Sociobiology And Mental Disorder A New View:

Sociobiology & Mental Disorder Brant Wenegrat, 1984

Origins of Psychopathology Horacio Fabrega (Jr.), 2002

What are the origins of human psychopathology Is mental illness a relatively recent phenomenon or has it been with us throughout evolution In *Origins of Psychopathology* Horacio Fabrega Jr employs principles of evolutionary biology to better understand the significance of mental illness He explores whether what psychiatry has categorized as mental disorders could have existed during earlier phases of human evolution Fabrega approaches the prominent features of mental disorders as adaptive responses to the environment and life's circumstances which in turn can only be understood in the context of our evolutionary past Taking his cue from theoretical issues raised by research into primate behavior and early hominid evolution he poses the question What if any aspects of mental illness are rooted in our evolution Does mental illness occur in primates and other animals and if so what does this tell us about mental illness in human evolution How has mental illness played an adaptive role How has the development of language and higher cognitive functions affected characteristics of psychopathology Fabrega synthesizes insights from both the clinical and the evolutionary points of view This facet of psychopathology which involves its origins and manifestations viewed across the expanse of human evolution has until now been largely neglected in psychiatric education theory and practice

Social Support and Psychiatric Disorder Traolach

S. Brugha, 1995-08-24 This second volume in a series looking at the social dimensions of mental illness collates and critically examines the information currently available on social support as it impacts on mental health The international team of contributors each actively involved in both clinical and research work in this field collectively covers the whole range of perspectives from biological mechanisms through to psychological and social theory An overview of the latest published evidence and a description of the nature and origins of social support are followed by evidence from observational studies and specific interventions and trials The text concludes with a summary which will act as a valuable resource for practitioners in their evaluation of social and psychological treatments and should also serve to stimulate further research and intervention trials Practitioners and researchers in psychiatry psychology and social work are certain to welcome this timely guide

The Adaptive Design of the Human Psyche Malcolm Owen Slavin, Daniel H. Kriegman, 1992-09-25 Addressing one of the most fundamental issues in any examination of human experience this important new work connects evolutionary biological concepts to modern psychoanalytic theory and the clinical encounter Synthesizing their years of experience in the practice of psychotherapy and psychoanalysis the authors provide a comparative psychoanalytic map of current theoretical controversies and a new way of deconstructing the hidden assumptions that underlie Freudian Ego Psychological Kleinian Object Relational Self Psychological and Interpersonal theories In so doing they provide a new vantage point from which to integrate competing models into a larger picture that more fully embraces the many facets of human nature Moreover they offer clinicians a new framework with which to understand and respond to the inevitable paradoxes and conflicts that arise in

Blackwell Handbook of Social Psychology Garth J. O. Fletcher, Margaret S. Clark, 2002-12-13 This authoritative handbook provides a cutting edge overview of classic and current research as well as an assessment of future trends in the field of interpersonal processes Ensures thorough and up to date coverage of all aspects of interpersonal processes Includes contributions by academics and other experts from around the world to ensure a truly international perspective Provides a comprehensive overview of classic and current research and likely future trends Fully referenced chapters and annotated bibliographies allow easy access to further study Now available in full text online via xreferplus the award winning reference library on the web from xrefer For more information visit www.xreferplus.com Textbook of Evolutionary Psychiatry and Psychosomatic Medicine Martin Brüne, 2015-10-29 This book is unique in taking an evolutionary perspective to understanding psychiatric and psychosomatic conditions It explores how the human brain mind has been shaped by natural and sexual selection and why adaptations to environmental conditions in our evolutionary past may not always work in our best interests Illness and Power Brant Wenegrat, 1996-09 Since ancient times physicians have believed that women are especially vulnerable to certain mental illnesses Contemporary research confirms that women are indeed more susceptible than men to anxiety depression multiple personality and eating disorders and several forms of what used to be called hysteria Why are these disorders more prevalent in women Brant Wenegrat convincingly asserts that women s excess risk stems from a lack of social power He reviews women s social power from an evolutionary and cross cultural perspective and places mental disorders in the context of evolution and societal organization In this comprehensive look at mental disorders commonly associated with women Brant Wenegrat convincingly asserts that women s excess risk stems from a lack of social power *New World New Mind* Robert Evan Ornstein, Paul R. Ehrlich, 2000 There is no longer sufficient time to rely on the normal pace of cultural evolution to deal with today s dilemmas Human beings have always been the most adaptable creatures on the planet and they should be able to chart a new course for themselves Some of that charting is already being done The old mind today is being challenged and changed by many scattered efforts Can we bring these efforts together to produce a large scale program for a rapid change of mind We know what the problem is The solution is not simple to generate the social and political will to move a program of conscious evolution to the top of the human agenda

