White, 2025-04-15 Who wrote the Pauline Epistles For nearly 1 700 years the answer seemed fairly straightforward The New Testament canon set the boundary at thirteen or fourteen including Hebrews Pauline Epistles alongside an uncontroversial biographical framework within which to imagine them in Acts In the early nineteenth century the identification of the historical Paul with the canonical Paul was severed when theologian Ferdinand Christian Baur of the University of Tübingen laid the groundwork for the fundamental historiographical moves that still orient Pauline Studies as a critical discipline by both delimiting the number of authentic Pauline Epistles and highlighting the tendentious character of Acts portrayal of Paul Given the highly uncertain and subjective nature of so much of the argumentation over the authenticity of the Pauline Epistles as it developed in the nineteenth century the analysis of authorial style took on increasing weight as a way out of so many special decisions The linguistic features of texts were counted averaged and compared In measuring one text against another the Pauline stylome emerged as the incontrovertible standard for uncovering canonical forgeries in the Apostle's name Tracing the long

history of the computational approach to the Pauline authorship problem Counting Paul exposes the ideological foundations and questionable science of much of the work and argues that Pauline biography ought not be written from fewer sources than what the New Testament has given us but rather more It advocates for a more expansive vision of what might count as Pauline by reorienting our focus away from internal criteria like appeals to style and toward external criteria like the reception of Paul in the generations after his death *Political Research* Sandra Halperin, Oliver Heath, 2020 The most accessible and practical guide to research methods written especially for politics and international relations students

Faces Inside and Outside the Clinic Tony McHugh, 2016-04-15 Drawing on studies of surface topography image editing and diagnostic and surgical experience Faces Inside and Outside the Clinic addresses the notion of truth in what are considered to be right and wrong faces whether in clinical cosmetic procedures or in specific sociocultural contexts outside the clinic With attention to the manner in which the human face and often the individual herself or himself as a consequence is physically defined conceptually judged numerically measured and clinically analysed this book reveals that on closer inspection supposedly objective and evidential truths are in fact subjective and prescriptive Adopting a Foucauldian analysis of the ways in which normalising technologies and techniques ultimately preserve and expand upon an increasing array of abnormal facial configurations Faces Inside and Outside the Clinic shows that when determining right and wrong faces what happens inside the clinic is inextricably linked to what happens outside the clinic and vice versa As such it will be of interest to scholars and students of social cultural and political theory contemporary philosophy and the social scientific study of science health and technology

Composition and the Rhetoric of Science Michael J Zerbe, 2007-03-21 Composition and the Rhetoric of Science Engaging the Dominant Discourse calls for instructors of first year writing courses to employ primary scientific discourse in their teaching and for rhetoricians of science to think about teaching scientific discourse as a literacy skill Author Michael J Zerbe argues that

inclusion of scientific discourse is crucial because of this rhetoric's status as the dominant discourse in western culture. The volume draws on Lyotard, Foucault and Althusser to argue that while important theorists such as these have recognized the dominance of scientific discourse, rhetoric and composition has not to its detriment. The text illustrates that scientific discourse remains a miniscule part of the enterprise of rhetoric and composition and thus the field is not fulfilling its mission of providing students with the writing and reading skills they need to live and work in a science and technology dependent society. Zerbe provides an analysis of science popularizations and demonstrates how these works can be used to contextualize primary scientific research. He also presents three pedagogical scenarios each built around a carefully chosen accessible example of scientific discourse that demonstrate how articles from scientific journals can be used in writing courses. Only by gaining a meaningful fluency in this discourse, one that is not offered by science textbooks, can a more sophisticated scientific literacy be assured. *Composition and the Rhetoric of Science* effectively explores the relatively limited amount of work done in rhetoric and composition on scientific discourse and questions this state of affairs. Zerbe presents for the first time cultural studies and science literacy as gateways for incorporating scientific discourse into first year writing courses. *The Journey to Dissertation Success* Elizabeth Laycock, Tim Howarth, Paul Watson, 2016-06-10.
