(Received 13 January 1977)

**Roger T. Bell**, *Sociolinguistics – goals, approaches and problems*. London: Batsford, 1976. Pp. 252.

Anyone who teaches a course in sociolinguistics should give this new textbook serious consideration, as it may come close to being just what he is looking for. It has plenty of virtues (together with some shortcomings which I will discuss below): it covers most of the topics one is likely to include under sociolinguistics, from the 'micro' end of variation and small-group interaction through to the 'macro' end of national language policies and the like; it covers the literature quite widely, including some of the less recent work; it lays heavy emphasis on the implications of sociolinguistics for traditional linguistics, both structuralist and transformationalist; it focuses on broad issues – in particular on the need for adequate models for the relations between language and non-language – rather than detailed exposition of the results of particular research projects; it makes good connexions with other disciplines, especially social psychology, and generally has a healthy disrespect for boundaries between disciplines; it is on the whole clearly and interestingly written; and it is quite cheap. No other textbook on sociolinguistics has this particular combination of virtues, though others have virtues which this one lacks (in particular, in my opinion, the much meatier Dittmar, 1976) as well as their own particular shortcomings.

For my own course in sociolinguistics I shall NOT be recommending my students to buy Bell's textbook and read it right through as a revision text (which is how Bell himself sees the book as being used (11)), in spite of all the attractive features mentioned above. On the other hand, I shall recommend some sections of it, just as I do with other textbooks and anthologies – for example, I was impressed by the section on the nature of social groups and networks (4.3), the one on the psychology of codeswitching (5.5), the whole chapter on language planning and policies (Chapter 7) and the section on practical and ethical problems in doing sociolinguistic research (8.1).

My main objection to the book concerns the picture which it presents of the relations between sociolinguistics (good) and traditional linguistics (bad). I approve wholeheartedly of Bell's intention, which is to work out the implications of sociolinguistics for linguistics, as I am sure that we linguists lean too heavily
