Sweetness and Light Hattie Ellis, 2004 The bee is the most studied creature on the planet after man and down the ages this insect and its honey have been harnessed by doctors philosophers scientists politicians artists writers and architects as both metaphor and material In her buzzing narrative Hattie Ellis tells how all these people have found inspiration in the honey bee We also discover some of the mysterious ways of bees how they can make up to 24 000 journeys to produce a pound of honey with each bee producing one teaspoonful in a lifetime we see how charmingly they communicate by dances and we look under the lid of the hive to find as many as 100 000 bees living and working in total discipline But we witness their dark side too such as the savage untamed energy of the swarms of killer African bees that are sweeping through America We also explore some of the many unsolved questions surrounding the honey bee some of them at the very cutting edge of contemporary medical research Why did European honey bees stay in their hives as Chernobyl spread its toxic dust And does honey itself immortal aid longevity The bee existed long before man and without bees we would soon start to die
