The Coming Of Age:

The Coming of Age Simone de Beauvoir, 1996 As the definitive study of the universal problem of growing old The Coming of Age is a brilliant achievement Marc Slonin New York Times *Behavioral Finance: The Coming Of Age* Itzhak Venezia, 2019-04-18 The area of behavioral finance though relatively young has matured and spread beyond its initial objectives to demonstrate the fallibility of the efficient market hypothesis to shake the belief in the ubiquity of rational decision making and to convince the finance world of the importance of psychological biases in decision making The success of the field in meeting its goals however has called into question its continued relevance Behavioral finance is thus currently at a crossroads and researchers need to decide which way they should turn for the area to continue to thrive and to meaningfully contribute to financial knowledge This collection of papers deals with rarely explored topics to point at new directions that behavioral finance should explore to maintain its viability along with contributions to traditional topics Some of these topics include innovations the psychology of policy makers biases of peer to peer market participants the behavior and motivation behind corporate social responsibility and the design of exchanges Additionally well known topics such as the disposition effect slow and fast decisions and the availability heuristic are revisited and surprising new findings are presented By opening the field to novel avenues of discussion this book addresses the future of behavioral finance and its transition into a new era

The Coming of Age of the Green Community Erik Bichard, 2013-10-01 People organising to protect their environment is not a new phenomenon but the groups that have been pushing for environmental change since the 1970s have not convinced sufficient numbers make sustainable decisions or to lead sustainable lives Governments have serially failed to do the job at the international level Now climate change resource depletion and widening social aspirations threaten to destabilise human society unless sustainable change can be influenced from another direction The Coming of Age of the Green Community explores the activities of a new generation of community led initiatives that may herald the beginnings of the next wave of activism Erik Bichard combines the testimonies of dozens of group activists with historic evidence and the views of a range of commentators from a variety of disciplines to put forward reasons why some green community groups succeed while others fail He concludes with a valuable prescription for both existing and emerging groups on how to be sustainable both over time and in their actions This book address one of the key questions of the twenty first century has the local perspective on this universal concern finally come of age
