Slowdown Danny Dorling, 2020-03-31 The end of our high growth world was underway well before COVID 19 arrived In this powerful and timely argument Danny Dorling demonstrates the benefits of a larger ongoing societal slowdown Drawing from an incredibly rich trove of global data this groundbreaking book reveals that human progress has been slowing down since the early 1970s Danny Dorling uses compelling visualizations to illustrate how fertility rates growth in GDP per person and even the frequency of new social movements have all steadily declined over the last few generations Perhaps most surprising of all is the fact that even as new technologies frequently reshape our everyday lives and are widely believed to be propelling our civilization into new and uncharted waters the rate of technological progress is also rapidly dropping Rather than lament this turn of events Dorling embraces it as a moment of promise and a move toward stability and he notes that many of the older great strides in progress that have defined recent history also brought with them widespread warfare divided societies and massive inequality

Davis, 223 MICH 275 (1923)** ,1923 56 **China's Imports Slowdown** Mr.Alexei Kireyev,Andrei Leonidov,2016-03-07 The paper models international spillovers from a hypothetical drop of China's imports as a result of China's rebalancing of its growth model A network based model used in the paper allows capturing higher round network effects of the shock which are largely unaccounted for in the existing literature Such effects include direct spillovers from China on its trading partners subsequent spillins among them and spillbacks on China itself The paper finds that the network effects most likely will be substantial may amplify initial shock and change the direction of its propagation The impact on Asia and Pacific will be the strongest followed by the Middle East and Central Asia The impact on sub Saharan Africa would be noticeable only for some countries Spillovers on Europe including the Euro area will be moderate and spillovers on the Western Hemisphere including the United States would be very marginal Metal and non fuel commodity exporters may experience the largest negative impact Railway Gazette ,1919
