problems The ecological perspective views human beings as social organisms engaged in patterns of relationships that nurture or inhibit this basic humanity The third theme is an interactionist view of the importance of person environment fit as a central dynamic in human functioning The traditional intra psychic aspects of human behavior have tended to obscure the immense importance of both nurturing and potentially damaging forces at work in the social environment This volume will be of considerable interest to social work educators and practitioners as well as their research libraries Social Work Practice in Healthcare Karen M.
