Theories in Second Language Acquisition Bill VanPatten, Jessica Williams, 2014-12-22 The second edition of *Theories in Second Language Acquisition* seeks to build on the strengths of the first edition by surveying the major theories currently used in second language acquisition research. This text is designed to provide a consistent and coherent presentation for those new to the field who seek basic understanding of theories that underlie contemporary SLA research. Sociocultural Theory in Second Language Education Merrill Swain, Penny Kinnear, Linda Steinman, 2011 In this accessible introduction to Vygotskian sociocultural theory, narratives illuminate key concepts of the theory. These key concepts addressed across seven chapters include mediation, Zone of Proximal Development, collaborative dialogue, private speech, everyday and scientific concepts, the interrelatedness of cognition and emotion, activity theory, and assessment. An eighth chapter provides readers with an opportunity to consider two additional narratives and apply the SCT concepts that they have become familiar with. A Philosophy of Second Language Acquisition Marysia Johnson, 2008-10-01

div

How does a person learn a second language In this provocative book Marysia Johnson proposes a new model of second language acquisition SLA a model that shifts the focus from language competence the ability to pass a language exam to language performance using language competently in real life contexts Johnson argues that current SLA theory and research is heavily biased in the direction of the cognitive and experimental scientific tradition She shows that most models of SLA are linear in nature and subscribe to the conduit metaphor of knowledge transfer the speaker encodes a message the hearer decodes the sent message Such models establish a strict demarcation between learners mental and social processes Yet the origin of second language acquisition is located not exclusively in the learner s mind but also in a dialogical interaction conducted in a variety of sociocultural and institutional settings says the author Drawing on Vygotsky s sociocultural theory and Bakhtin s literary theory she constructs an alternative framework for second language theory research teaching and testing This approach directs attention toward the investigation of dynamic and dialectical relationships between the interpersonal social plane and the intrapersonal individual plane Johnson s model shifts the focus of SLA away from a narrow emphasis on language competence toward a broader view that encompasses the interaction between language competence and performance Original and controversial A Philosophy of Second Language Acquisition offers an introduction to Vygotsky s sociocultural theory and Bakhtin s literary theory both of which support an alternative framework for second language acquisition an examination of the existing cognitive bias in SLA theory and research a radically new model of second language acquisition

Sociocultural Theory and the Pedagogical Imperative in L2 Education James P. Lantolf,Matthew E. Poehner,2014-03-05 Explicating clearly and concisely the full implication of a praxis oriented language pedagogy this book argues for an approach to language teaching grounded in a significant scientific theory of human learning a stance that rejects the consumer approach to theory and the dichotomy between theory and practice that dominates SLA and language teaching This approach is based on Vygotsky s sociocultural theory according to which the two activities are inherently connected so that each is necessarily rooted in the other practice is the research laboratory where the theory is tested From the perspective of language education this is what is meant by the pedagogical imperative Sociocultural Theory and the Pedagogical Imperative in L2 Education Elaborates a new approach to dealing with the relationship between theory and

practice an approach grounded in praxis the dialectical unity of theory and practice Presents an analysis of empirical research illustrating praxis based principles in real language classrooms Brings together cognitive linguistics and sociocultural theory the former provides the theoretical knowledge of language required of praxis and the latter furnishes the theoretical principles of learning and development also called for in a praxis approach Offers recommendations for redesigning teacher education programs Its timely focus on the theory practice gap in language education and its original approach to bridging it put this book at the cutting edge of thinking about Vygotskian sociocultural theory in applied linguistics and SLA *Sociocultural Theory and L2 Instructional Pragmatics* Rémi A. van Compernelle, 2014-02-05 Winner of the AAAL First Book Award 2017 This book outlines a framework for teaching second language pragmatics grounded in Vygotskian sociocultural psychology The framework focuses on the appropriation of sociopragmatic concepts as psychological tools that mediate pragmalinguistic choices Using multiple sources of metalinguistic and performance data collected during a six week pedagogical enrichment program involving one on one tutoring sessions the volume explores both theoretical and practical issues relevant to teaching second language pragmatics from a Vygotskian perspective The book represents an important contribution to second language instructional pragmatics research as well as to second language sociocultural psychology scholarship It will be of interest to all those researching in this field and to language teachers who will find the pedagogical recommendations useful **Contemporary Approaches to Second Language Acquisition** María del Pilar García Mayo, María Junkal Gutierrez Mangado, María Martínez Adrián, 2013-02-19 Second language acquisition SLA is a field of inquiry that has increased in importance since the 1960s Currently researchers adopt multiple perspectives in the analysis of learner language all of them providing different but complementary answers to the understanding of oral and written data produced by young and older learners in different settings The main goal of this volume is to provide the reader with updated reviews of the major contemporary approaches to SLA the research carried out within them and wherever appropriate the implications and or applications for theory research and pedagogy that might derive from the available empirical evidence The book is intended for SLA researchers as well as for graduate MA Ph D students in SLA research applied linguistics and linguistics as the different chapters will be a guide in their research within the approaches presented The volume will also be of interest to professionals from other fields interested in the SLA process and the different explanations that have been put forward to account for it
