Islamic History Through Coins Jere L. Bacharach,2006 What can one discover through the study of medieval Islamic coins It appears that the regular gold dinars and silver dirhams issued by the Ikhshidid rulers of Egypt and Palestine 935 69 followed a series of understood but unwritten rules As the first part of this book reveals these norms involved whose names could appear on the regular currency where the names could be placed based upon a strict hierarchical order and even which parts of a Muslim name could be included The founder of the dynasty Muhammad ibn Tughj could use the honorific al Ikhshid his eldest son and successor could use his teknonym Abu al Qasim his brother the third ruler could use only his name Ali and the eunuch Kafur effective ruler of Egypt for over twenty years could never inscribe his name on the regular coinage At the same time each one of these rulers was named in the Friday sermon and most had their teknonym inscribed on textiles Presentation coins the equivalent of modern commemorative pieces could break all these rules and a wide variety of titles appeared as well as a series of coins with human representation The second half of the book is a catalogue of over 1 200 specimens enabling curators collectors and dealers to identify coins in their own collections and their relative rarity Throughout the book numismatic pieces are illustrated along with commentary on their inscriptions layout and metallic content

The Death of a Prophet Stephen J. Shoemaker, 2011-11-29 The oldest Islamic biography of Muhammad written in the mid eighth century relates that the prophet died at Medina in 632 while earlier and more numerous Jewish Christian Samaritan and even Islamic sources indicate that Muhammad survived to lead the conquest of Palestine beginning in 634 35 Although this discrepancy has been known for several decades Stephen J Shoemaker here writes the first systematic study of the various traditions Using methods and perspectives borrowed from biblical studies Shoemaker concludes that these reports of Muhammad s leadership during the Palestinian invasion likely preserve an early Islamic tradition that was later revised to meet the needs of a changing Islamic self identity Muhammad and his followers appear to have expected the world to end in the immediate future perhaps even in their own lifetimes Shoemaker contends When the eschatological Hour failed to arrive on schedule and continued to be deferred to an ever more distant point the meaning of Muhammad s message and the faith that he established needed to be fundamentally rethought by his early followers The larger purpose of *The Death of a Prophet*

exceeds the mere possibility of adjusting the date of Muhammad's death by a few years far more important to Shoemaker are questions about the manner in which Islamic origins should be studied. The difference in the early sources affords an important opening through which to explore the nature of primitive Islam more broadly. Arguing for greater methodological unity between the study of Christian and Islamic origins, Shoemaker emphasizes the potential value of non-Islamic sources for reconstructing the history of formative Islam.

The Apocalypse of Empire Stephen J. Shoemaker, 2018-11-09

In *The Apocalypse of Empire*, Stephen J. Shoemaker argues that earliest Islam was a movement driven by urgent eschatological belief that focused on the conquest or liberation of the biblical Holy Land and situates this belief within a broader cultural environment of apocalyptic anticipation. Shoemaker looks to the Qur'an's fervent representation of the imminent end of the world and the importance Muhammad and his earliest followers placed on imperial expansion. Offering important contemporary context for the imperial eschatology that seems to have fueled the rise of Islam, he surveys the political eschatologies of early Byzantine Christianity, Judaism, and Sasanian Zoroastrianism at the advent of Islam and argues that they often relate imperial ambition to beliefs about the end of the world. Moreover, he contends that formative Islam's embrace of this broader religious trend of Mediterranean late antiquity provides invaluable evidence for understanding the beginnings of the religion at a time when sources are generally scarce and often highly problematic. Scholarship on apocalyptic literature in early Judaism and Christianity frequently maintains that the genre is decidedly anti-imperial in its very nature. While it may be that early Jewish apocalyptic literature frequently displays this tendency, Shoemaker demonstrates that this quality is not characteristic of apocalypticism at all times and in all places. In the late antique Mediterranean, as in the European Middle Ages, apocalypticism was regularly associated with ideas of imperial expansion and triumph which expected the culmination of history to arrive through the universal dominion of a divinely chosen world empire. This imperial apocalypticism not only affords an invaluable backdrop for understanding the rise of Islam but also reveals an important transition within the history of Western doctrine during late antiquity.
