Social Science Concepts In The Social Sciences:

Social Science Concepts Gary Goertz, 2006 To develop theories and research designs requires concepts Gary Goertz provides advice on the construction and use of social science concepts and their use in case selection and theories He also cites examples from political science and sociology to illustrate the theoretical and practical issues of concept construction and use

Social Science Concepts Giovanni Sartori, 1984 Scepticism about the science of social science is as widespread now as it has ever been Sartori and his colleagues attribute this lack of progress to the neglect of concept analysis Using the analytic procedure established by Sartori in the opening chapters the distinguished contributors to this book attempt to build a common consistent and communicable set of social scientific concepts

Social Science Delanty, Gerard, 2005-06-01 What is social science Does social scientific knowledge differ from other kinds of knowledge such as the natural sciences and common sense What is the relation between method and knowledge This concise and accessible book provides a critical discussion and comprehensive overview of the major philosophical debates on the methodological foundations of the social sciences From its origins in the sixteenth century when a new system of knowledge was created around the idea of modernity the author shows how the philosophy of social science developed as a reflection on some of the central questions in modernity Visions of modernity have been reflected in the self understanding of the social sciences From the positivist dispute on explanation vs understanding to controversies about standpoint to debates about constructivism and realism Delanty outlines the major shifts in the philosophy of social science He argues that social science is an intellectual framework for the transformation of the social world The new edition is updated and expanded throughout with the latest developments in the field including a new chapter on feminist standpoint epistemology and additional material on neo positivism pragmatism and reflexivity This is one of the most ambitious and wide ranging texts in recent years on debates on method and the contemporary situation of social science It is of interest to undergraduate students and postgraduates as well as to professional researchers with an interest in the philosophy of the social sciences and social theory

Social Science Concepts and Measurement Gary Goertz, 2020-09-29 A fully revised edition of the classic reference on concepts and their role in social science research Social Science Concepts and Measurement offers an updated look at the theory and methodology of concepts for the social sciences Emphasizing that most concepts are multilevel and multidimensional this revised edition continues to bring the qualitative and quantitative closer together with new chapters devoted to scaling aggregation and the methodological links between the semantics of concepts and numeric measures In addition it stresses that concepts are used for description and causal inference and contain normative judgments Initial chapters focus on conceptualization followed by chapters on issues of measurement The textbook examines concepts in the international arena such as the global performance indicators used by international organizations like the UN and the World Bank as well as classic paired concepts such as poverty and wealth democracy and authoritarianism and war and peace Additionally it

explores such topics as typologies hybrid concepts and how complex concepts constitute complex theories The volume serves as a guide to the methodology of concepts in the classroom and is accompanied by more than two hundred exercises **Social Science Concepts and Measurement** is an indispensable resource for graduate students and scholars **Elucidating Social Science Concepts** Frederic Charles Schaffer, 2015-07-24 Concepts have always been foundational to the social science enterprise This book is a guide to working with them Against the positivist project of concept reconstruction the formulation of a technical purportedly neutral vocabulary for measuring comparing and generalizing Schaffer adopts an interpretivist approach that he calls elucidation Elucidation includes both a reflexive examination of social science technical language and an investigation into the language of daily life It is intended to produce a clear view of both types of language the relationship between them and the practices of life and power that they evoke and sustain After an initial chapter explaining what elucidation is and how it differs from reconstruction the book lays out practical elucidative strategies grounding locating and exposing that help situate concepts in particular language games times and tongues and structures of power It also explores the uses to which elucidation can be put and the moral dilemmas that attend such uses By illustrating his arguments with lively analyses of such concepts as person family and democracy Schaffer shows rather than tells making the book both highly readable and an essential guide for social science research **Research Methods in the Social Sciences**

Jean-Frédéric Morin, Christian Olsson, Ece Özlem Atikcan, 2021 **Research Methods in the Social Sciences** is a comprehensive yet compact A Z for undergraduate and postgraduate students undertaking research across the social sciences featuring 71 entries that cover a wide range of concepts methods and theories Each entry begins with an accessible introduction to a method using real world examples from a wide range of academic disciplines before discussing the benefits and limitations of the approach its current status in academic practice and finally providing tips and advice for readers on when and how to apply the method in their own research Wide ranging and interdisciplinary the text covers both well established concepts and emerging ideas such as big data and network analysis for qualitative and quantitative research methods All entries feature extensive cross referencing providing ease of navigation and pointing readers to related concepts and to help build their overall understanding of research methods Catalog of NIE Education Products, 1978 *Catalog of NIE Education*

