The Political and Social Construction of Poverty Serena Romano,2014-01-01 This book is the first to examine the social and political construction of anti poverty programs in Central and Eastern Europe which has faced serious hardships as it has transitioned from communist rule to capitalism beset by economic crisis It explores a range of different attitudes held about poverty stricken people and illustrates how the distinction between deserving and undeserving poor has evolved over the years effected by external pressures from groups like the European Union and World Bank By examining poverty policies against the commonly held attitudes about the poor

that have influenced them Serena Romano offers a new understanding of the many ways that different post communist welfare states have dealt with and understood citizens facing economic hardship Transition, the First Ten Years Pradeep Mitra, Marcelo Selowsky, 2002 The wide variation in transition economies raises questions about differences in economic growth the applicability of transition policies and the advantages of economic reform This report seeks to answer these questions

Transformation and Crisis in Central and Eastern Europe Bruno Dallago, Steven Rosefielde, 2016-05-05 The global financial crisis has provided an important opportunity to revisit debates about post socialist transition and the relative success of different reform paths Post communist Central and Eastern Europe CEECs in particular show resilience in the wake of the international crisis with a diverse range of economic transformations Transformation and Crisis in Central and Eastern Europe offers an in depth analysis of a diverse range of countries including Poland Hungary Russia Ukraine Czech Republic and Slovakia This volume assesses each country's institutional transformations geopolitical policies and local adaptations that have led them down divergent post communist paths Chapters take the reader systematically through the evolution of former communist national economic systems before ending with lessons and conclusions for the future Subsequent chapters demonstrate that economic performance crucially depends on achieving a sustainable balance between sound institutional design and policies on one hand and localization on the other This new volume from a prestigious group of academics offers a fascinating and timely study which will be of interest to all scholars and policy makers with an interest in European Economics Russian and East European Studies Transition Economies Political Economy and the post 2008 world more generally

Progress Toward the Unification of Europe Helena Tang, 2000-01-01 Ten countries of Central and Eastern Europe and the Baltic CEECs are candidates to join an enlarged European Union EU in the years to come The ten are Bulgaria the Czech Republic Estonia Hungary Latvia Lithuania Poland Romania the Slovak Republic and Slovenia This enlargement will bring many opportunities to the both the EU and the candidate countries For the EU it will bring enhanced weight and influence For the candidate countries it should mean an improvement of their long term growth prospects by providing access to an open single market The accession process is providing the impetus for the acceleration of much needed economic political institutional and social reforms in some of the CEECs as they strive to meet EU membership requirements The key for the CEECs is to achieve sustained high long term growth in order to meet their ultimate objective of accession The EU has already concluded agreements with the CEECs which went beyond the narrowly conceived ideas of market access to include the alignment of the CEEC economic system with that of the EU's This report sets out the future agenda for the successful integration of the CEECs into an enlarged EU The first priority is for each country to complete its own process of transition to a free market democratic state In short this will mean that many will have to address their fiscal challenges and ensure fiscal sustainability the challenge of global financial integration opening of their capital accounts the strengthening of their administrative capacity the reduction of unemployment and the promotion of social inclusion

Insincere Commitments Heather Smith-Cannoy, 2012-05-03 Paradoxically many governments that persistently violate human rights have also ratified international human rights treaties that empower their citizens to file grievances against them at the United Nations Therefore citizens in rights repressing regimes find themselves with the potentially invaluable opportunity to challenge their government's abuses Why would rights violating governments ratify these treaties and thus afford their citizens this right Can the mechanisms provided in these treaties actually help promote positive changes in human rights Insincere Commitments uses both quantitative and qualitative analysis to examine the factors contributing to commitment and compliance among post Soviet states such as Slovakia Hungary Kyrgyzstan and Tajikistan Heather Smith Cannoy argues that governments ratify these treaties insincerely in response to domestic economic pressures Signing the treaties is a way to at least temporarily keep critics of their human rights record at bay while they secure international economic assistance or more favorable trade terms However she finds that through the specific protocols in the treaties that grant individuals the right to petition the UN even the most insincere state commitments to human rights can give previously powerless individuals and the nongovernmental and intergovernmental organizations that partner with them an important opportunity that they would otherwise not have to challenge patterns of government repression on the global stage This insightful book will be of interest to human rights scholars students and practitioners as well as anyone interested in the UN international relations treaties and governance *Changes and Innovations in Social Systems* Sarka Hoskova-Mayerova, Cristina Flaut, Daniel Flaut, Pavlina Rackova, 2025-05-13 This book presents challenges and innovations in social problems over the centuries By their nature human beings are innovative and continuously adapted to appeared changes over the time From this point of view human history can be considered as the story of all changes and innovations which have drastically influenced our way of life Changes and innovations are normal things in the way of adaptation and are necessary conditions for survival along the time Changes and innovations are hard and long term processes Any progress in history is the result of changes and innovations To innovate changes are required in the culture in the education in the way of working in the way of think etc In the same time innovations imply changes and changes usually generate reactions Innovations are always oriented to the future and in turn imply changes From here the race of evolution was born Changes require effort generate resistance but in the same time increase performance in almost all domains and increase vision and leadership therefore the progress is obtained To grew up as a field and provide changes innovations need to present its theoretical foundations which make sense of the domains on which they are applied To emphasize the above aspects the proposed book presents some aspects regarding but not only limited to computer science new theoretical and
