

The Syntax and Semantics of Cantonese Particles in the Left Periphery

John C. Wakefield
 Hong Kong Baptist University
 Palacký University Olomouc

Abstract

Adopting the cartographic approach, this paper proposes syntactic positions for all left-periphery particles above the tense phrase (TP) in Cantonese. These include both sentence-final particles and sentence-initial particles that can be used in isolation as interjections. Based on previous syntactic proposals for the left periphery, a modification of Rizzi's (2001) split-complementizer phrase (Split-CP) structure is proposed. A Deictic Phrase (DeicP) is added above the finite phrase (FinP) for the Cantonese "tense" particles *laa3* and *lei4(ge3)*. Then, based on a number of proposals inspired by Speas and Tenny (2003), two functional phrases are added above the force phrase (ForceP) – a higher affect phrase (AffectP) for Cantonese sentence-initial particles and a lower discourse phrase (DiscourseP) for most of the sentence-final particles. The resulting structure is tentatively proposed to account for the word order of all left-periphery particles in Cantonese, bringing the description of their syntax closer in line with a number of proposals based on left-periphery particles in other languages. This proposal includes a three-way distinction of the functions and meanings of left-periphery particles: 1) particles that lie between ForceP and TP do not refer directly to the discourse context; 2) particles that head DiscourseP *do* refer directly to the discourse; and 3) particles that head AffectP refer to the discourse *and* express human emotions.

Syntax And Semantics Of The Left Periphery:

The Syntax and Semantics of the Left Periphery Horst Lohnstein, Susanne Trissler, 2012-04-17 The left periphery of clausal structures has been a prominent topic of research in generative linguistics during the last decades. Closer examination of its properties unfolds a rich array of perspectives like the status of barriers for extraction and government, the articulation of the topic focus structure, the fixation of wh scope, the marking of clausal types, the interaction of syntactic structure with inflectional morphology as well as the determination of sentence mood and illocutionary force, to mention just a few. The purpose of this book is to collect different and relevant studies in this field and to give a general overview of the various theoretical approaches concerned with morphological, syntactic and semantic properties together with the diachronic development of the left periphery.

The Syntax and Semantics of Wh-Clauses in Classical Greek Richard Faure, 2021-09-20 Adapting tools recently developed in general linguistics and dwelling on a solid corpus study, this book offers the first comprehensive view on Classical Greek wh clauses since Monteil 1963 and scrutinizes how wh items distribute across the different clause types. False ideas are discarded, e.g. there are no relative clauses, does not take over functions. This essay furthermore teases apart actual neutralization and so far unknown subtle distinctions. Who knew that is featured in three different types of appositive clauses. In the interrogative domain, an analysis is given of what licenses to pop in and to pop out. Tackling these topics and more, this essay draws a coherent picture of the wh clause system whose basis is the notion of non identification.

Brazilian Portuguese, Syntax and Semantics Roberta Pires De Oliveira, Ina Emmel, Sandra Quarezemín, 2020-05-08 This book opens with Angelika Kratzer and Luigi Rizzi talking about contemporary issues such as non recursiveness of focus and the semantics of topics. The chapters climb down the spine from the left periphery to DP, the value of subjunctive across the history of German, expressive expressions in Brazilian Portuguese, left and right dislocation and the speaker's perspective in Italian, Brazilian double subjects and left dislocated topic, long versus short wh movement in Brazilian Portuguese and Quebec French, low adverbs and the raising of the verb in Brazilian Portuguese, ellipsis and null objects in Brazilian and European Portuguese and bare singulars in Brazilian Portuguese. The chapters propose original accounts for language variation and historical changes, most of them focusing on Brazilian Portuguese, a challenge to syntax and semantics. Thus, the volume contributes to Brazilian and Portuguese Linguistics as well as to general and contemporary research on syntax and semantics of natural languages.

Syntax and Semantics of Spatial P Anna Asbury, Jakub Dotlažil, Berit Gehrke, Rick Nouwen, 2008-05-21 The category P belongs to a less studied area in theoretical linguistics which has only recently attracted considerable attention. This volume brings together pioneering work on adpositions in spatial relations from different theoretical and cross linguistic perspectives. The common theme in these contributions is the complex semantic and syntactic structure of PPs. Analyses are presented in several different frameworks and approaches including generative syntax, optimality theoretic semantics and syntax formal semantics, mathematical modeling, lexical syntax and

