban rural disparity the urgent need to implement social welfare programmes the rise of civil society and the impact of new media Overall the book provides a thorough appraisal of the difficulties which China currently faces George Herbert Mead in the Twenty-first Century F. Thomas Burke, Krzysztof Skowronski, 2013-03-22 This volume is composed of extended versions of selected papers presented at an international conference held in June 2011 at Opole

University the seventh in a series of annual American and European Values conferences organized by the Institute of Philosophy Opole University Poland The papers were written independently with no prior guidelines other than the obvious need to address some aspect of George Herbert Mead's work While rooted in careful study of Mead's original writings and transcribed lectures and the historical context in which that work was carried out these papers have brought that work to bear on contemporary issues in metaphysics epistemology cognitive science and social and political philosophy There is good reason to classify Mead as one of the original classical American pragmatists along with Charles Peirce William James and John Dewey and consequently as a major figure in American philosophy Nevertheless his thought has been marginalized for the most part at least in academic philosophy It is our intention to help recuperate Mead's reputation among a broader audience by providing a small corpus of significant contemporary scholarship on some key aspects of his thought

Comparing autocracies in the early Twenty-first Century Aurel Croissant, Steffen Kailitz, Patrick Koellner, Stefan Wurster, 2016-03-17 Authoritarianism research has evolved into one of the fastest growing research fields in comparative politics The newly awakened interest in autocratic regimes goes hand in hand with a lack of systematic research on the results of the political and substantive policy performance of variants of autocratic regimes The contributions in this second volume of *Comparing Autocracies* are united by the assumption that the performance of political regimes and their persistence are related Furthermore autocratic institutions and the specific configurations of elite actors within authoritarian regime coalitions induce dictators to undertake certain policies and that different authoritarian institutions are therefore an important piece of the puzzle of government performance in dictatorships Based on these two prepositions the contributions explore the differences between autocracies and democracies as well as between different forms of non democratic regimes in regard to their outcome performance in selected policy fields how political institutions affect autocratic performance and persistence whether policy performance matter for the persistence of authoritarian rule and what happens to dictators once autocratic regimes fall This book is an amalgam of articles from the journals *Democratization* *Contemporary Politics* and *Politische Vierteljahresschrift*

Reading Karl Polanyi for the Twenty-First Century A. Bugra, K. Agartan, Ayşe Buğra, 2007-10-01 Using Karl Polanyi's analysis of the separation of politics and the economy the book argues that the market economy is not a spontaneous process but a political project realized through institutional change where labour land money and currently knowledge are commodities The contributions explore the impact of this commodification process