Handbook of Culture, Therapy, and Healing Uwe P. Gielen, Jefferson M. Fish, Juris G. Draguns, 2012-10-12 Emotional as well as physical distress is a heritage from our hominid ancestors it has been experienced by every group of human beings since our emergence as a species And every known culture has developed systems of conceptualization and intervention for addressing it The editors have brought together leading psychologists psychiatrists anthropologists and others to consider the interaction of psychosocial biological and cultural variables as they influence the assessment of health and illness and the course of therapy The volume includes broadly conceived theoretical and survey chapters detailed descriptions of specific

healing traditions in Asia the Americas Africa and the Arab world The Handbook of Culture Therapy and Healing is a unique resource containing information about Western therapies practiced in non Western cultures non Western therapies practiced both in their own context and in the West

The Adapted Mind Jerome H. Barkow, Leda Cosmides, John Tooby, 1995-10-19 Although researchers have long been aware that the species typical architecture of the human mind is the product of our evolutionary history it has only been in the last three decades that advances in such fields as evolutionary biology cognitive psychology and paleoanthropology have made the fact of our evolution illuminating Converging findings from a variety of disciplines are leading to the emergence of a fundamentally new view of the human mind and with it a new framework for the behavioral and social sciences First with the advent of the cognitive revolution human nature can finally be defined precisely as the set of universal species typical information processing programs that operate beneath the surface of expressed cultural variability Second this collection of cognitive programs evolved in the Pleistocene to solve the adaptive problems regularly faced by our hunter gatherer ancestors problems such as mate selection language acquisition cooperation and sexual infidelity Consequently the traditional view of the mind as a general purpose computer tabula rasa or passive recipient of culture is being replaced by the view that the mind resembles an intricate network of functionally specialized computers each of which imposes contentful structure on human mental organization and culture The Adapted Mind explores this new approach evolutionary psychology and its implications for a new view of culture

Living Archetypes Anthony Stevens, 2015-06-26 Anthony Stevens has devoted a lifetime to modernizing our understanding of the archetypes within us relating them to conceptual developments in a variety of scientific disciplines such as the patterns of behaviour of behavioural ecology the species specific behavioural systems of Bowlby's attachment theory the deep structures of Chomskian linguistics and the modules of evolutionary psychology to name but a few This selection of papers and chapters from the course of Stevens' career all lucidly written and argued highlight episodes in the progress of his quest to place archetypal theory on a sound scientific foundation As a whole Living Archetypes examines how archetypes are activated in the life history of all of us how archetypal imperatives may be fulfilled or thwarted by our living circumstances how they manifest in our dreams symbols fantasies and symptoms and how appreciating their dynamics can generate insights of enormous therapeutic power Living Archetypes The Selected Works of Anthony Stevens provides an invaluable resource for Jungian psychotherapists psychologists academics and students committed to extending the evolutionary approach to psychology and psychiatry and understanding the dynamic significance of archetypes

Evolution of Consciousness Robert Evan Ornstein, 1992-11 Based on his life's research Robert Ornstein provides a look at the evolution of the mind He explains that we are not rational but adaptive and that it is Darwin not Freud who is the central scientist of the brain Our minds have evolved to help us survive not to reason At the same time our individual worlds have developed our minds and destroyed

many of our natural abilities **The Future of Children's Rights** Michael Freeman,2015-01-08 This volume is in part intended to celebrate the 25th anniversary of the United Nations Convention on the Rights of the Child We are now a generation on from its formulation and as this varied collection of articles by leading thinkers in the field reflects children's rights have come a long way Yet the aim of this volume is not to look back but to take stock and look forward It explores subjects as diverse as socio economic rights corporal punishment language and scientific progress as they relate to children and their rights and offers new insights and new ideas Edited by one of the most respected and leading scholars in the field The Future of Children's Rights constitutes a stimulating and useful resource for academics and practitioners alike

