**Books in Print** ,1990      *Radical Challenges for Social Work Education* Jane Fenton,2022-04-19 This book is full of ideas about how social work education can confront the individualising and often blaming form of social work that neoliberalism ushered in four decades ago Radical social work is an approach to social work that has at its heart the departure from solely behavioural moral or psychological understanding of service users problems Social work had originally been concerned with the moral character of people in trouble usually poor people making a clear division between those who were deserving of help and those who were undeserving The rise of science and the psy disciplines then led to psychological explanations for the difficulties people found themselves in Both explanations for social problems moral and psychological with their narrow focus on the individual have been enjoying a renaissance in recent times with the neoliberal self sufficiency narrative moral and the more recent focus on trauma psychological Radical social work challenges those explanations concerned as it is with the circumstances a person might find themselves in poverty poor housing poor education high crime rates and lack of opportunities of all kinds This book is a step towards resurrecting radical social work principles and it urges us to think about how social work education can be reshaped to that end Radical Challenges for Social Work Education is a significant new contribution to social work practice and theory and will be a great resource for academics researchers and advanced students of Politics Education Social Work Sociology Public Policy Development Studies Anthropology and Human Geography The chapters in this book were originally published as a special issue of the journal Social Work Education      [Handbook of Social Work in Health and Aging](#) Barbara Berkman,2006-02-09 The Handbook of Social Work in Health and Aging is the first reference to combine the fields of health care aging and social work in a single authoritative volume These areas are too often treated as discrete entities while the reality is that all social workers deal with issues in health and aging on a daily basis regardless of practice specialization As the baby boomers age the impact on practice in health and aging will be dramatic and social workers need more specialized knowledge about aging health care and the resources available to best serve older adults and their families The volume s 102 original chapters and 13 overviews written by the most experienced and prominent gerontological health care scholars in the United States and across the world provide social work practitioners and educators with up to date knowledge of evidence based practice guidelines for effectively assessing and treating older adults and their families new models for intervention in both community based practice and institutional care and knowledge of significant policy and research issues in health and aging A truly monumental resource this handbook represents the best research on health and aging available to social workers today
