The Cichlids Yearbook Volume 3:

The Cichlid Diversity of Lake Malawi/Nyasa/Niassa Jos Snoeks, 2004 **Aquarium Fish Magazine**, 1997 Tropical Fish Hobbyist, 2004 *Ancient Lakes: Biodiversity, Ecology and Evolution* Andrew Rossiter, Hiroya Kawanabe, 2000-08-22

Scattered over several continents the ancient lakes of the world have a unique uninterrupted history dating back beyond 100 000 years. Ancient lakes are in effect aquatic islands in which a complex of ecology, genetics and evolutionary constraints have shaped in isolation their biotas over hundreds of thousands to millions of years. The diverse faunas achieve some of the highest levels of diversity known to any habitat, offering unique opportunities as natural laboratories for studying the mechanisms of evolution and speciation in situ. This internationally authored volume contains the latest research results and theories to emerge from a diverse range of studies in these lakes. Containing exciting new findings in the ecology, evolution and systematic studies of ancient lake biotas together with many suggested areas for future research, it will be essential reading for all those with a general interest in ecology, evolution and natural history. In this volume, expert scientists present the latest results and perspectives from their research on the organisms of the ancient lakes. Diverse in its taxonomic coverage and themes and international in its authorship and coverage, *Ancient Lakes* will appeal to all biologists interested in evolution, ecology and biodiversity. Ancient lakes are increasingly recognised as important models of evolution and speciation. This volume presents a diverse range of exciting new hypotheses and perspectives on ancient lake biotas. Information is included on Russian and Chinese faunas available in English here for the first time.

Fish Stocks and Fisheries of Lake Victoria Frans Witte, Wim L. T. van Densen, 1996. The results of eighteen years' research on the fisheries of Lake Victoria are presented here in a single volume. The introduction is followed by sections dealing successively with fish and fisheries methodologies for sampling gear and boats, methods for monitoring fish stocks, management and processing of data, fishery statistics and methods for monitoring the fishery. It therefore proceeds logically from fish to fisherman, passing through the scientific administrative steps needed to acquire and interpret the data necessary to ensure good management. The main body of the text is complemented by appendices which provide specific biological information on the major fish species of Lake Victoria, including a detailed key.

BOOK JACKET **Speciation in Ancient Lakes** Koen Martens, Boudewijn Goddeeris, George W. Coulter, 1994. The present volume should be regarded as a general introduction to the subject of ancient lakes. The special nature and environments of the ancient lakes and extant biodiversities are briefly outlined. Tempo and mode of intra-lacustrine speciation are discussed and various factors affecting speciation and extinction events are listed.
