The Baby Sleep Book Martha Sears, James Sears, William Sears, Robert W. Sears, 2008-12-14 Everything you need to know about getting your baby or toddler to sleep from America's foremost baby and childcare experts. Babies don't automatically know how to sleep through the night; they need to be taught. The Sears family has learned from decades of pediatric practice, bolstered by their own parenting experiences, that different babies have different nighttime temperaments and, of course, different families have different lifestyles. Instead of espousing the kind of one method fits all approach advocated in other baby sleep guides, the Sears family explains how you can create a sleep plan that suits the needs of your entire family. With a sharp focus on the practical tools and techniques, *The Baby Sleep Book* covers such topics as: The facts of infant sleep vs. adult sleep; Figuring out where, when and how your child sleeps best; Fail-safe methods for soothing a crying infant; How to make night nursing easier and how to stop; Nighttime fathering tips; Whether co-sleeping makes sense for you; Nap time strategies that work; Medical and physical causes of night waking; Sleep habits in special situations such as traveling, teething and illness.

Bird Brains and Behavior Georg F. Striedter, Andrew N. Iwaniuk, 2025-08-05 From two avian neurobiologists, a captivating deep dive into the mechanisms that control avian behavior. The last few decades have produced extensive research on the neural mechanisms of avian behavior. *Bird Brains and Behavior* marries the enthusiasm of bird enthusiasts for the what, how and why of avian behavior with the scientific literature on avian biology, offering the newest research in an accessible manner. Georg Striedter and Andrew Iwaniuk focus on a wide variety of behaviors ranging from daily and seasonal rhythms to complex cognition. Importantly, avian behavior and mechanisms are placed in the context of evolutionary history, stressing that many are unique to birds and often found in only a subset of species.

The book examines the biographical issues that made such expressive choices attractive to the composer and explores ways in which works not involving explicit verbal texts create signification, allusion and reference.
