Sorts* Maureen T. Hallinan, 2000-04-30 The aim of the Handbook of Sociology of Education is to present the most theoretically  
grounded and empirically rigorous sociological analyses of schools to date The authors are distinguished researchers in the  
field Their contributions to the Handbook offer major theoretical perspectives on the schooling process and describe  
significant empirical studies of schools and their effects on individuals and society The research presented in the Handbook  
is built on three fundamental tenets of sociology First the authors adopt the perspective that schools are a central institution  
in society An understanding of the function of schooling in social life is enhanced by viewing schools as interrelated with  
other societal institutions The study of how the context of schooling influences education processes is critical to an  
understanding of school outcomes Rather than being determined solely by ascribed and achieved characteristics an  
individual's cognitive and social development are influenced heavily by the structures and networks in which the individual is  
embedded Communities families schools and social groups are critical elements in the educative process By viewing the  
school as a societal institution and highlighting the interaction between context and individual behavior the Handbook  
chapters provide a broader and deeper understanding of the determinants of learning in contemporary society The second  
sociological insight that guides the research in the Handbook is that the school is a social system      **Handbook of