pragmatics Among the languages featured in detail are English German Hebrew Igbo Italian Japanese and Persian This volume will be of interest to students and researchers of formal semantics syntax and language typology as well as scholars with a more general interest in spatial cognition Towards a Derivational Syntax Michael T. Putnam, 2009 This volume explores recent advancements in the Minimalist Program that adopt Stroh's 1999 2009 Survive Principle as the principle means of accounting for displacement phenomena in earlier versions of generative theory These contributions bring to light many advantages and challenges that beset the Survive minimalist framework including topics such as the lexicon syntax relationship coordinate symmetries scope ellipsis code switching and probe goal relations Despite the diverse broad range of topics discussed in this volume the papers are connected by a renewed investigation of Frampton Gutmann's 2002 vision of a crash proof syntax This volume provides new and interesting perspectives on theoretical issues that have challenged the Minimalist Program since its inception and will provide ample food for thought for syntacticians working in the Minimalist tradition and beyond The syntax of functional left peripheries Julia Bacsikai-Atkari, 2023-10-31 This book provides a novel analysis for the syntax of the clausal left periphery focusing on various finite clause types and especially on embedded clauses It investigates how the appearance of multiple projections interacts with economy principles and with the need for marking syntactic information overtly In particular the proposed account shows that a flexible approach assuming only a minimal number of projections is altogether favourable to cartographic approaches The main focus of the book is on West Germanic in particular on English and German yet other Germanic and non Germanic languages are also discussed for comparative purposes Syntax, semantics, and the lexicon Łukasz Jędrzejowski, Uwe Junghanns, Kerstin Schwabe, Carla Umbach, 2025-05-20 This book is dedicated to Ilse Zimmermann who was a pioneer of Generative Grammar in Germany and made important contributions to the analysis of German and Slavic languages It contains original articles by Zimmermann as well as newly written papers inspired by her work Zimmermann's original articles cover a wide range of topics over a long period of research the earliest dating from 1983 and they make it clear that issues that are highly topical today have long been the subject of linguistic research The newly written papers are closely related to Zimmermann's topics ranging from DP structure verbal inflection and reciprocity to the modification of causative verbs all from a Slavic perspective They are rounded off by a contribution highlighting the leading role played by the Strukturelle Grammatik research group of which Zimmermann was a member in the development of linguistics in Germany Dieses Buch ist Ilse Zimmermann gewidmet die eine Pionierin der Generativen Grammatik in Deutschland war und wichtige Beiträge zur Analyse des Deutschen und der slawischen Sprachen geleistet hat Es enthält sowohl Originalartikel von Zimmermann als auch neu verfasste Beiträge die durch ihre Arbeit inspiriert wurden Zimmermanns Originalartikel decken ein breites Spektrum von Themen in einem langen Forschungszeitraum ab der früheste datiert aus dem Jahr 1983 und sie machen deutlich dass Fragen die heute hochaktuell sind schon lange Gegenstand der linguistischen Forschung sind Die neu verfassten Kapitel stehen in engem Zusammenhang

mit Zimmermanns Themen Sie reichen von der DP Struktur über verbale Flexion und Reziprozität bis hin zur Modifikation kausativer Verben alles aus slawischer Perspektive Abgerundet werden sie durch einen Beitrag der die führende Rolle der Forschungsgruppe Strukturelle Grammatik deren Mitglied Zimmermann war für die Entwicklung der Linguistik in Deutschland hervorhebt *Information Structure and Agreement* Victoria Camacho-Taboada, Ángel L. Jiménez-Fernández, Javier Martín-González, Mariano Reyes-Tejedor, 2013-01-30 This collection consists of thirteen contributions focusing on the latest trends of information structure and agreement couched in the most current developments of Minimalism Cartography and Optimality Some chapters focus on the syntax of information structure in relation with the position occupied by different constituents in the CP domain and their interpretation such as the distinction between contrastive and corrective focus the inclusion of given information in focus the interplay of information structure and binding the relative position of complementisers and discourse based constituents in the left periphery Information structure is also analysed with regards to prominence phenomena at word level Other chapters deal with the notion of agreement and its role in the syntax of specific constructions such as applicatives correlatives or different types of CP like relatives or embedded interrogatives This selection of papers was originally presented at the 21st Colloquium on Generative Grammar held at the University of Seville in April 2011 **UG and External Systems** Anna-Maria Di Sciullo, 2005-01-01 This book explores the interaction of the grammar with the external systems conceptual intentional and sensori motor The papers in the Language section include configurational analyses of the interface properties of depictives clitic clusters imperatives conditionals clefts as well as asymmetries in the structure of syllables and feet The Brain section discusses questions related to human learning and comprehension of language the acquisition of compounds the acquisition of the definite article the subject object asymmetry in the comprehension of D Linked vs non D linked questions the evidence for syntactic asymmetries in American Sign Language the acquisition of syllable types and the role of stress shift in the determination of phrase ending The papers in the Computation section present different perspectives on how the properties of UG can be implemented in a parser implementations of different theories including configurational selection incorporation and minimalism and the role of statistical and quantitative approaches in natural language processing *The Structure of CP and IP* Luigi Rizzi, 2004-06-17 The purpose of this edited volume is to study the structure of the inflectional field and the left peripheral field of clauses often described as the systems of IP Inflection Phrase and CP Complementizer Phrase
