Catholicism and the Welfare State in Secular France Fabio Bolzonar,2023-10-02 Even though the policy impact of Catholicism has increasingly been acknowledged existing scholarship lacks a coherent view on its changing influence over time and in different political contexts In this book Fabio Bolzonar investigates the influence of Catholicism on developments in French social protection from World War II to the mid 2010s He discusses the factors that have favoured or inhibited it and explores the hybridization between Catholic values and secular principles in the social engagement of Catholic actors in secular France By doing so this multidisciplinary study integrates current scholarship which has given limited attention to the changing patterns of Catholic involvement in the social policy domain over a long period of time and the renewed influence of Catholic values in secularized societies Catholic mobilization has relocated from the political to the civil society sphere making voluntary organizations and social movements rather than political parties the main channels for defending Catholic values in secular France Rather than

marginalizing Catholicism this process has opened up new opportunities for Catholic actors and values to play a significant role in society and politics Bolzonar identifies two divergent scenarios that define Catholic social engagement in contemporary France either the strengthening of new forms of institutional collaboration between Catholic inspired philanthropic organizations and public administrations in the interest of socially vulnerable citizens or the emergence of new ideological conflicts on gender and sexuality related issues

East Asian Social Movements Jeffrey Broadbent, Vicky Brockman, 2011-01-07 In the study of civil society and social movements most cases are based in Western Europe and North America These two areas of the world have similar histories and political ideals and structures in common which in turn affect the structure of its civil

society In studying civil society in Asia a different understanding of history politics and society is needed The region's long traditions of centralized authoritarian states buttressed by Confucian and in some cases Communist ideologies may render this concept irrelevant The chapters in this international volume cover most of the areas and countries traditionally defined as belonging to East Asia Japan Taiwan South Korea Hong Kong Singapore and China The case studies included in this volume confront the utility of using the Western concept of civil society represented in its most active form social movements to think about East Asia popular politics Along with providing an array of important case studies of social movements in East Asia the introduction chapters and conclusion in the book take up three major theoretical questions the effect of the East Asian cultural social and institutional context upon the mobilization activities and outcomes of social movements in that region the role of social movements in larger transformative processes utility of Western social movement concepts in explaining social movements in East Asia This book will be of interest to two major groups of readers those who study East Asia and those who pursue social movements and civil society as well as politics more generally
