scientists hold key positions in government business the media civil service and the voluntary sector Great Expectations reviews the status of the social sciences in Great Britain at the beginning of the twenty first century While making clear that work opportunities for social scientists are substantial and that levels of intellectual performance equal that of graduates in physics it provides a hard hitting empirically grounded examination of a near crisis situation The report goes far beyond what one conventionally expects in commissioned reports arguing that the academic treadmill driven by excessive accountability burdens reduces the originality and quality of much academic research The report emphasizes the ideological and parochial nature of much British social research As a result there is little applicability internationally even less interdisciplinary work and at times an outright bias against the market economy as such The Commission Report is even handed tough minded and frank in discussing how it is that social science and new social and technical forces do not always mesh The optimism exuded is measured but genuine Great Expectations offers policy recommendations and scientific goals that can be serviceable not only in the United Kingdom but in all advanced societies in which social research is a central component of economic stability and development It is a superb reference volume enriched by original analysis and pungent clear headed writing Members of the commission include Professor David Rhind Vice Chancellor of the City University served as Chairman of the Commission Members included Huw Beynon Cardiff Patricia Broadbent Bristol Vicki Bruce Edinburgh Barry Buzzan LSE Sue Duncan Government Researcher Stuart Etherington National Council for Voluntary Organizations Janet Lewis Oxford Denise Lievesley UNESCO Richard Portes LBS Marc Renaud Research Council of Canada Michael Tonry Cambridge and David Walker The Guardian

Non-humans in Social Science Petr Gibas,Karolína Pauknerová,Marco Stella,2012-04-01 Ideas of dead inert space non living machinelike reflexive controlled bodies and passive meaningless things are very modern At the very heart of the program of modernity resource exploitation and consumption is the idea that non humans have no agency they are simply resources to be manipulated and exploited at our will Mostly leaving aside the more and more evident ethical concerns of this worldview and this setting of the human non human boundary this volume attempts to explore what social sciences have to say about the relationship between the human and non human The intention of this book is to offer a non human perspective We realize that it is sometimes difficult to say whether the outcome of such a perspective would be just a shallow tendency to anthropomorphize or whether we could reach some of the previously unseen properties of non humans Being aware of the dangers this volume puts together different case studies that are more or less inspired by this non human perspective The aim is to explore what has been for a long time put aside and to provide new insights new revelations that can lead social science to undiscovered or hidden realms The outcome of this thrilling adventure can in the end be a discovery that the role of natural and social sciences or even more the character of the nature culture dichotomy would have to be re evaluated