Products National Institute of Education (U.S.), 1975 **Interpretive Social Science** Mark Bevir, Jason Blakely, 2018 This volume introduces and argues for the fundamental importance of an interpretive approach to explaining social and political reality Critical Issues in Social Studies Research for the 21st Century William B. Stanley, 2001-06-01 The authors of the nine other chapters in this book have struggled with the issues discussed above in several different ways The chapter authors represent a wide range of views and expertise within the field of social studies Some have been leading social studies scholars for three or four decades Other authors represent new voices that have begun to shape the direction social studies will take in the future The topics examined here include the debate over how to define social studies social studies and the

impact of the standards accountability movement the contextual constraints restraints on teaching social studies education for democracy rationales for teaching history multicultural education global education social studies and educational technology and the nature and effectiveness of social studies research *Research in Education* ,1970 *Alternative Discourses in Asian Social Science* Syed Farid Alatas,2006-05-10 This book situates Asian social sciences in the global context in terms of the perspectives that have evolved and the contributions they have made to the general body of knowledge in the field More than a mere chronology of key growth points of various social science disciplines in the vast region of Asia and the Pacific the book focuses on major theoretical problems and issues and offers a critique of various approaches and orientations pursued by scholars worldwide in the investigation of Asian societies and cultures **Social Studies Education in South and South East Asian Contexts** Kerry J Kennedy,2021-07-22 The education of young people is context bound This edited volume explores the contexts that characterise South and South East Asia and their influence on social studies education There is not a single context across this broad geographical expanse rather different religions different political systems and different values exert influences that create distinctive programmes that characterise different countries Yet there are also commonalities such as the post colonial nature of most of the countries portrayed in this book determined efforts at establishing new national communities and multiple value systems that lead to distinctive local priorities There are also voices of resistance in these chapters recognising the realities of local contexts but also recognising the need for change Social studies education in these contexts may well be descended from its origins in North America but in South and South Asian contexts it has taken on new purposes new forms and new values Education researchers policymakers and postgraduate students in comparative education will find the volume useful in its exploration and comparison of the social studies curricular and reforms that shaped them **AI Use in Social Sciences** Demircioğlu, Aytekin,2025-06-18 Artificial intelligence AI based technologies are significantly impacting various social science disciplines With the large data sets that are analyzed technologies such as machine learning ML natural language processing NLP and neural networks are particularly useful in disciplines such as sociology psychology political science anthropology and economics Thus social science education and research benefit by the ability of AI to effectively analyze data sets predict and increase interactivity However ethical concerns regarding privacy and algorithm bias cause some to be resistant to adopting the use of AI in social science fields Thus it is crucial to consider the ethical consequences while exploring the multifaceted impact of AI on education research and social sciences AI Use in Social Sciences explores the opportunities and challenges AI provides to the field of social sciences It presents practical applications of AI and the societal implications they have Covering topics such as philosophy teaching economic policy and unified theory of acceptance and use of technology UTAUT this book is an excellent resource for social scientists teachers ethicists policymakers researchers professionals scholars academicians and more The Range of Social Theory Floyd Nelson House,1929 The Routledge Companion to Philosophy of Social

Science Lee McIntyre, Alex Rosenberg, 2016-12-08 37 Why Is There No Philosophy of Political Science **Resources in education** ,1983-07 Social Science Methodology John Gerring, 2001-09-10 This book offers a one volume introduction to social science methodology relevant to the disciplines of anthropology economics history political science psychology and sociology It is written for beginning students long time practitioners and methodologists and applies to work conducted in qualitative and quantitative styles It synthesizes the vast and diverse field of methodology in a way that is clear concise and comprehensive While offering a handy overview of the subject the book is also an argument about how we should conceptualize methodological problems Tasks and criteria the author argues not fixed rules of procedure best describe the search for methodological adequacy Thinking about methodology through this lens provides a new framework for understanding work in the social sciences Theories about and Strategies against Hegemonic Social Sciences Michael Kuhn, Shujiro Yazawa, 2015-07-01 This innovative book provides new perspectives on the globalization of knowledge and the notion of hegemonic sciences Tying together contributions of authors from all across the world it challenges existing theories of hegemonic sciences and sheds new light on how they have been and are being constructed Examining more closely the notions of human rights and individualization this much needed volume offers new and alternative ideas on how to transform the universalization of the Western model of science and can serve as an eye opener for all those interested in non hegemonic scientific discourse This book is published within the Series Beyond the Social Sciences **The Handbook of Social Studies in Health and Medicine** Gary L Albrecht, Ray Fitzpatrick, Susan C Scrimshaw, 2003-04-21 This is the first international and inter disciplinary social science Handbook on health and medicine Five years in the making and building on the insights and advice of an international editorial board the book brings together world class figures to provide an indispensable comprehensive resource book on social science health and medicine Pinpointing the focal issues of research and debate in one volume the material is organized into three sections social and cultural frameworks of analysis the experience of health and illness and health care systems and practices Each section consists of specially commissioned chapters designed to examine the vital conceptual and methodological practice and policy issues Readers receive
