Rachel Grant, 2018-08 An augmented reading experience. Title page. **Deceptive Card Play** David Bird, Marc Smith, 2000 The Bridge Technique Series is designed to take the reader through the most important aspects of card play technique at bridge. Each book of the series focuses on a different topic, and wherever possible, the tactics and strategy are considered from the point of view of both declarer and defenders. During the play of the hand, declarer and defenders both have opportunities to use the cards they play to conceal their exact holdings from the opposition. It is possible to disrupt defenders' signaling to mislead the opponents about strength or weakness in a suit and even to persuade the defense to give you information. Back cover. **Be a Winning Coach** Robin Clarkson, 2009-10-23 You want to be a winning coach. Where do you start? This book provides answers. Work from the five points winning coaches do and learn how you take the four steps for

baking a cake, and by following them, you can coach a team or individual to success. Inside is an easy-to-understand training system with innovative concepts and ideas and presents them in a format that anyone can apply to their own level and ultimately become a winning coach. In whatever you do, you always have two options: You can set yourself up for failure or you can set yourself up for success. This book will set you up for success. *Coaching Soccer Tactics* Phil Wymer, 2004

Sedentary Behaviour Epidemiology Michael F. Leitzmann, Carmen Jochem, Daniela Schmid, 2023-12-23 This book addresses the origins, determinants, and magnitude of the global problem of sedentary behaviour, along with concise yet in-depth solutions for tackling it. As a consequence of major technological advances in modern society, many people find themselves in environments characterized by prolonged sedentary behaviour. Building on the contributions of leading experts in the field, the new edition of this book presents updated knowledge about sedentary behaviour, its medical and public health significance, its correlates, and determinants, measurement techniques, and recommendations for addressing this behaviour at the individual, community, environmental, and policy level. The book encompasses current research linking the COVID-19 pandemic to increased levels of sedentary behavior and covers global and planetary health aspects of sedentary behavior, highlighting sustainable development goals such as health and well-being for all. Applying a cross-disciplinary methodology, the book avoids considering physical activity and sedentary behavior as a single continuum, which potentially hampers progress in confronting widespread levels of sedentariness. Rather, the book helps readers better understand how sedentary and physically active behavior co-occur and how the two behaviours have distinct contributing factors. Building on the contributions of distinguished international experts in the field, this thorough resource is a valuable asset and challenges
