Society And Power Five New England Towns 1800 1860 A Comparative Study:

Community Leadership in Maryland, 1790-1840 Whitman H. Ridgway, 2018-07-11 American democracy has fascinated generations of historians. They have probed its philosophical foundations and the structure of its institutions but their studies reveal little about those who really wielded power in the formative years of the republic. Employing a sophisticated research design, Whitman Ridgway examines the changing leadership patterns in four diverse communities in Maryland from 1790 to 1840. The results indicate clearly the need to study the American democratic process at the local level. Ridgway selected Baltimore City, Frederick, St. Marys, and Talbot counties representing the underlying economic and cultural diversity of one political culture in Maryland to evaluate who governed how these patterns differed from one community to another and how such patterns changed over time. The research design defines the scope of the study. Ridgway uses the decisional method of analysis, determining who actually made decisions in order to identify the political leaders. His extensive research in manuscript and newspaper collections, tax and census data, and religious and genealogical records gathered information on some 1,300 persons. This study of community power illuminates facets of a democratic society which perplexed Alexis de Tocqueville over a century ago. Ridgway demonstrates that despite the expansion of popular participation in political affairs, the influence of the wealthy continued to be significant. He shows also how leaders without benefit of wealth or social ties to the oligarchies were able to enter community decision making. In a more modern context, this important book adds to the literature in several ways. Its greatest contribution is methodological: no longer can historians talk about power relationships without studying them directly. The work also compares two important periods, the first and second party eras, normally treated in isolation, and through this comparison it reveals much about democracy, egalitarianism, and power. This book is a study of the two largest California gold mining towns, Grass Valley and Nevada City, from 1849 to 1870. This is an analysis of mining towns based on the premise that Western American history is largely an urban history and the aftermath of the Gold Rush of 1849 offers a unique opportunity to investigate the rapid development of town society. **The Islamic Lineage of American Literary Culture** Jeffrey Einboden, 2016-08-02 Uncovering Islam's little-known yet formative impact on U.S. literary culture, this book traces genealogies of Islamic influence that span America's earliest generations, reaching from the Revolution to Reconstruction.

Excavating personal appeals to Islam by pioneering national authors Ezra Stiles William Bentley Washington Irving Lydia Maria Child Ralph Waldo Emerson Einboden discovers Muslim discourse woven into the familiar fabric of unpublished letters and sermons journals and journalism memoirs and marginalia The first to unearth multiple manuscripts exhibiting American investment in Middle Eastern languages and literatures Einboden argues that Islamic precedents helped to prompt and propel creativity in the young Republic acting as vehicles of artistic reflection religious contemplation and political liberation Intersecting informal engagements and intimate exchanges Islamic sources are situated in this timely study as catalysts for American authorship and identity with U S writers mirroring the defining struggles of their country s first decades through domestic investment in the Qur an Hadith and Persian Sufi poetry North Carolina Planters and Their Children,

1800--1860 Jane Turner Censer,1990-07-01 Many historians of late have portrayed upper class southerners of the antebellum period as inordinately aristocratic and autocratic Some have even seen in the planters family relations the faint yet distinct shadow of a master s dealings with his slaves Challenging such commonly held assumptions about the attitudes and actions of the pre Civil War southern elite Jane Turner Censer draws on an impressive array of primary and secondary sources including letters diaries and other first person accounts as well as federal census materials and local wills deeds and marriage records to show that southern planters at least in their relations with their children were caring affectionate and surprisingly egalitarian Through the close study of more than one hundred North Carolina families she reveals the adults to have been doting parents who emphasized to their children the importance of education and achievement and the wise use of time and money The planters guided their offspring toward autonomy by progressively granting them more and more opportunities for decision making By the time sons and daughters were faced with choosing a marriage partner parents played only a restrained advisory role Similarly fathers left career decisions almost entirely up to their sons Censer concludes that children almost invariably met their parents high expectations Most of them chose to marry within their class and the second generation usually maintained or improved their parents high economic status On the other hand Censer finds that planters rarely developed warm empathetic relationships with their slaves Even the traditional mammy whose role in southern planter families has been exalted in much of our literature seems to have held a relatively minor place in the family structure Bringing to light a wealth of previously unassimilated information North Carolina Planters and Their Children points toward a new understanding of social and cultural life among the wealthy in the early nineteenth century South

Disputed Waters Robert Doherty, 2021-10-21 This disturbing study of the struggle of the Chippewa and Ottawa Indians for traditional fishing rights in the Great Lakes raises legal and public policy questions that extend far beyond that region Who owns common property resources in the United States Who should manage those resources and for whose benefit Should Native Americans be accorded rights which supersede those of other citizens and restrict their economic and recreational opportunities Can federal courts successfully resolve conflicts over resource allocation In the pages of this book Robert Doherty follows the conflict from the 1960s when Native Americans renewed their struggle to maintain their treaty rights through to the confrontations that persist to this day During the 1970s the Chippewas of Michigan's Upper Peninsula through federal court decisions secured recognition of Native American rights to fish without state control An ugly campaign of protest ensued with vigilante groups and local police attempting to intimidate Chippewa and Ottawa fishermen With the help of the Reagan administration Michigan officials eventually circumvented the courts and regained a large measure of their former power in a negotiated agreement Robert Doherty writes about these events with knowledge gained from documentary and media sources and from firsthand experience He has been in the courts and on the beaches where confrontations took place and has interviewed many of the participants on both sides For a while he even operated his own fishing enterprise The result of his involvement is a provocative book not afraid to take the side of what Doherty perceives as an oppressed minority group and to make policy recommendations to correct injustice

The Transformation of Political Culture Ronald P. Formisano, 1983 Not only does this splendid book unearth much fresh material from so well tilled a field as Massachusetts political history It also advances an important and provocative interpretation of the evolution of the American party system The *Journal of American History* Supersedes everything else written on the Massachusetts politics of the half century after 1790 It is broadly conceived detailed sensitive and often judicious and persuasive The *New England Quarterly* Focusing on the gradual acceptance of parties by a fundamentally antipartisan society and on the advent of social movements in the 1820s and 1830 and their relation to the formation of mass parties Formisano demonstrates the role of such factors as class industrialization religion and ideology in party formation
