Special Issue on Social Geographies of Educational Change Andy Hargreaves,Juana Sancho,2002 *Second International Handbook of Educational Change* Andy Hargreaves,Ann Lieberman,Michael Fullan,David Hopkins,2010-08-13 The two volumes of the second edition of the International Handbook of Educational Change comprise a totally new and updated collection of the most critical and cutting edge ideas in educational change Written by the most influential thinkers in the field these volumes cover educational change at both the theoretical and practical levels The updated handbook remains connected to the classical concerns of the field such as educational innovation reform and change management and also offers new insights into educational change that

have been brought about by social change and shifting contexts of educational reform Like the first best selling Handbook this one will also undoubtedly become an essential resource for people involved in all spheres of education from classroom teachers teacher leaders and administrators to educational researchers curriculum developers and university professors No other work provides such a wide ranging and comprehensive examination of the field of educational change *Leading Educational Change Wisely* Christopher M. Branson, 2010-01-01 Despite over 40 years of research and writing about how to lead educational change we still can't get it right Although we keep fine tuning our present ways we are yet to come up with an approach that enables educational change to happen successfully and sustainably Although this book acknowledges the importance of learning from our past it also highlights a key deficiency that has consistently compromised these efforts To date our approach to leading educational change has mainly focussed on trying to come up with the perfect practical strategy or plan In contrast this book argues that leading educational change successfully is not about following a clearly defined process like following a recipe but it is an improvisational art more like driving down a busy main street during peak hour traffic The successful leadership of educational change is an improvisational art because although the leader needs to have an overarching strategy a guiding plan what they actually do from moment to moment cannot be scripted The leader has to move back and forth from their plan to the reality currently being experienced so that the plan is being achieved but any adverse effects on those involved are being empathically and immediately attended to as well This approach to the leadership of educational change emphasises the need of the leader to be able to cope with the unforeseen the unexpected and the idiosyncratic Moreover this approach to the leadership of educational change emphasises the relational as well as the rational requirements While such views might be familiar to many what is new and unique about this book is that it describes how it all can be achieved It provides clear research supported guidance for those who wish to finally lead successful and sustainable educational change **South African Schooling: The Enigma of Inequality** Nic Spaull, Jonathan D.

Jansen, 2019-11-05 This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90/10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth

and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI

Good Teachers for Tomorrow's Schools ,2021-05-25 Teachers in schools nowadays are challenged to create inclusive learning environments and safe spaces for encountering diversity in values cultures and religions as well as in dis ability and talent Classrooms are micro cosmoses in which local and global issues are confronted and addressed This volume discusses the characteristics of good teachers and the teaching that is needed in today s and tomorrow s schools The focus is on research based perspectives with contributions from several internationally renowned scholars on what constitutes good and quality in teaching studying learning processes The chapters focus on good teaching and good teachers from perspectives concerning the fundamental and transversal features of what constitutes a good teacher More specifically it is argued that good teachers in tomorrow s schools will need capabilities that reflect the purpose of education values in education and talent in education As an outcome the book provides insights into how in attending not only to the cognitive but also to the affective behavioral moral and spiritual domains teachers are able to support holistic growth and learning among their students in schools of the 21st century This volume discusses good teaching for schools in the future from the perspectives of school pedagogy educational psychology and neuropsychology

Extending Educational Reform Amanda Datnow,Lea Hubbard,Hugh Mehan,2005-11-02 In an effort to improve student achievement thousands of US schools have adopted school reform models devised externally by universities and other organizations Such models have been successful in improving individual schools or groups of schools but what happens when educational reform attempts to extend from one school to many Through qualitative data from several studies this book explores what happens when school reform goes to scale Topics covered include why and how schools are adopting reforms the influence of the local context and wider constraints on the implementation of reform teachers and principals as change agents in schools the evolution of reform design teams the implementation sustainability and expiration of reform and its impact on educational change Each chapter concludes with guidelines for policy and practice

This book will be of interest to educational leaders and staff developers educational researchers and policy makers in the US and internationally *Whole School Approaches to Sustainability* Arjen E.J. Wals, Birgitte Bjønness, Astrid Sinnes, Ingrid Eikeland, 2024-06-22 In response to urgent global sustainability challenges Education for Sustainable Development ESD and Global Citizenship Education have been prioritized in the United Nations Agenda 2030 under SDG 4 7 There is a growing awareness that treating concepts such as global citizenship sustainable development climate urgency and health and well being as separate subjects or topics to be added to a curriculum is ineffective as they are highly interconnected Additionally this approach is problematic as schools already have an overcrowded curriculum This edited volume brings together a range of scholars and reflective practitioners from across the globe who are investigating and enacting a whole school approach WSA in education for sustainability While the WSA and related approaches such as those advocated by EcoSchools are becoming more popular there is a lack of understanding of their underlying principles and the different manifestations in diverging socio cultural contexts at different educational levels This collection of chapters provides a deeper understanding of the WSA while also addressing its effectiveness possibilities for upscaling professional development needs for WSA practitioners interlinkages with more conventional curriculum requirements expectations of students and parents and more This is an open access book *Teaching in the Knowledge Society* Andy Hargreaves, 2003 **Contemporary Manifests on Design Thinking and Practice** Zengin, Gözde, Yurtsever, Bengi, 2022-12-27 Design consists of the solution proposals put forward by the designer for the target audience The changing needs of the target audience cause the designer to change the solutions Although the act of designing seems to take place in the triangle of mass object designer it is also affected by the period it is in independently of these components The changing perception of taste with the change of the period the adoption of fast consumption the advancement of technology the attempt to establish the real world in the virtual with this progress and the widespread use of social media causes different effects on different user groups Some users who feel this effect adapt to it and try to meet their needs in parallel while the other part shows a conscious resistance to this effect and prefers to maintain a perception of liking from the past It is important to share these views to break the resistance and ensure the construction of a new agenda *Contemporary Manifests on Design Thinking and Practice* reveals the current problems practices and research of the period in design disciplines It gives readers the opportunity to see the impact of the ever present change and transformation in design as a whole Covering topics such as alternative design models social media interaction and urban social sustainability this premier reference source is a dynamic resource for designers architects industrial designers business leaders and executives students and faculty of higher education librarians researchers and academicians *Understanding Emotion at Work* Stephen Fineman, 2003-05-27 This introductory text on emotions is aimed specifically at students of management and organization studies Written accessibly it avoids pat prescriptions but leaves the reader with challenging questions about the intrinsic nature of emotions to the design and management of organizations
