The Ciam Discourse On Urbanism 1928 196:

The CIAM Discourse on Urbanism, 1928-1960 Eric Paul Mumford, 2002 The first history of the Congrès Internationaux d'Architecture Moderne traces the development and promotion of its influential concept of the Functional City **Brussels Housing** Gérald Ledent, Alessandro Porotto, 2023-02-20 Modern urban terraced houses or row houses emerged in Europe from the 17th century onwards Usually two to three storeys high and with a garden at the back they formed the traditional urban block In Brussels this bourgeois form of housing took on a particularly varied and inspiring form including the well known Art Nouveau residences and forms the DNA of the city to this day This publication analyses 100 selected examples illustrating the emergence of the terraced house and its further development in other forms of housing The result is a broad panorama and a history of the architecture and development of the city of Brussels with its particularly heterogeneous cityscape **Greening the City** Dorothee Brantz, Sonja Dümpelmann, 2011-06-24 The modern city is not only pavement and concrete Parks gardens trees and other plants are an integral part of the urban environment Often the focal points of social movements and political interests green spaces represent far more than simply an effort to balance the man made with the natural A city's history with and approach to its parks and gardens reveals much about its workings and the forces acting upon it Our green spaces offer a unique and valuable window on the history of city life The essays in Greening the City span over a century of urban history moving from fin de siècle Sofia to green efforts in urban Seattle The authors present a wide array of cases that speak to global concerns through the local and specific with topics that include green space planning in Barcelona and Mexico City the distinction between public and private nature in Los Angeles the ecological diversity of West Berlin and the historical and cultural significance of hybrid spaces designed for sports The essays collected here will make us think differently about how we study cities as well as how we live in them Contributors Dorothee Brantz Technische Universität Berlin Peter Clark University of Helsinki Lawrence Culver Utah State University Konstanze Sylva Domhardt Swiss Federal Institute of Technology Zurich Sonja Dümpelmann University of Maryland Zachary J S Falck Independent Scholar Stefanie Hennecke Technical University Munich Sonia Hirt Virginia Polytechnic Institute and State University Salla Jokela University of Helsinki Jens Lachmund Maastricht University Gary McDonogh Bryn Mawr College Jarmo Saarikivi University of Helsinki Jeffrey Craig Sanders Washington State University **Team 10 East** Lukasz Stanek, 2014-05-15 This volume coins the term Team 10 East as a conceptual tool to discuss the work of Team 10 members and fellow travelers from state socialist countries such as Oskar Hansen of Poland Charles Polanyi of Hungary and Radovan Nikić of Yugoslavia This new term allows the book's contributors to approach these individuals from a comparative perspective on socialist modernism in Central and Eastern Europe and to discuss the relationship between modernism and modernization across the Iron Curtain In so doing Team 10 East addresses revisionism in state socialist architecture and politics as well as shows how Team 10 East architects appropriated critiqued and developed postwar modernist architecture and functionalist urbanism both from within and