Human Nature and Suffering Paul Gilbert,2016-08-05 Human Nature and Suffering is a profound comment on the human condition from the perspective of evolutionary psychology Paul Gilbert explores the implications of humans as evolved social animals suggesting that evolution has given rise to a varied set of social competencies which form the basis of our personal knowledge and understanding Gilbert shows how our primitive competencies become modified by experience both satisfactorily and unsatisfactorily He highlights how cultural factors may modify and activate many of these primitive competencies leading to pathology proneness and behaviours that are collectively survival threatening These varied themes are brought together to indicate how the social construction of self arises from the organization of knowledge encoded within the competencies This Classic Edition features a new introduction from the author bringing Gilbert's early work to a new audience The book will be of interest to clinicians researchers and historians in the field of psychology **The Ideologies**

of Children's Rights Michael Freeman,Philip E. Veerman,2021-09-27 It is often said that you can judge a society by the way it treats its weaker members This book takes this theme and examines the ways in which different aspects of children's lives are treated in a number of societies To this end it uses the conduit of children's rights The importance of children's rights as an ideology and in practice is critically examined by a group of academics and practitioners with an international reputation and wide experience and insight The book offers an understanding of the moral foundations of children's rights and enables all those in whatever discipline to gain a deeper understanding of an issue which has assumed major importance with the passing of the UN Convention on the Rights of the Child **Psychology Library Editions: Social Psychology**

Various,2021-07-09 Psychology Library Editions Social Psychology 30 volume set brings together an eclectic mix of titles from a wealth of authors with diverse backgrounds seeking to understand human behaviour and interaction from a socio psychological perspective The series of previously out of print titles originally published between 1908 and 1993 includes those from some authors considered to be founders of social psychology and traces the development of the subject from its early foundations Evolutionary Medicine Wenda Trevathan,Euclid O. Smith,James Joseph McKenna,1999 Evolution is the single most important idea in modern biology shedding light on virtually every biological question from the shape of orchid blossoms to the distribution of species across the planet Until recently however the theory has had little impact on medical

research or practice Evolutionary Medicine shows how this is beginning to change Collecting work from leaders in the field this volume describes an array of new and innovative approaches to human health that are based on an appreciation of our long evolutionary history For example it shows how evolution helps to explain the complex relationship between our immune systems and the virulence and transmission of human viruses It also shows how comparisons between how we live today and how our hunter gatherer ancestors lived thousands of years ago illuminate a variety of contemporary ills including obesity lower back pain and insomnia Evolutionary Medicine covers issues at every stage of life from infancy colic jaundice SIDS parent infant sleep struggles ear infections breast feeding asthma to adulthood sexually transmitted diseases depression overeating addictions child abuse cardiovascular disease breast and ovarian cancer to old age osteoporosis geriatric sleep problems Written for a wide range of students and researchers in medicine anthropology and psychology it is an invaluable guide to this rapidly developing field

Depression Paul Gilbert, 2016-08-05 Depression The Evolution of Powerlessness offers a fresh perspective on research theory and conceptualisations of the depressive disorders derived from evolution theory and arguing for the adoption of the biopsychosocial model The book is split into three parts Part I explores the major distinctions between all types of depression and Part II offers an overview of evolution theory and its application to depression Part III covers the major theories of depression theories are compared and contrasted highlighting controversies weaknesses and strengths and where cross fertilisation of ideas may be beneficial The final chapter outlines why simple theories of aetiology are inadequate and explores the role of culture and social relationships as elicitors of many forms of depression This Classic Edition with a new introduction from the author brings Paul Gilbert's early work to a new audience and will be of interest to clinicians researchers and historians in the field of psychology