beyond the confines of a Europe split by the Cold War *Spatial Revolution* Christina E. Crawford, 2022-02-15 *Spatial Revolution* is the first comparative parallel study of Soviet architecture and planning to create a narrative arc across a vast geography The narrative binds together three critical industrial residential projects in Baku Magnitogorsk and Kharkiv built during the first fifteen years of the Soviet project and followed attentively worldwide after the collapse of capitalist markets in 1929 Among the revelations provided by Christina E Crawford is the degree to which outside experts participated in the construction of the Soviet industrial complex while facing difficult topographies near impossible deadlines and inchoate theories of socialist space making Crawford describes how early Soviet architecture and planning activities were kinetic and negotiated and how questions about the proper distribution of people and industry under socialism were posed and refined through the construction of brick and mortar steel and concrete projects living laboratories that tested alternative spatial models As a result *Spatial Revolution* answers important questions of how the first Soviet industrialization drive was a catalyst for construction of thousands of new enterprises on remote sites across the Eurasian continent an effort that spread to far flung sites in other socialist states and capitalist welfare states for decades to follow Thanks to generous funding from Emory University and its participation in TOME Toward an Open Monograph Ecosystem the ebook editions of this book are available as Open Access volumes from Cornell Open cornellpress.cornell.edu/cornell-open and other repositories **Ian McHarg and the Search for Ideal Order** Kathleen John-Alder, 2019-09-17 Ian McHarg and the Search for Ideal Order looks at the well known and studied landscape architect Ian McHarg in a new light The author explores McHarg s formative years and investigates how his ideas developed in both their complexity and scale As a precursor to McHarg s approach in his influential book *Design with Nature* this book offers new interpretations into his search for environmental order and outlines how his struggle to understand humanity s relationship to the environment in an era of rapid social and technological change reflects an ongoing challenge that landscape design has yet to fully resolve This book will be of great interest to academics and researchers in landscape architectural history *Everyday Soviet Utopias* Anna Alekseyeva, 2019-02-06 This book explores how intellectuals of the later Soviet decades the 1970s and 1980s sought to bring about the socialist utopian world It argues that the last two decades of the Soviet Union were not characterised by state withdrawal and malaise as some scholars have argued attempts to envisage and enact Utopia remained as imaginative and creative as ever The book considers what these utopian ideas looked like through housing schemes layouts of districts and cities design of objects and interiors and proposals for the organisation of family and social life Relating developments in the Soviet Union to evolving social theory and postmodernism more broadly the book draws transnational parallels between the intellectual history of east and west in the late twentieth century *Hans Scharoun and China* Liyang Ding, 2024-11-15 This book presents the first systematic overview and analysis of the deep connection between Scharoun and China offering insights into East West cultural exchange and enriching existing understandings of modernism The German architect Hans Scharoun has typically

been pigeonholed as a leading figure in expressionist architecture. As this book shows, however, this understanding oversimplifies the multifaceted nature of Scharoun's career and overlooks his central role within the tradition of Neues Bauen. The book begins with Scharoun's early interactions with East Asian architects in the 1930s, his active involvement in the Chinese Werkbund 1941-42, and his extensive research on Chinese architecture and urban culture in the mid 1940s and 1950s. The book then examines Scharoun's postwar architectural designs and urban planning projects, most notably the Kollektivplan, the Volksschule Darmstadt, and the Berliner Philharmonie, which incorporated original spatial and urbanistic concepts such as Stadtlandschaft, Raum der Mitte, andaperspectival space inspired to varying degrees by Chinese architectural and urban planning traditions. The book will appeal to scholars and students of modern architecture, urban planning, and architectural theory, especially those interested in modernism and East-West cultural exchange.

Designing Tito's Capital Brigitte Le Normand, 2014-07-16 A major influence was modernist Le Corbusier and his Athens Charter published in 1943, which called for the total reconstruction of European cities, transforming them into compact and verdant vertical cities unfettered by slumlords, private interests, and traffic congestion. As Yugoslavia transitioned toward self-management and market socialism, the functionalist district of New Belgrade and its modern living were lauded as the model city of socialist man. The glow of the utopian ideal would fade by the 1960s when market socialism had raised expectations for living standards, and the government was eager for inhabitants to finance their own housing. By 1972, a new master plan emerged under Aleksandar Orđević, fashioned with the assistance of American experts. Espousing current theories about systems and rational process planning and using cutting-edge computer technology, the new plan left behind the dream for a functionalist Belgrade and instead focused on managing growth trends.

Architectural Theory, Volume 2 Harry Francis Mallgrave, Christina Contandriopoulos, 2008-08-11 This second volume of the landmark Architectural Theory anthology surveys the development of architectural theory from the Franco-Prussian war of 1871 until the end of the twentieth century. The entire two-volume anthology follows the full range of architectural literature from classical times to present transformations. An ambitious anthology bringing together over 300 classic and contemporary essays that survey the key developments and trends in architecture. Spans the period from 1871 to 2005, from John Ruskin and the arts and crafts movement in Great Britain through to the development of Lingang New City and the creation of a metropolis in the East China Sea. Organized thematically, featuring general and section introductions and headnotes to each essay, written by a renowned expert on architectural theory. Places the work of architects like Koolhaas, Eisenman, and Lynn alongside the work of prominent architectural critics, offering a balanced perspective on current debates. Includes many hard-to-find texts and works never previously translated into English. Alongside Volume I, An Anthology from Vitruvius to 1870, creates a stunning overview of architectural theory from early antiquity to the twenty-first century.
